*Canguilhem and Continental Philosophy of Biology* Giuseppe Bianco, Charles T. Wolfe, Gertrudis Van de Vijver, 2023-02-01 This edited volume presents papers on this alternative philosophy of biology that could be called continental philosophy of biology and the variety of positions and solutions that it has spawned In doing so it contributes to debates in the history and philosophy of science and the history of philosophy of science as well as to the craving for history and or theory in the theoretical biological disciplines In addition however it also provides inspiration for a broader image of philosophy of biology in which these traditional issues may have a place The volume devotes specific attention to the work of Georges Canguilhem which is central to this alternative tradition of continental philosophy of biology This is the first collection on Georges Canguilhem and the Continental tradition in philosophy of biology The book should be of interest to philosophers of biology continental philosophers historians of biology and those interested in broader traditions in philosophy of science Richard Rorty Richard Rumana, 2021-12-13 Demonstrating Richard Rorty's breadth of scholarship and his influence on diverse issues across the social sciences and humanities this comprehensive bibliography contains 1 165 citations A unique reference work on neo pragmatism this bibliography is essential for anyone researching Rorty's work and its impact on philosophy literature the arts religion the social sciences politics and education The Rhetoricity of Philosophy Blake D. Scott, 2024-08-02 This book aims to recast the way that philosophers understand rhetoric Rather than follow most philosophers in conceiving rhetoric as a specific way of speaking or writing it shows that rhetoric is better understood as a dimension of all human discourse and action what the author calls rhetoricity This book provides the first philosophical treatment of rhetoricity It is motivated by two ongoing developments The first is the debate between Alain Badiou and Barbara Cassin about philosophy's relation to rhetoric Both Badiou and Cassin are critical of rhetoric albeit for different reasons Second there has been a growing resurgence of interest in rhetoric considering the recent rise in authoritarian politics as well as new forms of propaganda driven by persuasive technologies This book identifies the common target of Badiou's and Cassin's otherwise incompatible critiques rhetoric's conception of audience It offers a fresh take on the new rhetoric project of Chaim Perelman and Lucie Olbrechts Tyteca putting their work into conversation with the Badiou Cassin debate The book then turns to the hermeneutic philosophy of Paul Ricoeur in search of an expanded conception of audience It shows that Ricoeur's hermeneutic philosophy allows us to extend Perelman and Olbrechts Tyteca's psychological notion of audience to texts themselves and to argue that human beings have a rhetorical capacity to reflect on audiences in search of what is potentially persuasive The Rhetoricity of Philosophy will be of interest to scholars and advanced students working in contemporary European philosophy rhetoric argumentation studies and social theory **Continental Philosophy of Technoscience** Hub Zwart, 2021-11-18 The key objective of this volume is to allow philosophy students and early stage researchers to become practicing philosophers in technoscientific settings Zwart focuses on the methodological issue of how to practice continental

philosophy of technoscience today This text draws upon continental authors such as Hegel Engels Heidegger Bachelard and Lacan and their fields of dialectics phenomenology and psychoanalysis in developing a coherent message around the technicity of science or rather technoscience Within technoscience the focus will be on recent developments in life sciences research such as genomics post genomics synthetic biology and global ecology This book uniquely presents continental perspectives that tend to be underrepresented in mainstream philosophy of science yet entail crucial insights for coming to terms with technoscience as it is evolving on a global scale today This is an open access book , **National bioethics committees in action** UNESCO,2010-12-31 **Medicine and Society, New Perspectives in Continental Philosophy** Darian Meacham,2015-05-22 This volume addresses some of the most prominent questions in contemporary bioethics and philosophy of medicine liberal eugenics enhancement the normal and the pathological the classification of mental illness the relation between genetics disease and the political sphere the experience of illness and disability and the sense of the subject of bioethical inquiry itself All of these issues are addressed from a continental perspective drawing on a rich tradition of inquiry into these questions in the fields of phenomenology philosophical hermeneutics French epistemology critical theory and post structuralism At the same time the contributions engage with the Anglo American debate resulting in a fruitful and constructive conversation that not only shows the depth and breadth of continental perspectives in bioethics and medicine but also opens new avenues of discussion and exploration For decades European philosophers have offered important insights into the relation between the practices of medicine the concept of illness and society more broadly understood These interventions have generally striven to be both historically nuanced and accessible to non experts From Georges Canguilhem s seminal *The Normal and the Pathological* Michel Foucault s lectures on madness sexuality and biopolitics Hans Jonas s deeply thoughtful essays on the right to die life extension and ethics in a technological age Hans Georg Gadamer s lectures on *The Enigma of Health* and more recently J rgen Habermas s carefully nuanced interventions on the question of liberal eugenics these thinkers have sought to engage the wider public as much as their fellow philosophers on questions of paramount importance to current bioethical and social political debate The essays contained here continue this tradition of engagement and accessibility In the best practices of European philosophy the contributions in this volume aim to engage with and stimulate a broad spectrum of readers not just experts In doing so the volume offers a showcase of the richness and rigor of continental perspectives on medicine and society **The Philosophy of Simondon** Pascal Chabot,2013-07-04 The last two decades have seen a massive increase in the scholarly interest in technology and have provoked new lines of thought in philosophy sociology and cultural studies Gilbert Simondon 1924 1989 was one of Frances s most influential philosophers in this field and an important influence on the work of Gilles Deleuze and Bernard Stiegler His work is only now being translated into English Chabot s introduction to Simondon s work was published in French in 2002 and is now available in English for the first time It is the most accessible guide to Simondon s important but often opaque work Chabot provides an

**Being and the Screen** Stephane Vial, 2019-11-12 How digital technology is profoundly renewing our sense of what is real and how we perceive Digital technologies are not just tools they are structures of perception They determine the way in which the world appears to us For nearly half a century technology has provided us with perceptions coming from an unknown world The digital beings that emerge from our screens and our interfaces disrupt the notion of what we experience as real thereby leading us to relearn how to perceive In *Being and the Screen* St phane Vial provides a philosophical analysis of technology in general and of digital technologies in particular that relies on the observation of experience phenomenology and the history of technology epistemology He explains that technology is no longer separate from ourselves if it ever was Rather we are as much a part of the machine as the machine is part of us Vial argues that the so called difference between the real and the virtual does not exist and never has We are living in a hybrid environment which is both digital and nondigital online and offline With this book Vial endows philosophical meaning to what we experience daily in our digital age In *A Short Treatise on Design* Vial offers a concise introduction to the discipline of design not a history book but a book built of philosophical problems developing a theory of the effect of design This book is published with the support of the University of N mes France

**Ethics and Law in Biological Research** Cosimo Marco Mazzoni, 2002-04-11 Scientific research on biotechnologies has become the protagonist of discoveries that exert a formidable impact on public opinion Every day popular opinion is challenged by the media so that it becomes not only a witness of these developments but is also to a certain extent forced to become a judge of those cases where human and animal genetics have been investigated over the last decades The man in the street is thus confronted by moral positions ranging from cautious approval to wait and see attitudes to unconditional condemnation On the other hand scientists are involved in the ethical evaluation of the results of their own research However the results of scientific pursuits are capable of producing immediate effects on the daily life of every human being Consequently alongside the scientists people feel strongly about their need and their right to contribute to an accurate assessment of the effects of science on society This is a collection of essays reflecting a considerable range of different cultural experiences and different ethical underpinnings The main subject is cloning Cloning is the most accessible and most readily perceived point of convergence from which ethical

judgments on the current developments of scientific investigations can be proposed Cloning is also the paradox on which the confrontation between scientific research and popular imagination is focused

***What Things Do*** Peter-Paul Verbeek, 2005-03-11 Our modern society is flooded with all sorts of devices TV sets

automobiles microwaves mobile phones How are all these things affecting us How can their role in our lives be understood What Things Do answers these questions by focusing on how technologies mediate our actions and our perceptions of the world Peter Paul Verbeek develops this innovative approach by first distinguishing it from the classical philosophy of technology formulated by Jaspers and Heidegger who were concerned that technology would alienate us from ourselves and the world around us Against this gloomy and overly abstract view Verbeek draws on and extends the work of more recent philosophers of technology like Don Ihde Bruno Latour and Albert Borgmann to present a much more empirically rich and nuanced picture of how material artifacts shape our existence and experiences In the final part of the book Verbeek shows how his postphenomenological approach applies to the technological practice of industrial designers Its systematic and historical review of the philosophy of technology makes What Things Do suitable for use as an introductory text while its innovative approach will make it appealing to readers in many fields including philosophy sociology engineering and industrial design
