Criticizing Photographs Terry Barrett 5th Edition:

Criticizing Photographs Terry Barrett, 2020-11-29 Emphasizing the understanding of images and their influences on how they affect our attitudes beliefs and actions this fully updated sixth edition offers consequential ways of looking at images from the perspectives of photographers critics theoreticians historians curators and editors It invites informed conversations about meanings and implications of images providing multiple and sometimes conflicting answers to questions such as What are photographs Should they be called art Are they ethical What are their implications for self society and the world From showing how critics verbalize what they see in images and how they persuade us to see similarly to dealing with what different photographs might mean the book posits that some interpretations are better than others and explains how to deliberate among competing interpretations It looks at how the worth of photographs is judged aesthetically and socially offering samples and practical considerations for both studio critiques for artists and professional criticism for public audiences This book is a clear and accessible guide for students of art history photography and criticism as well as anyone interested in carefully looking at and talking about photographs and their effects on the world in which we live *The Public Image* Robert Hariman, John Louis Lucaites, 2016-11-07 Even as the media environment has changed dramatically in recent years one thing at least remains true photographs are everywhere From professional news photos to smartphone selfies images have become part of the fabric of modern life And that may be the problem Even as photography bears witness it provokes anxieties about fraudulent representation even as it evokes compassion it prompts anxieties about excessive exposure Parents and pundits alike worry about the unprecedented media saturation that transforms society into an image world And yet a great news photo can still stop us in our tracks and the ever expanding photographic archive documents an era of continuous change By confronting these conflicted reactions to photography Robert Hariman and John Louis Lucaites make the case for a fundamental shift in understanding photography and public culture In place of suspicions about the medium's capacity for distraction deception and manipulation they suggest how it can provide resources for democratic communication and thoughtful reflection about contemporary social problems The key to living well in the image world is to unlock photography from viewing habits that inhibit robust civic spectatorship Through insightful interpretations of dozens of news images *The Public Image* reveals how the artistry of the still image can inform challenge and guide reflection regarding endemic violence environmental degradation income inequity and other chronic problems that will define the twenty first century By shifting from conventional suspicions to a renewed encounter with the image we are challenged to see more deeply on behalf of a richer life for all and to acknowledge our obligations as spectators who are crucially also citizens

Unequal Neighbors Kristen Hill Maher, David Carruthers, 2021-04-02 San Diego and Tijuana are the site of a national border enforcement spectacle but they are also neighboring cities with deeply intertwined histories cultures and economies In *Unequal Neighbors* Kristen Hill Maher and David Carruthers shift attention from the national border to a local one examining the role of place stigma in reinforcing actual and imagined inequalities between these cities Widespread bordered imaginaries in San Diego represent it as a place of economic vitality safety and order while stigmatizing Tijuana as a zone of poverty crime and corruption These dualisms misrepresent complex realities on the ground but they also have real material effects the vision of a local border benefits some actors in the region while undermining others Based on a wide range of original empirical materials the book examines how asymmetries between these cities have been produced and reinforced through stigmatizing representations of Tijuana in media everyday talk economic relations and local tourism discourse and practices However both place stigma and borders are subject to contestation and the book also examines debordering practices and counter narratives about Tijuana's image While the details of the book are particular to this corner of the world the kinds of processes it documents offer a window into the making of unequal neighbors more broadly The dynamics at the Tijuana border present a framework for understanding how inequalities that manifest in cultural practices produce asymmetric borders between places
