implications It affects our understanding of the therapeutic benefits accruing from anti hypertensive agents the way we control hyperglycemia hyperinsulinemia and hyperlipidemia and our use of dietary approaches to the correction of obesity The defensive mechanisms against oxidative stress such as the Nrf2 Keap1 system and hypoxia such as the PHD HIF system have recently been explored in various cells including kidney cells These mechanisms include intracellular sensors for oxidative stress and hypoxia This means that novel approaches targeting these sensors may offer clinical benefits in kidney disease in which oxidative stress and or hypoxia is a final common pathway Renal Fibrosis Mohammed S.
