Crowd Study Popular Mind:

The Crowd Gustave Le Bon, 2017-07-12 Gustave Le Bon's *The Crowd* is not only a classic but one of the best selling scientific books in social psychology and collective behavior ever written. Here Le Bon analyzes the nature of crowds and their role in political movements. He presents crowd behavior as a problem of science and power, a natural phenomenon with practical implications. Originally published in 1895, Le Bon's was the first to expand the scope of inquiry beyond criminal crowds to include all possible kinds of collective phenomena. Its continuing significance is evident even in the Los Angeles riots of 1992 in which Le Bon's theories were cited in testimony. Le Bon emphasizes the various areas of modern life where crowd behavior holds sway, particularly political upheavals. He focuses on electoral campaigns, parliaments, juries, labor agitation, and street demonstrations. At the same time, his treatment of crowds is far from complimentary. He likens crowds to primitive beings, social formations barking back to the evolutionary origins of humankind. Le Bon believed that ideas and images spread through a crowd by means of contagion, an automatic process that produces a state of transitory madness in its victims, extinguishing reason and will. Yet he does more than dwell on the pathologies of crowd life; he also writes of the heroism, the generosity, and the sacrifices of crowds, of the indispensable roles they have played in erecting the pillars of modern civilization. In a new introduction to this edition, Robert Nye presents a broad analytical understanding of the relationship between power and knowledge in crowd theory. He also discusses the historical circumstances and the various personalities who have shaped our understanding of crowds. Nye emphasizes *The Crowd*'s continuing usefulness to cultural historians, psychologists, sociologists, and political scientists. He also places Le Bon in a rich tradition of European social theory.

The Crowd Gustave Le Bon, 1908-01-01 This work is devoted to an account of the characteristics of crowds. The whole of the common characteristics with which heredity endows the individuals of a race constitute the genius of the race. When however a certain number of these individuals are gathered together in a crowd for purposes of action, observation proves that from the mere fact of their being assembled there result certain new psychological characteristics which are added to the racial characteristics and differ from them at times to a very considerable degree. Organised crowds have always played an important part in the life of peoples but this part has never been of such moment as at present. The substitution of the unconscious action of crowds for the conscious activity of individuals is one of the principal characteristics of the present age. I have endeavoured to examine the difficult problem presented by crowds in a purely scientific manner that is by making an effort to proceed with method and without being influenced by opinions, theories and doctrines. This I believe is the only mode of arriving at the discovery of some few particles of truth especially when dealing as is the case here with a question that is the subject of impassioned controversy. A man of science bent on verifying a phenomenon is not called upon to concern himself with the interests his verifications may hurt.

The Crowd Gustave Le Bon,2014-01 In this fascinating book Gustave Le Bon examines the psychology of crowds He posits that crowds have personalities just like individuals and that individuals change when part of a crowd The most careful observations seem to prove that an individual immersed for some length of time in a crowd in action soon finds himself either in consequence of the magnetic influence given out by the crowd or from some other cause of which we are ignorant in a special state which much resembles the state of fascination in which the hypnotized individual finds himself in the hands of the hypnotizer The activity of the brain being paralysed in the case of the hypnotized subject the latter becomes the slave of all the unconscious activities of his spinal cord which the hypnotizer directs at will The conscious personality has entirely vanished will and discernment are lost All feelings and thoughts are bent in the direction determined by the hypnotizer This edition has been completely reset in fresh type
