## **Critical Mass How One Thing Leads To Another:**

**Critical Mass** Philip Ball, 2004 In searching for answers the science writer Philip Ball argues that we can enlist help from a seemingly unlikely source physics The first person to think this way was the seventeenth century English philosopher Thomas Hobbes His approach described in Leviathan was based not on utopian wishful thinking but rather on Galileo s mechanics it was an attempt to construct a moral and political theory from scientific first principles Although his solution absolute monarchy is unappealing today Hobbes sparked a new way of thinking about human behavior in looking for the scientific rules of society Adam Smith Immanuel Kant Auguste Comte and John Stuart Mill pursued this same idea from different political perspectives BOOK JACKET

**Critical Mass** Philip Ball, 2004 **Bridging the Gap** Bert Ayers, 2015-10-25 Take a look at a critical transition in Albania s history Bridging the Gap provides a glimpse into the country and provides a statistical analysis of two villages [Creating Contagious Commitment, 2nd Edition](#) Andrea Shapiro, 2010-01-11 Too often necessary and technically appropriate change initiatives fall short of expected gains because leaders fail to involve employees and leverage their perspectives This deprives leaders of valuable input and causes the very people who are expected to modify the way they work to feel discounted and disconnected Creating Contagious Commitment Applying the Tipping Point to Organizational Change presents a proven approach to turn this all too common situation around It goes to the heart of effective change implementation and shows how to move employees from being apathetic or resistant to becoming committed advocates of a change Creating Contagious Commitment demonstrates why many of the traditional approaches to change implementation such as focusing on the easily measurable technical aspects or relying on mass awareness campaigns don t work very well especially on their own It explains the dynamics that contribute to successful change initiatives and how to use them right now in your own initiatives The accessibility of the concepts and the practical strategies they provide make Creating Contagious Commitment a unique and powerful guide for change agents in any organization Andrea Shapiro s clear and skillful blending of theory with useful examples brings these concepts to life in a way that appeals to anyone who is involved in change Solidly grounded in organizational theory systems thinking and real world experience Creating Contagious Commitment can be used as a stand alone resource or in combination with the companion Change Dialogue and Action workshop with its interactive computer simulation called the Tipping Point It has been applied by hundreds of change leaders around the world in a wide range of organizations from banks and hospitals to high tech corporations to make organizational change both contagious and sustainable It is packed with diagrams illustrations and stories from the field many of them first person accounts of applying its lessons Visit [CreatingContagiousCommitment.com](#) to learn more Praise for Creating Contagious Commitment It is very easy to have good intentions and even easier to get advice from someone who has good intentions What is hard is to recognize the landmines on the path to successful change Creating Contagious Commitment helps identify and think about such obstacles before we

encounter them making the path to change more thoughtful and ultimately more successful Dan Ariely Ph D James B Duke Professor of Behavioral Economics author Predictably Irrational It is only by effectively influencing people s beliefs values and changing social norms that we can change behaviors that get us all to yes Andrea understands this and clearly maps out how new cultural norms can be systematically embedded into any organization This book is a must have in any change agent s toolbox Peter Fail M Sc Corporate Procurement Manager Durham County Council UK The Tipping Point is a brilliant computer model of change initiatives as they unfold in large complex organizations Change agents need to be informal keenly aware of the different needs of different types of people and committed to their purpose This book shows what to do and what happens along the way both in the model and in real life Art Kleiner author Who Really Matters and The Age of Heretics

Critical Mass Philip Ball,2025-06-25 Are there any laws of nature that influence the ways in which humans behave and organize themselves In the seventeenth century tired of the civil war ravaging England Thomas Hobbes decided that he would work out what kind of government was needed for a stable society His approach was based not on utopian wishful thinking but rather on Galileo s mechanics to construct a theory of government from first principles His solution is unappealing to today s society yet Hobbes had sparked a new way of thinking about human behavior in looking for the scientific rules of society Adam Smith Immanuel Kant Auguste Comte and John Stuart Mill pursued this idea from different political perspectives Little by little however social and political philosophy abandoned a scientific approach Today physics is enjoying a revival in the social political and economic sciences Ball shows how much we can understand of human behavior when we cease to try to predict and analyze the behavior of individuals and instead look to the impact of individual decisions whether in circumstances of cooperation or conflict can have on our laws institutions and customs Lively and compelling Critical Mass is the first book to bring these new ideas together and to show how they fit within the broader historical context of a rational search for better ways to live Understanding Military Doctrine Harald Hoiback,2013-07-18 This book puts military doctrine into a wider perspective drawing on military history philosophy and political science Military doctrines are institutional beliefs about what works in war given the trauma of 9 11 and the ensuing War on Terror serious divergences over what the message of the new military doctrine ought to be were expected around the world However such questions are often drowned in ferocious meta doctrinal disagreements What is a doctrine after all This book provides a theoretical understanding of such questions Divided into three parts the author investigates the historical roots of military doctrine and explores its growth and expansion until the present day and goes on to analyse the main characteristics of a military doctrine Using a multidisciplinary approach the book concludes that doctrine can be utilized in three key ways as a tool of command as a tool of change and as a tool of education This book will be of much interest to students of military studies civil military relations strategic studies and war studies as well as to students in professional military education Investment Leadership and Portfolio Management Brian D. Singer,Greg Fedorinchik,2009-10-26 An industry leader candidly examines

the role of investment leadership in portfolio management Investment Leadership investment philosophy process and portfolio construction communication and transparency and ethics and integrity Leadership issues in investment firms are a serious concern and this book addresses those concerns Details the strong correlation between excellence in investment leadership and excellence in portfolio management Written by a group of experienced professionals in the field including the Chairman of the CFA Institute Board of Governors Understanding how to operate in today's dynamic investment environment is critical Investment Leadership Portfolio Management contains the insights and information needed to make significant strides in this dynamic arena      *Understanding Creative Business* Jim Shorthose, Neil Maycroft, 2016-02-17 From authors used to operating between the commercial public and independent sectors of the mixed cultural economy Understanding Creative Business bridges the gap between creative practice and mainstream business organisation entrepreneurship and management Using stories case studies and exercises it discusses the positioning of creative practice within professional and business development cultural policy making and the wider cultural economy and suggests what the broader field of business and management studies can learn from the informal structure and working practices of creative industries networks Consideration is given to how ethical and moral value orientations animate creative practice and how they play into the wider debate about social responsibilities within business and public policy The authors also explore the way creative business practices often coalesce around emergent and self organized networks and how this signals alternative approaches to management entrepreneurship business organisation and collaboration Above all else this book is about relationships the practical examples expose the ways creative business can professionalise research develop and sustain routes to growth through open collaborative innovation and the lessons this holds for more general business innovation and policy engagements with the public domain Written in accessible language this book will be useful to researchers students educators and practitioners within the creative industries to those working within cultural policy arts and cultural management and to all with an interest in management and leadership      *Stalking the Black Swan* Kenneth A. Posner, 2010-03-31 Kenneth A Posner spent close to two decades as a Wall Street analyst tracking the so called specialty finance sector which included controversial companies such as Countrywide Fannie Mae Freddie Mac CIT and MasterCard many of which were caught in the subprime mortgage and capital markets crisis of 2007 While extreme volatility is nothing new in finance the recent downturn caught many off guard indicating that the traditional approach to decision making had let them down Introducing a new framework for handling and evaluating extreme risk Posner draws on years of experience to show how decision makers can best cope with the Black Swans of our time Posner's shrewd assessment combines the classic fundamental research approach of Benjamin Graham and David Dodd with more recent developments in cognitive science computational theory and quantitative finance He outlines a probabilistic approach to decision making that involves forecasting across a range of scenarios and he explains how to balance confidence react accurately to fast breaking

information overcome information overload zero in on the critical issues penetrate the information asymmetry shielding corporate executives and integrate the power of human intuition with sophisticated analytics Emphasizing the computational resources we already have at our disposal our computers and our minds Posner offers a new track to decision making for analysts investors traders corporate executives risk managers regulators policymakers journalists and anyone who faces a world of extreme volatility *New Frontiers in the Philosophy of Intellectual Property* Annabelle Lever, 2012-07-05 Are intellectual property rights a threat to autonomy global justice indigenous rights access to lifesaving knowledge and medicines The essays in this volume examine the justification of patents copyrights and trademarks in light of the political and moral controversy over TRIPS the Agreement on Trade Related Aspects of Intellectual Property Rights Written by a distinguished international group of experts this book draws on the latest philosophical work on autonomy equality property ownership and human rights in order to explore the moral political and economic implications of property rights in ideas Written with an interdisciplinary audience in mind these essays introduce readers to the latest debates in the philosophy of intellectual property whether their interests are in the restrictions that copyright places on the reproduction of music and printed words or in the morality and legality of patenting human genes essential medicines or traditional knowledge

**Thinking Politically about HIV** Kent Buse, Dennis Altman, 2016-04-08 AIDS has a unique political history As fears grew of a global pandemic on the scale of AIDS in sub Saharan Africa AIDS was briefly treated as an issue of high politics in the international arena and generated significant resources for country programmes That initial commitment is now declining and if AIDS is to maintain its visibility and contribution to global solidarity human rights and dignity its politics will have to evolve to reflect the profound geo political economic and social transformations underway today This volume brings together leading scholars from a variety of disciplines who work at the intersection of politics and HIV They reflect on the lessons learned from the past thirty years of the politics of AIDS and how political science writ large can further contribute to the understanding and practice of political mobilization around AIDS Through case studies and analysis new insights into identity politics and social movements in countries as diverse as Brazil Switzerland Vietnam and Zambia are offered alongside new approaches to understanding the determinants and incentives which generate political will and commitment This book was published as a special issue of Contemporary Politics *Herd* Mark Earls, 2009-08-07 fascinating Like Malcolm Gladwell on speed THE GUARDIAN *HERD* is a rare thing a book that transforms the reader's perception of how the world works Matthew D Ancona THE SPECTATOR This book is a must Once you have read it you will understand why Mark Earls is regarded as a marketing guru Daniel Finkelstein THE TIMES This paperback version of Mark Earls groundbreaking and award winning book comes updated with new stats and figures and provides two completely revised chapters that deal with the rise of social networking Since the Enlightenment there has been a very simple but widely held assumption that we are a species of thinking individuals and human behaviour is best understood by examining the psychology of individuals It appears however

that this insight is plain wrong The evidence from a number of leading behavioural and neuroscientists suggests that our species is designed as a herd or group animal Mark Earls applies this evidence to the traditional mechanisms of marketing and consumer behaviour with a result that necessitates a complete rethink about these subjects HERD provides a host of unusual examples and anecdotes to open the mind of the business reader from Peter Kay to Desmond Tutu Apple to UK Sexual Health programmes George Bush to Castle Lager from autism to depression to the real explanation for the placebo effect in pharmaceutical testing

**God and the Folly of Faith** Victor J. Stenger, 2012-04-03 A thorough and hard hitting critique that is a must read for anyone interested in the interaction between religion and science It has become the prevalent view among sociologists historians and some theistic scientists that religion and science have never been in serious conflict Some even claim that Christianity was responsible for the development of science In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology Stenger makes a convincing case that not only is this conclusion false but Christianity actually held back the progress of science for one thousand years It is significant he notes that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought The author goes on to detail how religion and science are fundamentally incompatible in several areas the origin of the universe and its physical parameters the origin of complexity holism versus reductionism the nature of mind and consciousness and the source of morality In the end Stenger is most troubled by the negative influence that organized religion often exerts on politics and society He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance such as overpopulation and environmental degradation When religion fosters disrespect for science it threatens the generations of humanity that will follow ours

*Counterpower* Tim Gee, 2011-10-18 No major campaign has ever been successful without counterpower the power that the have nots can use to remove the power of the haves This is examined by investigating the history and tactics of the suffrage movement the labour movement the anti war movement the anti colonial movement the environmental movement and more In the context of the financial crisis and the threat of climate change engagement in system critical social movements is on the increase This unique book demystifies the power dynamics of social change

**Intellectual Property and Emerging Technologies** Matthew Rimmer, Alison McLennan, 2012-01-01 This unique and comprehensive collection investigates the challenges posed to intellectual property by recent paradigm shifts in biology It explores the legal ramifications of emerging technologies such as genomics synthetic biology stem cell research nanotechnology and biodiscovery Extensive contributions examine recent controversial court decisions in patent law such as *Bilski v Kappos* and the litigation over Myriad's patents in respect of BRCA1 and BRCA2 while other papers explore sui generis fields such as access to genetic resources plant breeders rights and traditional knowledge The collection considers the potential and the

risks of the new biology for global challenges such as access to health care the protection of the environment and biodiversity climate change and food security It also considers Big Science projects such as biobanks the 1000 Genomes Project and the Doomsday Vault The inter disciplinary research brings together the work of scholars from Australia Canada Europe the UK and the US and involves not only legal analysis of case law and policy developments but also historical comparative sociological and ethical methodologies Intellectual Property and Emerging Technologies will appeal to policy makers legal practitioners business managers inventors scientists and researchers

**Speculations** Paul J. Ennis, 2020 From the Editorial Introduction Since I am convinced that nobody reads editorials I will keep my remarks brief Putting together the inaugural issue of *Speculations* has been an unusual experience It has depended on the collusion of fellow speculative types the help of many anonymous reviewers the endless patience of designer Thomas Gokey and more hours than someone in the final year of their PhD should ever spend on a project Looking over the final product I think it has all been worth it This is the first journal dedicated to speculative realism and despite the obscurity of that term I think we all understand it as a handy label under which weird realists continental metaphysicians object oriented ontologists transcendental realists vitalists and Lovecraftians can unite This is also perhaps the first time a journal can boast that each contributor is also a blogger This is the reason why *Speculations* could only ever be an online open access journal

**Critical Political Economy** Christian Arnsperger, 2007-12-11 This bold and ambitious book attempts to diagnose and remedy what is wrong with economics so that it can become an emancipatory form of knowledge It will be of interest to serious economists and philosophers of social science everywhere

*What Science Knows* James Franklin, 2009-11-01 To scientists the tsunami of relativism scepticism and postmodernism that washed through the humanities in the twentieth century was all water off a duck's back Science remained committed to objectivity and continued to deliver remarkable discoveries and improvements in technology In *What Science Knows* the Australian philosopher and mathematician James Franklin explains in captivating and straightforward prose how science works its magic He begins with an account of the nature of evidence where science imitates but extends commonsense and legal reasoning in basing conclusions solidly on inductive reasoning from facts After a brief survey of the furniture of the world as science sees it including causes laws dispositions and force fields as well as material things Franklin describes colorful examples of discoveries in the natural mathematical and social sciences and the reasons for believing them He examines the limits of science giving special attention both to mysteries that may be solved by science such as the origin of life and those that may in principle be beyond the reach of science such as the meaning of ethics *What Science Knows* will appeal to anyone who wants a sound readable and well paced introduction to the intellectual edifice that is science On the other hand it will not please the enemies of science whose willful misunderstandings of scientific method and the relation of evidence to conclusions Franklin mercilessly exposes

**Beyond Egyptomania** Miguel John Versluys, 2020-06-08 The material and intellectual presence of Egypt is at the heart of Western culture religion and art from Antiquity to the present

This volume aims to provide a long term and interdisciplinary perspective on Egypt and its mnemohistory taking theories on objects and their agency as its main point of departure The central questions the book addresses are why from the first millennium BC onwards things and concepts Egyptian are to be found in such a great variety of places throughout European history and how we can account for their enduring impact over time By taking a radically object oriented perspective on this question this book is also a major contribution to current debates on the agency of artefacts across archaeology anthropology and art history

*The SAGE Handbook of Marketing Theory* Pauline Maclaran, Michael Sørensen, Barbara Stern, Mark Tadajewski, 2009-12-04 Bringing together the latest debates concerning the development of marketing theory featuring original contributions from a selection of leading international authors this collection aims to give greater conceptual cohesion to the field by drawing together the many disparate perspectives and presenting them in one volume The contributors are all leading international scholars chosen to represent the intellectual diversity within marketing theory Divided into six parts the Handbook covers the historical development of marketing theory its philosophical underpinnings major theoretical debates the impact of theory on representations of the consumer the impact of theory on representations of the marketing organisation and contemporary issues in marketing theory
