Cross Disciplinary Perspectives On Lexical Blending Trends In Linguistics:

Cross-Disciplinary Perspectives on Lexical Blending Vincent Renner, François Maniez, Pierre Arnaud, 2012-12-19 The volume brings together a well selected collection of twelve articles providing a comprehensive and very informative summary of contemporary work on lexical blending It combines theoretically informed descriptions of a variety of languages and a number of contributions with a theoretically original focus It is the first book of its kind on the subject and because of its cross disciplinary nature it is of high relevance not only to word formation scholars and students but also to a wide readership within the linguistics community *Crossing Languages to Play with Words* Sebastian Knospe, Alexander Onysko, Maik Goth, 2016-09-26 Wordplay involving several linguistic codes is an important modality of ludic language This volume offers a multidisciplinary approach to the topic discussing examples from different epochs genres and communicative situations The contributions illustrate the multi dimensionality linguistic make up and the special interactive potential of wordplay across linguistic and cultural boundaries including the challenging practice of translation **Blending, from English to Arabic** Ekhlās Ali Mohsin, 2021-07-05 This book examines the interesting linguistic phenomenon of blending where new words are formed to enrich the lexicon of a language Blending in English has been thoroughly investigated to the extent that researchers and scholars refer to the results of these investigations when discussing this phenomenon in their respective languages This book builds on existing studies by investigating blending in Arabic and adopts a linguistic systematic and quantitative approach to discussing and analysing this process It presents practical findings and prepares the road for further investigation in this field **Expanding the Lexicon** Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-Froemel, 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks focusing on either system internal or system external aspects from which no comprehensive view has emerged The volume aims to fill this gap by studying dynamic processes in the lexicon understood in a wide sense as not being necessarily limited to the word level by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse related factors The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers motivations for innovating Moreover the diffusion and conventionalization of innovations will be addressed In this way the volume contributes to understanding the complex interplay of structural cognitive and functional factors in the lexicon as a highly dynamic domain Analogy and Contrast in Language Karolina Krawczak, Barbara Lewandowska-Tomaszczyk, Marcin Grygiel, 2022-10-15 Within cognitive and functional approaches to language structure and grammaticality analogy and contrast represent two fundamental human cognitive capacities which up to now have mostly been examined separately This volume seeks to bridge that gap and in doing so it brings together cutting edge theoretical and empirical research in the field The chapters in this

book examine analogy and contrast across a variety of languages English Finnish Hungarian Polish Russian for different language phenomena constructions lexical semantics morphology sentence structure text organization and with the use of various methods corpus linguistics discourse analysis experimental methods qualitative analysis quantitative analysis This state of the art research presented in the book should be of interest to specialists within Cognitive Linguistics corpus linguistics construction grammar discourse analysis translation studies metaphor research and cross cultural research

Journal of Linguistics ,2013 **Compounding in Modern Greek** Angela Ralli,2012-10-29 One of the core challenges in linguistics is elucidating compounds their formation as well as the reasons their structure varies between languages This book on Modern Greek rises to the challenge with a meticulous treatment of its diverse intricate compounds a study as grounded in theory as it is rich in data Enhancing our knowledge of compounding and word formation in general its exceptional scope is a worthy model for linguists particularly morphologists and offers insights for students of syntax phonology dialectology and typology among others The author examines first tier themes such as the order and relations of constituents headedness exocentricity and theta role saturation She shows how Modern Greek compounding relates to derivation and inflection and charts the boundaries between compounds and phrases Exploring dialectically variant compounds and identifying historical changes the analysis extends to similarly formed compounds in wholly unrelated languages **The Oxford Handbook of Linguistic Analysis** Bernd Heine,Heiko Narrog,2015 This handbook compares the main analytic frameworks and methods of contemporary linguistics It offers a unique overview of linguistic theory revealing the common concerns of competing approaches By showing their current and potential applications it provides the means by which linguists and others can judge what are the most useful models for the task in hand Distinguished scholars from all over the world explain the rationale and aims of over thirty explanatory approaches to the description analysis and understanding of language Each chapter considers the main goals of the model the relation it proposes from between lexicon syntax semantics pragmatics and phonology the way it defines the interactions between cognition and grammar what it counts as evidence and how it explains linguistic change and structure The Oxford Handbook of Linguistic Analysis offers an indispensable guide for everyone researching any aspect of language including those in linguistics comparative philology cognitive science developmental philology cognitive science developmental psychology computational science and artificial intelligence This second edition has been updated to include seven new chapters looking at linguistic units in language acquisition conversation analysis neurolinguistics experimental phonetics phonological analysis experimental semantics and distributional typology **Linguistics and Language Behavior Abstracts** ,2008 **Lexical Blending. Analysis of blends found in magazines according to the typology of** Adrienne Lehrer and Elke Ronneberger-Sibol Thea Resbot,2018-02-05 Seminar paper from the year 2015 in the subject English Language and Literature Studies Linguistics grade 1 7 University of Potsdam language English abstract This research paper deals with the topic of lexical blending There

newly created words through this process of word formation are called blends or hybrids or portmanteau words. The latter was popularized in Lewis Carroll's poem *Through the Looking Glass* in which he for example describes a frabjous day a day that is both fabulous and joyous. One of the first blends known of which is still in our vocabulary is the word *smash*. It is a blend of *smack* and *mash* which is known since early 1700. *Smash* is a perfect example of a blend that is very well integrated into the modern Standard English. Therefore most likely most people would not have defined it as a blend. So this example indicates that it is sometimes difficult to identify a word as a blend and moreover to identify its constituents. **Current**

Trends in Contrastive Linguistics María de los Ángeles Gómez González, J. Lachlan Mackenzie, Elsa M. González Álvarez, 2008-12-17 This book examines the contribution of various recent developments in linguistics to contrastive analysis. The articles range across a broad gamut of languages with most attention going to the languages of Europe. They show how advances in theory and computer technology are together impacting the field of contrastive linguistics. Part I focuses from a broadly functional cognitive viewpoint on the close link with typology stressing the importance of embedding the treatment of grammatical categories in their contexts of use. Part II turns to methodological issues exploring the enormous potential offered by parallel computer accessible corpora to contrastive linguistics and to enhancing the testability, authenticity and empirical adequacy of cross linguistic studies. Part III is concerned with contrastive semantics ranging from individual items to entire grammatical constructions and shows how meanings are coupled to language specific cognitive strategies and even to cultural differences in subjective awareness and the fashioning of personal identity. **Text and Context** Claire Kramsch, Sally McConnell-Ginet, 1992 *Lexis in Contrast* Bengt Altenberg, Sylviane Granger, 2002 This work explores recent trends in cross linguistic lexical studies. Topics include lexis and contrastive linguistics, the revival of contrastive linguistics, multilingual corpora, theoretical and methodological issues and types of cross linguistic correspondence.

Blends. A creative means of word-formation Carmen Peresich, 2015-01-21 Seminar paper from the year 2014 in the subject English Language and Literature Studies Linguistics grade 1 Klagenfurt University Institut für Anglistik und Amerikanistik course Topics in Linguistics Syntax and Morphology language English abstract Blending is anything but a new phenomenon in the English language. This is proven by the fact that the word *brunch* which is one of the most widely known blends was first recorded in 1896 more than 100 years ago. Quinion 2014. However only over the last couple of decades has blending become a very popular word formation process. Today in the English lexicon a large number of blends can be found which are no longer recognized as such since they have been in everyday use for quite a long time. Katamba 1994: 184. This can be explained by the fact that blends tend to be abbreviations in the beginning and due to their word-like appearance are lexicalized over time. Hadjemetovi Jurida 2006: 283. Although blending plays a significant role in terms of word formation it is hardly mentioned in monographs focusing on this particular aspect of morphology. This paper aims to explore the rules that determine the creation of blends as well as to have a closer look on two ways of categorizing them. *New Approaches to*

Contrastive Linguistics Renata Enghels, Bart Defrancq, Marlies Jansegers, 2020-07-20 The practice of comparing languages has a long tradition characterized by a cyclic pattern of interest Its meeting with corpus linguistics in the 1990s has led to a new sub discipline of corpus based contrastive studies The present volume tackles two main challenges that had not yet been fully addressed in the literature namely an empirical assessment of the nature of the data commonly used in cross linguistic studies e g translation data versus comparable data and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings The papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions Answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels In sum this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research within this field

The Lexical Typology of Semantic Shifts Päivi Juvonen, Maria Koptjevskaja-Tamm, 2016-08-08 The volume focuses on semantic shifts and motivation patterns in the lexicon Its key feature is its lexico typological orientation i e a heavy emphasis on systematic cross linguistic comparison The book presents current theoretical and methodological trends in the study of semantic shifts and motivational patterns based on an abundance of empirical findings across genetically areally and typologically diverse languages

Aspects of Linguistic Variation Daniël Olmen, Tanja Mortelmans, Frank Brisard, 2018-12-03 Linguistic variation is a topic of ongoing interest to the field Its description and its explanations continue to intrigue scholars from many different backgrounds By taking a deliberately broad perspective on the matter covering not only crosslinguistic and diachronic but also intralinguistic and interspeaker variation and examining phenomena ranging from negation over connectives to definite articles in well and lesser known languages the volume furthers our understanding of variation in general The papers offer new insights into among other things the theoretical notion of comparative concepts the social or mental nature of language structure the areal factor in lexical typology and the diachronic implications of semantic maps The collection will thus be of relevance to typologists and historical linguists as well as to people studying variation within the areas of cognitive and functional linguistics

Advances in Corpus-based Contrastive Linguistics Karin Aijmer, Bengt Altenberg, 2013-03-13 Contrastive studies have experienced a dramatic revival in the last decades By combining the methodological advantages of computer corpus linguistics and the possibility of contrasting texts in two or more languages the structure and use of languages can be explored with greater accuracy detail and empirical strength than before The approach has also proved to have fruitful practical applications in a number of areas such as language teaching lexicography translation studies and computer aided translation This volume contains twelve studies comparing linguistic phenomena in English and seven other languages The topics range from comparisons of specific lexical categories and word combinations to syntactic constructions and discourse

phenomena such as cohesion and thematic structure The studies highlight similarities and differences in the use semantics and functions of the compared items as well as the emergence of new meanings and language change The emphasis varies from purely linguistic studies to those focusing on practical applications **New Perspectives on Lexical Borrowing** Eline Zenner, Gitte Kristiansen, 2014 This volume aims to broaden the focus of existing loanword research which has mainly been conducted from a systemic and structuralist perspective The eight studies in this volume introduce onomasiological phraseological and methodological innovations to the study of lexical borrowing These new perspectives significantly enhance our understanding of lexical borrowing and provide new insights into contact induced variation and change
