**Global Strategic Trade Management** Rajiv Nayan, 2019-02-26 This book examines whether India is successfully integrating and adapting to the global strategic management system. It offers essential insights into the evolution of export controls for goods which may have implications for the development of Weapons of Mass Destruction, an aspect that is especially relevant given India's robust biotechnological, chemical, and nuclear industrial base. In security studies, the phrase strategic trade management is now slowly replacing the phrase export control. However, for the policymaking community, export control remains popular at least for the sake of reference. The book also describes the mechanisms India is adopting in this regard. It demonstrates the shift in the Indian approach to strategic trade management from an outspoken critic to a supporter. Politically, the country was initially skeptical of the idea of export controls because it was a target of such systems. The book also explains the tools, forces, and incentives that moved India to adapt its policy on export controls or strategic trade management.
