Landmark Essays on Rhetorical Criticism Thomas W. Benson,2020-08-18 This book is an anthology of landmark essays in rhetorical criticism In historical usage a landmark marks a path or a boundary as a metaphor in social and intellectual history landmark signifies some act or event that marks a significant achievement or turning point in the progress or decline of human effort In the history of an academic discipline the historically established senses of landmark are mixed together

jostling to set out and protect the turfmarkers of academic specialization aligning footnotes to signify the beacons that have guided thought and against these conservative tendencies attempting to contribute fresh insights that tempt others along new trails The editor has chosen essays for this collection that give some sense of the history of rhetorical criticism in this century especially as it has been practiced in the discipline of speech communication He also emphasizes materials that may illustrate where the discipline conceives itself to be going how it has marked its boundaries how it has established beacons to invite safety or warn us from the rocks and how it has sought to preserve a tradition by subjecting it to constant revision and struggle In the hope of providing some coherence the scope of this collection is limited to rhetorical criticism as it has been practiced and understood within the discipline of speech communication in North America in this century Literary Darwinism Joseph Carroll,2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

The Library of Literary Criticism of English and American Authors: 1875-1890 Charles Wells Moulton,1904 **Essays and Criticism** St. George Jackson Mivart,1892 *The Development of Evolutionary Genetics* Prakash Gorroochurn,2024-12-28 The books describes the historical development of evolutionary genetics starting from early ideas on evolution and ending with the modern synthesis It provides an extensive coverage of the history of both evolution and heredity and gives detailed descriptions of the works of Lamarck Darwin Mendel N ageli Weismann de Vries Galton Pearson Bateson Johannsen Morgan Fisher Wright and Haldane amongst many others The book does not deal only with a description of historical work it also analyses and critiques existing theories and evolutionary beliefs throughout history and discusses several controversies between biologists *A History and Critique of Methodological Naturalism* Joseph B. Onyango Okello,2016-07-21 Methodological naturalism is the thesis that only natural features can be factored into any legitimate explanation Moreover the thesis contends any attempt to explain natural phenomena by appealing to supernatural features is unscientific and therefore illegitimate This book argues that nothing inherently problematic afflicts possible appeals to supernatural agency in the attempt to explain select phenomena in nature Reputable philosophers of the ancient and medieval periods as well as prominent scientists of the early modern era invoked supernatural agency in their attempts to understand nature For them miraculous interventions in nature by a supernatural agent were not unreasonable However the super naturalistic worldview has been replaced by methodological naturalism The assumptions of two pivotal figures David Hume and Charles Darwin brought about this change This book shows that this change was motivated by unscientific means Hence the change itself remains inconsistent with the assumptions of methodological naturalism The Quarterly Review ,1915 **The Evolution of Charles Darwin** George Amos Dorsey,1927 **[The correspondence] ; The correspondence of Charles Darwin. 8. 1860** Charles Darwin,1993 **The Cambridge History of Literary Criticism: Volume 6, The Nineteenth Century, c.1830-1914** M. A. R. Habib,2013-02-07 In the nineteenth century literary criticism first developed into an autonomous professional discipline in the universities This volume provides a comprehensive and

authoritative study of the vast field of literary criticism between 1830 and 1914 In over thirty essays written from a broad range of perspectives international scholars examine the growth of literary criticism as an institution and the major critical developments in diverse national traditions and in different genres as well as the major movements of Realism Naturalism Symbolism and Decadence The History offers a detailed focus on some of the era s great critical figures such as Sainte Beuve Hippolyte Taine and Matthew Arnold and includes essays devoted to the connections of literary criticism with other disciplines in science the arts and Biblical studies The publication of this volume marks the completion of the monumental Cambridge History of Literary Criticism from antiquity to the present day **Magical Criticism** Christopher

Bracken,2008-09-15 During the Enlightenment Western scholars racialized ideas deeming knowledge based on reality superior to that based on ideality Scholars labeled inquiries into ideality such as animism and soul migration savage philosophy a clear indicator of the racism motivating the distinction between the real and the ideal In their view the savage philosopher mistakes connections between signs for connections between real objects and believes that discourse can have physical effects in other words they believe in magic Christopher Bracken s Magical Criticism brings the unacknowledged history of this racialization to light and shows how even as we have rejected ethnocentric notions of the savage they remain active today in everything from attacks on postmodernism to Native American land disputes Here Bracken reveals that many of the most influential Western thinkers dabbled in savage philosophy from Marx Nietzsche and Proust to Freud C S Peirce and Walter Benjamin For Bracken this recourse to savage philosophy presents an opportunity to reclaim a magical criticism that can explain the very real effects created by the discourse of historians anthropologists philosophers the media and governments **More Criticisms on Darwin, and Administrative Nihilism** Thomas Henry Huxley,1872 **The Origins**

of Nursery Education Kevin J. Brehony,2024-08-01 This book illustrates how texts of German educationist Friedrich Froebel and those of his interpreters were read in England and what consequences these readings had for the education of young children in nursery and infant schools during the nineteenth century
