Critical Terms For Religious Studies:

Critical Terms for Religious Studies, Second Edition Sarah Hammerschlag, 2025-05-21 A new edition of a classic resource composed of twenty three essays written specifically for this volume First published nearly thirty years ago Critical Terms for Religious Studies proved a vital resource for an emerging interdisciplinary conversation. We still use much of the same language in the study of religion but fresh concerns have both changed the meaning of terms and given rise to new terms altogether This edition consists of twenty three entirely new essays that offer students and scholars alike the tools to historicize and evaluate the shifting role of familiar and emerging critical terms in religious studies These are critical terms both because they are important in our cultural moment and because thinking through them reveals how religions are embedded in and shaped by material social economic and political forces A shared conviction unites contributors from a range of traditions and methodologies a recognition that our world is saturated by the persistence of religious traditions as shape shifting not static or transcendent forces of authority as powerful today as ever before **Critical Terms for Religious Studies** Mark C. Taylor, 2013-07-09 A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world Wherever one looks today from headlines about political turmoil in the Middle East to pop music and videos one cannot escape the pivotal role of religious beliefs and practices in shaping selves societies and cultures Following in the very successful tradition of Critical Terms for Literary Studies and Critical Terms for Art History this book attempts to provide a revitalized self aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight These essays adopt the approach that has won this book s predecessors such widespread acclaim each provides a concise history of a critical term explores the issues raised by the term and puts the term to use in an analysis of a religious work practice or event Moving across Judaism Christianity Hinduism Buddhism Islam and Native American and Mayan religions contributors explore terms ranging from experience territory and image to God sacrifice and transgression The result is an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines including anthropology sociology psychology cultural studies gender studies and literary studies Critical Terms for the Study of Buddhism Donald S. Lopez Jr., 2009-11-15 Over the past century Buddhism has come to be seen as a world religion exceeding Christianity in longevity and according to many philosophical wisdom Buddhism has also increasingly been described as strongly ethical devoted to nonviolence and dedicated to bringing an end to human suffering And because it places such a strong emphasis on rational analysis Buddhism is considered more compatible with science than the other great religions As such Buddhism has been embraced in the West both as an alternative religion and as an alternative to religion This volume

provides a unique introduction to Buddhism by examining categories essential for a nuanced understanding of its traditions Each of the fifteen essays here shows students how a fundamental term from art to word illuminates the practice of Buddhism both in traditional Buddhist societies and in the realms of modernity Apart from Buddha the list of terms in this collection deliberately includes none that are intrinsic to the religion Instead the contributors explore terms that are important for many fields and that invite interdisciplinary reflection Through incisive discussions of topics ranging from practice power and pedagogy to ritual history sex and death the authors offer new directions for the understanding of Buddhism taking constructive and sometimes polemical positions in an effort both to demonstrate the shortcomings of assumptions about the religion and the potential power of revisionary approaches Following the tradition of Critical Terms for Religious Studies this volume is not only an invaluable resource for the classroom but one that belongs on the short list of essential books for anyone seriously interested in Buddhism and Asian religions **Methodology in Religious Studies** Arvind Sharma, 2002-09-26 Explores the impact of women's studies on methodology in religious studies Religious Studies, Theology, and the University Linell E. Cady, Delwin Brown, 2002-10-10 This collection explores the highly contested relationship of religious studies and theology and the place of each if any in secular institutions of higher education The founding narrative of religious studies with its sharp distinction between teaching religion and teaching about religion grows less compelling in the face of globalization and the erosion of modernism These essays take up the challenge of thinking through the identity and borders of religious studies and theology for our time Reflecting a broad range of positions the authors explore the religious secular conceptual landscape that has dominated the modern West and in the process address the revision of the academic study of religion and theology now underway

Interreligious Comparisons in Religious Studies and Theology Perry Schmidt-Leukel, Andreas Nehring, 2016-07-14 Can religions be compared For decades the discipline of religious studies was based on the assumption that they can Postmodern and postcolonial reflections however raised significant doubts In social and cultural studies the investigation of the particular often took precedence over a comparative perspective Interreligious Comparisons in Religious Studies and Theology questions whether religious studies can survive if it ceases to be comparative religion Can it do justice to a globalized world if it is limited on the specific and turns a blind eye on the general While comparative approaches have come under strong pressure in religious studies they have started flourishing in Theology Comparative theology practices interfaith dialogue by means of comparative research This volume asks whether theology and religious studies are able to mutually benefit from their critical and constructive reflections Can postcolonial criticism of neutrality and objectivity in religious studies create new links with the decidedly perspectival approach of comparative theology In this collection scholars from theology and religious studies discuss the methodology of interreligious comparison in the light of recent doubts and current objections Together with the contributors Perry Schmidt Leukel and Andreas Nehring argue that after decades of critique interreligious comparison deserves to be

reconsidered reconstructed and reintroduced New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future Intellectual History of Key Concepts Gregory Adam Scott, Stefania Travagnin, 2020-05-05 The three volume approaches project Concepts and Methods for the Study of Chinese Religions is a timely review of the history of the study of Chinese religions reconsiders the present state of analytical and methodological theories and initiates a new chapter in the methodology of the field itself The three volumes raise interdisciplinary and cross tradition debates and engage methodologies for the study of East Asian religions with Western voices in an active and constructive manner Within the overall project this volume addresses the intellectual history and formation of critical concepts that are foundational to the Chinese religious landscape These concepts include lineage scripture education discipline religion science and scientism sustainability law and rites and the religious sphere With these topics and approaches this volume serves as a reference for graduate students and scholars interested in Chinese religions the modern cultural and intellectual history of China including mainland China Taiwan Hong Kong and Chinese communities overseas intellectual and material history and the global academic discourse of critical concepts in the study of religions **Religion: Empirical Studies** Steven J. Sutcliffe, 2017-03-02 Treating religion as a fully social cultural historical and material field of practice this book presents a series of debates and positions on the nature and purpose of the Study of Religious Studies Offering an introductory guide to this influential and politically relevant academic field the contributors illustrate the diversity and theoretical viability of qualitative empirical methodologies in the study of religions The historical and cultural circumstances attending the emergence defence and future prospects of Religious Studies are documented drawing on theoretical material and case studies prepared within the context of the British Association for the Study of Religions BASR and making frequent reference to wider European North American and other international debates and critiques **Culture and Dialogue** Gerald Cipriani, 2013-07-16 Vol 3 No 1 of Culture and Dialogue is a Special Issue in many ways This issue marks the takeover by a new publisher Because of contractual constraints and practical reasons the decision was made to continue our journey with Cambridge Scholars Publishing whose great enthusiasm foreshadows a bright future for the journal Our words of thanks however must also go to Airiti Press without which the journal would not have seen the light of day We are indebted to Airiti Press for having invested into the launch of a new journal with all the risks entailed and for their dedicated hard work We are

most grateful for this The Journal was officially launched in March 2011 and has since produced four issues all of which focusing on a particular facet of dialogical practice within the field of culture be it philosophy art or politics Forthcoming issues will offer platforms to explore how dialogue impacts on the shaping of identity aesthetic meaning and historical significance One issue will also be devoted to how dialogue manifests itself in language This brings us to autumn 2015 after which other pressing themes will no doubt be proposed and treated In whatever case the thread remains the cultural forms of dialogue many of us know how critical ignorance about the nature of the dialogue can be in all fields at all levels Argentinian poet Antonio Porchia once wrote that To be someone is solitude Any self felt genius or world leading mortal will identify with this The solitude at stake is that of the one who fails to link with others or an Other by denying the possibility to relinguish some of him or herself In fact the true someone is never alone the true someone never leads This is the message Culture and Dialogue is striving to convey express or analyse in its various forms across the humanities the arts and the social sciences Besides the Journal has always sought when possible to preserve a certain spirit of writing in addition to academic rigour and creativity a spirit that is undeniably fading in the midst of the publish or perish ethos adopted by advanced techno capitalist systems of education in some parts of the world Vol 3 No 1 is a Special Issue devoted to the theme of religion and dialogue Cosimo Zene of the School of Oriental and African Studies of the University of London kindly accepted our invitation to be the Guest Editor and our words of thanks must first go to him Cosimo has managed to bring together a range of outstanding essays of which the Journal can only be proud To various degrees and in different ways all essays discuss dialogue and religion or show dialogue at work in religious studies We are most grateful to all the authors who generously contributed to this Special Issue and therefore to the life of the Journal in alphabetical order T H Barrett Stephen Chan Jan Peter Hartung S an Hawthorne Catherine Heszer Tullio Lobetti Theodore Proferes and Cosimo Zene Religious **Studies** Gregory D. Alles, 2010-03 Drawing on recent developments in the comparative study of religion this book explores the trends of the past sixty years from a global perspective Each of the ten chapters covers the study of religion in a different region of the world from Europe and the Americas to Asia and the Far East Topics covered include local background to the study of religions formation of religious studies in the region important thinkers and writings institutions interregional diversity and interregional connections emerging issues This book is a major contribution to the field of religious studies and Religious Intimacies Mary Dunn, Brenna a valuable reference for scholars researchers and graduate students Moore, 2020-11-03 An essay collection that demonstrates how emotional ties and intimate affiliations remain critical to the dimensions of modern Christianity Scholars of religion have come a long way since William James famously made of religion a matter between man and his maker For decades now they have been attentive to the ways in which religion takes shape as the product of broad social forces focusing on the dynamics of power and culture as heuristics for understanding religious phenomena and experience What however might they be missing by moving too quickly from one interpretative extreme to

the other and what might we learn about religion by staying in the interstitial space between the individual in her solitude and society as a whole Religious Intimacies edited by Mary Dunn and Brenna Moore brings together nine scholars of modern Christianity to probe this in between space In essays that range from treatments of Jesuit indigenous relations in early modern Canada to the erotics of contemporary black theology each contributor makes the case for the study of the presence and power of affective ties and relational dynamics between friends lovers and intimate others even things as vital to the understanding of religion These thoughtful and probing essays convincingly show that ties built upon affect family and shared convictions have continued to inform lived religious experience in modern times and shape western Christianity in significant sometimes surprising ways Jodi Bilinkoff University of North Carolina at Greensboro A rich collection of essays that use intimate relationships to chart a course between solitude and society Tamsin Jones Trinity College Experience of Atheism: Phenomenology, Metaphysics and Religion Claude Romano, Robyn Horner, 2021-05-06 Religious and atheistic belief are presented anew in a volume of essays from leading phenomenologists in both France and the UK Atheism often presented as the negation of religious belief is here engaged with from a phenomenologically informed notion of experience The focus on experience sparks new debates in readings of belief faith and atheism as they relate to and complicate each other What unites the contributors is their relationship to phenomenology as it has developed in France in the wake of Heidegger and Husserl Leading French intellectuals from this context Jean Luc Nancy Quentin Meillassoux and Catherine Malabou amongst others contribute arresting ideas on atheistic faith the death of God and anarchic faith opening up new areas of understanding in a field whose parameters and core concepts are ever shifting Revealing the extent to which religious and atheistic belief must be seen to influence and on a fundamental level to co create one another the pluralistic society in which religious belief is counted as one option amongst many is given primacy. The fact that religious faith has become not only optional but also in many contexts strangely alienated from society deeply modifies the experience of the believer as much as that of the non believer A focus on experience over and above belief moves us towards a mode of experiential knowledge which refuses to privilege the atheistic believer and deride the reality of religious belief

Reinventing Religious Studies Scott S. Elliott, 2014-10-20 Reinventing Religious Studies offers readers an opportunity to trace the important trends and developments in Religious Studies over the last forty years Over this time the study of religion has been transformed into a critical discipline informed by a wide range of perspectives from sociology to anthropology politics to material culture and economics to cultural theory Reinventing Religious Studies brings together key writings which have helped shape scholarship teaching and learning in the field All the essays are drawn from the CSSR Bulletin a provocative occasionally irreverent and always critical journal which has long been at the centre of debates in Religious Studies This collection will prove invaluable for students and scholars of theory and method in Religious Studies It offers readers a unique opportunity to understand the history of key issues in the study of religion and what remains central to the

study of religion today Visions of Religion Stephen S. Bush, 2014 Winner of the Gustave O Arlt Award in the Humanities Three understandings of the nature of religion religion as experience symbolic meaning and power have dominated scholarly discussions in succession for the past hundred years Proponents of each of these three approaches have tended to downplay ignore or actively criticize the others But why should the three approaches be at odds Religion as it is practiced involves experiences meanings and power so students of religion should attend to all three Furthermore theorists of religion should have an account that carefully conceptualizes all three aspects without regarding any of them as more basic than the others Visions of Religion provides just such an account Stephen S Bush examines influential proponents of the three visions arguing that each approach offers substantial and lasting contributions to the study of religion although each requires revision Bush rehabilitates the concepts of experience and meaning two categories that are much maligned these days In doing so he shows the extent to which these categories are implicated in matters of social power As for power the book argues that the analysis of power requires attention to meaning and experience Visions of Religion accomplishes all this by articulating a social practical theory of religion that can account for all three aspects even as it incorporates them into a The Discipline of Religion Russell T. McCutcheon, 2003-12-08 The Discipline of Religion is a single theoretical framework lively critical journey through religious studies today looking at its recent growth as an academic discipline and its contemporary political and social meanings Focusing on the differences between religious belief and academic religious discourse Russell T McCutcheon argues that the invention of religion as a discipline blurs the distinction between criticism and doctrine in its assertion of the relevance of faith as a credible object of study In the leap from disciplinary criticism to avowal of actual cosmic and moral meaning schools of religious studies extend their powers far beyond universities and into the everyday lives of those outside managing and curtailing specific types of speech and dissent Religious Studies: The Key Concepts Carl Olson, 2010-09-28 An accessible A Z resource defining and explaining key terms and ideas central to the study of religion Exploring broad and recurring themes which are applicable in both eastern and western religions cross cultural examples are provided for each term to give a comprehensive overview of the subject *Musicology of Religion Guy* L. Beck, 2023-05-01 For generations religion and music have been regarded as universals yet despite the fact that they have been frequently linked throughout history and topography and despite the importance of music in the early stages of religious studies their combined presence has not until now been considered a separate area of study and research While there are well developed fields of anthropology of religion psychology of religion and philosophy of religion the widely recognized connections between religion and sound chant and music warrant comparable study Drawing upon theories and methods in the study of both religion and music referencing examples from world religious traditions and addressing challenges posed by critics this book envisions a unified field for religion and music musicology of religion Grounded in the scope and methods of phenomenology and comparative analysis musicology of religion represents an innovative direction in

interdisciplinary study enriched by the social sciences ethnomusicology philosophy theology liturgical studies and cognitive studies As conceived musicology of religion will spearhead new and creative paths in the study of religion Nonreligion in Late Modern Societies Anne-Laure Zwilling, Helge Årsheim, 2022-06-14 This volume presents results from new and ongoing research efforts into the role of nonreligion in education politics law and society from a variety of different countries Featuring data from a wide range of quantitative and qualitative studies the book exposes the relational dynamics of religion and nonreligion Firstly it highlights the extent to which nonreligion is defined and understood by legal and institutional actors on the basis of religions and often replicates the organisation of society and majority religions At the same time it displays how essential it is to approach nonreligion on its own by freeing oneself from the frameworks from which religion is thought The book addresses pressing questions such as How can nonreligion be defined and how can the nones be grasped and taken into account in studies on religion How does the sociocultural and religious backdrop of different countries affect the regulation and representation of nonreligion in law and policymaking Where and how do nonreligious individuals and collectives fit into institutions in contemporary societies How does nonreligion affect notions of citizenship and national belonging Despite growing scholarly interest in the increasing number of people without religion the role of nonreligion in legal and institutional settings is still largely unexplored This volume helps fill the gap and will be of interest to students researchers policymakers and others seeking deeper understanding of the changing role of nonreligion in modern societies

Religion in 50 More Words Aaron W. Hughes, Russell T. McCutcheon, 2021-11-29 Religion in 50 More Words A Redescriptive Vocabulary provides a succinct historical social and political examination of some of the key words used in the modern study of religion Differing from the first volume s more theoretical focus this volume analyzes more common first order descriptive terms that are used throughout the field inviting readers to theorize their traditional vocabulary Topics covered include Atheism Theism Conversion Cult Evil Fundamentalism Idol Magic Pilgrimage Ritual Sacrifice Religion in 50 More Words submits such terms to a critical interrogation and subsequent redescription This paves the way for a collective and more critical reframing of the field The volume along with Religion in 50 Words provides an indispensable resource for students and academics working in the field of religious studies and cognate disciplines
