Marxism and Educational Theory Mike Cole, 2007-10-18 We live in a world where thousands make massive profits out of the labours of others while those others exist as wage slaves millions of whom die of starvation and poverty related illness every year The fundamental aim of Marxism is the overthrow of the anarchic exploitative and eco destructive system of world capitalism and its replacement by world socialism and equality To

build a socialist world is a task of gargantuan proportions but one that Marxists believe is eminently achievable This book addresses some of these challenges from within educational theory The key theoretical issues addressed are utopian socialism poststructuralism and postmodernism transmodernism globalisation neo liberalism and environmental destruction the new imperialism critical race theory Marxism and Educational Theory compellingly and informatively propels the debate forward in the pursuit of that socialist future In that quest suggestions are made to connect theoretical issues with the more practical concerns of the school and the classroom With a specially written Foreword by Peter McLaren this timely book will be of interest to academics and students interested in educational theory the sociology of education sociology politics philosophy and critical theory *Class, Race and Education under Neoliberal Capitalism* Dave Hill, 2024-06-07 With the onset of Austerity Capitalism and Immiseration Capitalism and with the increasing commodification marketisation and privatisation of society and of education Marxist Theory and Marxist Education Theory have taken on a new urgency In this collection of essays written from a classic Marxist perspective Dave Hill lays bare how the capitalist class in the knowledge industry academia use ideological and repressive state apparatuses such as education to divide disarm and demoralise critical Marxist analysis and activism This title is co published with Aakar Books Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan *Knowledge Beyond Colour Lines* Monwabisi K. Ask any moderately interested Briton to name a black intellectual and chances are the response will be an American name Malcolm X or Barack Obama Toni Morrison or Cornel West Yet Britain has its own robust black intellectual traditions and its own master teachers among them C L R James Claudia Jones Ambalavaner Sivanandan Stuart Hall and Paul Gilroy However while in the USA black public intellectuals are an embedded if often embattled feature of national life black British thinkers remain routinely marginalized Black British Intellectuals and Education counters this neglect by exploring histories of race education and social justice through the work of black British public intellectuals academics educators and campaigners The book provides a critical history of diverse currents in black British intellectual production from the eighteenth century through post war migration and into the post multicultural present focusing on the sometimes hidden impacts of black thinkers on education and social justice Firstly it argues that black British thinkers have helped fundamentally to shape educational policy practice and philosophy particularly in the post war period Secondly it suggests that education has been one of the key spaces in which the mass consciousness of being black and British has emerged and a key site in which black British intellectual positions have been defined and differentiated Chapters explore the early development of black British intellectual life from the slave narratives to the anti colonial movements of the early twentieth century how African Caribbean and Asian communities began to organize against racial inequalities in schooling in the post Windrush era of the 1950s and 60s how from out of these grassroots struggles black intellectuals and activists of the 1970s 80s and 90s

developed radical critiques of education youth and structural racism the influence of multiculturalism black cultural studies and black feminism on education current developments in black British educational work including post racial approaches Critical Race Theory and black social conservatism Black British Intellectuals and Education will be of key relevance to undergraduates postgraduates and academics engaged in research on race ethnicity education social justice and cultural studies

Literacy on the Left Andrew Lambirth, 2011-04-14 This engaging text explores discourses involved in the teaching of literacy which can be conceptualised as deriving from the political left The concept of a left and a right in politics are fully defined and a unique analytical framework is introduced to examine and categorise perspectives for teaching literacy The book creates a language of critique for methods advocated from liberal left leaning sources within the field of education and connects them to left political agendas that aspire to either reform or revolution to change and improve society These left approaches are then contrasted with politically right agendas Methods for the teaching of literacy have for many years been seen to be politically motivated by commentators on the left and the right of politics This book considers the ideological sources of educational practice in literacy Methods advocated from more liberal perspective are rarely critiqued and examined for their ideological and political roots

Challenging Status Quo Retrenchment Curry Malott, Brad J. Porfilio, Tricia M. Kress, 2013-03-01 This year 2012 marks ten years of No Child Left Behind and the U S federal government's official designation of what qualifies as scientifically based research SBR in education Combined these two policies have resulted in a narrowing of education via standardization and high stakes testing Au 2007 as well as the curtailment of forms of inquiry that are deemed legitimate for examining education Wright 2006 While there has been much debate about the benefits and limitations of the NCLB legislation e g Au 2010 and SBR e g Eisenhart Towne 2003 critical researchers have held strong to their position The reductionistic narrowing of education curricula and educational research cannot solve the present and historical inequities in society and education Shields 2012 Contrarily reductionism via standardization and or methodological prescription exacerbates the challenges we face because it effectively erases the epistemological ontological and axiological diversity necessary for disrupting hegemonic social structures that lie at the root of human suffering Kincheloe 2004 Not only has NCLB proven incapable of overcoming inequalities but there seems to be sufficient evidence to suggest it was never really intended to eliminate poverty and human suffering That is it seems NCLB despite its lofty title and public discourse is actually designed to advance the agenda of handing public education over to for profit corporations to manage and privatize thereby intensifying the capitalist class war on those who rely on a wage to

survive Malott 2010 In the present ethos reductionism upholds and retrenches the status quo i e the basic structures of power and it puts at risk education and educational research as means of working toward social justice Biesta 2007 Because social justice can be interpreted in multiple ways we might note that we understand critical social justice as oriented toward action and social change Thus critical education and research may have potential to contribute to a number of social justice imperatives such as redistributing land from the neo colonizing settler state to Indigenous peoples halting exploitative labor relations and hazardous working conditions for wage earners and engaging in reparations with formerly enslaved communities

Education, Equality and Human Rights Mike Cole, 2011-11-18 Addressing issues that include the challenge of disability discrimination in schooling gender and equality race and racism sexuality and social justice and class analysis and knowledge formation Education Equality and Human Rights is an urgent and important contribution to the social justice literature as it intersects with current educational debates and struggles Professor Peter McLaren University of Auckland New Zealand Education Equality and Human Rights traces the history of diverse equality issues up to the present and enables readers to assess their continuing relevance in the future Written by experts in their particular field each of the five equality issues of gender race sexual orientation disability and social class are covered as areas in their own right as well as in relation to education This third edition has been fully revised to reflect major changes in law and policy and offers contemporary perspectives on world wide equality issues Key issues explored include human rights and equality gender gender and education racism racism and Education sexuality and identity sexuality and homophobia in schools the struggle for disability equality inclusive education social class social Class and education With a new foreword by leading educationist Peter McLaren this comprehensive accessible and thought provoking book will be of interest to teachers student teachers education students and all those more generally interested in issues of equality and human rights

Equality in the Primary School Dave Hill, Leena Helavaara Robertson, 2011-11-24 Drawing on a wealth of knowledge from a diverse group of contributors this volume addresses the importance of going beyond equal opportunities The contributors provide a compelling argument for promoting equality in primary schools Issues covered include social class race gender sexual orientation disability and special educational needs with reference to all subjects taught at primary school level

Race and Ethnicity in English Language Teaching Christopher Joseph Jenks, 2017-08-14 This book examines racism and racialized discourses in the ELT profession in South Korea The book is informed by a number of different critical approaches to race and discourse and the discussions contained in the chapters offer one way of exploring how the ELT profession can be understood from such perspectives Observations made are based on the understanding that racism should not be viewed as individual acts of discrimination but rather as a system of social structures While the book is principally concerned with language teaching and learning in South Korea the findings are situated in a wider discussion of race and ethnicity in the global ELT profession The book makes the following argument White normativity is an ideological commitment and a form of

racialized discourse that comes from the social actions of those involved in the ELT profession this normative model or ideal standard constructs a system of racial discrimination that is founded on White privilege saviorism and neoliberalism Drawing on a wide range of data sources this book is a must read for anyone interested in critically examining ELT
