Cerberus Pyrotronics Remote LED Annunciator units are designed to be used with the IXL Control Panel. It is an eight point annunciator containing sixteen LED's for the display of trouble and alarm status or initiating devices. LED Series Remote Annunciators can be located in the building lobby or in a protected area. In its quiescent mode of operation, all LED's are off. In the event of an alarm, a red LED will light to indicate which device or zone is in alarm. To report troubles (i.e., removal of a detector head), the corresponding yellow LED will light, indicating which devices have been programmed as a single zone, then only one LED will light regardless of the number of devices in that zone indicating the trouble condition. The Remote Annunciator may be tested by using the Lamp Test feature of the Control Panel.

Annunciators perform the important service of pinpointing the location of the alarm device or the zone from which an alarm originates.
