*DIY Citizenship* Matt Ratto, Megan Boler, 2014-02-07 How social media and DIY communities have enabled new forms of political participation that emphasize doing and making rather than passive consumption Today DIY do it yourself describes more than self taught carpentry Social media enables DIY citizens to organize and protest in new ways as in Egypt s Twitter revolution of 2011 and to repurpose corporate content or create new user generated content in order to offer political counternarratives This book examines the usefulness and limits of DIY citizenship exploring the diverse forms of political participation and critical making that have emerged in recent years The authors and artists in this collection describe DIY citizens whose activities range from activist fan blogging and video production to knitting and the creation of community gardens Contributors examine DIY activism describing new modes of civic engagement that include Harry Potter fan activism and the activities of the Yes Men They consider DIY making in learning culture hacking and the arts including do it yourself media production and collaborative documentary making They discuss DIY and design and how citizens can unlock the black box of technological infrastructures to engage and innovate open and participatory critical making And they explore DIY and media describing activists efforts to remake and reimagine media and the public sphere As these chapters make clear DIY is characterized by its emphasis on doing and making rather than passive consumption DIY citizens assume active roles as interventionists makers hackers modders and tinkerers in pursuit of new forms of engaged and participatory democracy Contributors Mike Ananny Chris Atton Alexandra Bal Megan Boler Catherine Burwell Red Chidgey Andrew Clement Negin Dahya Suzanne de Castell Carl DiSalvo Kevin Driscoll Christina Dunbar Hester Joseph Ferenbok Stephanie Fisher Miki Foster Stephen Gilbert Henry Jenkins Jennifer Jenson Yasmin B Kafai Ann Light Steve Mann Joel McKim Brenda McPhail Owen McSwiney Joshua McVeigh Schultz Graham Meikle Emily Rose Michaud Kate Milberry Michael Murphy Jason Nolan Kate Orton Johnson Kylie A Peppler David J Phillips Karen Pollock Matt Ratto Ian Reilly Rosa Reitsamer Mandy Rose Daniela K Rosner Yukari Seko Karen Louise Smith Lana Swartz Alex Tichine Jennette Weber Elke Zobl Center ,2007 **On Landscape Urbanism** Dean Almy, 2007 The theme of this volume is Landscape Urbanism with the agenda of linking emergent theories of Landscape Urbanism with its contemporary practice While a few recent symposiums and articles have addressed components of the subject the underlying theoretical trajectory of this emergent field has still not been codified in an accessible way The publication of Volume 14 of CENTER will fill this void with the inclusion of a reprint series of historically significant texts combined with original articles by noted authors and emerging practitioners *Design for a Vulnerable Planet* Frederick Steiner, 2011-04-01 We inhabit a vulnerable planet The devastation caused by natural disasters such as the southern Asian tsunami Hurricanes Katrina and Ike and the earthquakes in China s Sichuan province Haiti and Chile as well as the ongoing depletion and degradation of the world s natural resources caused by a burgeoning human population have made it clear that business as usual is no longer sustainable We need to find ways to improve how we live on

this planet while minimizing our impact on it Design for a Vulnerable Planet sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience Drawing on his own and others experiences across three continents Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection He begins by establishing the foundation for a more ecological approach to planning and design adopting a broad view of ecology as encompassing human and natural urban and wild environments Steiner explores precedents for human ecological design provided by architect Paul Cret landscape architect Ian McHarg and developer George Mitchell while discussing their planning for the University of Texas campus the Lake Austin watershed and The Woodlands Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State including regionalism urbanism and landscape in China and Italy He also examines the lessons to be learned from human and natural disasters such as 9 11 Hurricane Katrina and the BP oil spill Finally Steiner offers a blueprint for designing with nature to help heal the planet s vulnerabilities

**Architecture, Media, and Memory** Joel McKim, 2018-12-13 Architecture Media and Memory examines the wide range of urban sites impacted by September 11 and its aftermath from the spontaneous memorials that emerged in Union Square in the hours after the attacks to the reconstruction at Ground Zero to vast ongoing landscape urbanism projects beyond Yet this is not simply a book about post 9 11 architecture It instead presents 9 11 as a multifaceted case study to explore a discourse on memory and its representation in the built environment It argues that the reconstruction of New York must be considered in relation to larger issues of urban development ongoing global conflicts the rise of digital media and the culture philosophy and aesthetics of memory It shows how understanding architecture in New York post 9 11 requires bringing memory into contact with a complex array of political economic and social forces Demonstrating an ability to explain complex philosophical ideas in language that will be accessible to students and researchers alike in architecture urban studies cultural studies and memory studies this book serves as a thought provoking account of the intertwining of contemporary architecture media and memory

Landscape as Urbanism Charles Waldheim, 2022-03-15 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field s pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and

early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come

Megacities 2050: Environmental Consequences of Urbanization Viacheslav I. Vasenev, Elvira Dovletyarova, Zhongqi Chen, Riccardo Valentini, 2017-11-14 This interdisciplinary proceedings book addresses highly relevant topics in urbanization and its environmental impacts and presents case studies revealing the negative environmental consequences of the anthropogenic and technogenic pressures Urbanization is an important trend in current land use change with up to 70% of the world population projected to live in cities by 2050 How will this rapid urbanization alter the face of Europe What are the environmental consequences of the expansion of megacities These and other important questions are addressed in the Megacities 2050 Proceedings of the VI International Conference on Landscape Architecture to Support City Sustainable Development Megapolises are complex ecosystems and their air and water quality vegetation and soils are exposed to anthropogenic influences The book discusses advanced approaches and techniques to monitor model and assess environmental consequences and risks in megapolises and offers solutions to the environmental problems of modern megapolises It also presents successful sustainable urban development projects from Europe and beyond including the management and design of green infrastructure waste management run off purification and remediation of urban soils Focusing on urban soils and ecosystems the book is intended for experts in various fields of geography urban studies and planning and environmental sciences including those in the scientific and research community municipal services environmental protection agencies stakeholders working in urban management and greenery landscape architects civil engineers and policy makers ландшафт и город, 2017-08-01 **Landscape and Utopia** Jody Beck, 2022-12-22 This book examines three landmark utopian visions central to 20th century landscape architectural planning and architectural theory The period between the 1890s and the 1940s was a fertile time for utopian thinking Significant geographic shifts of large populations radically altered relations between capital and labor rapid technological developments large investments in transportation and energy infrastructure and repetitive economic disruptions motivated many individuals to wholly reimagine society including the connections between social relations and the built environment Landscape and Utopia examines the role of landscapes in the political imaginations of the Garden City the Radiant City and Broadacre City Each project uses landscapes to propose a reconstruction of the relationships between land labor and capital but while the projects are well known the role played by landscapes has been largely left unexamined Similarly the radical anti capitalism that underpinned each project has similarly been for the most part left out of contemporary discussions This book sets these projects within a

historical and philosophical context and opens a discussion on the role of landscapes in society today This book will be a must read for instructors students and researchers of the history and theory of landscape architecture planning and architecture as well as utopian studies cultural and social history and environmental theory      **Landscape Urbanism and its Discontents** Andr s Duany,Emily Talen,2013-06-11 Landscape Urbanism vs the New Urbanism negotiating the relationship between cities and the natural world      **The Landscape Urbanism Reader** Charles Waldheim,2012-03-20 In The

Landscape Urbanism Reader Charles Waldheim who is at the forefront of this new movement has assembled the definitive collection of essays by many of the field s top practitioners Fourteen essays written by leading figures across a range of disciplines and from around the world including James Corner Linda Pollak Alan Berger Pierre Bolanger Julia Czerniak and more capture the origins the contemporary milieu and the aspirations of this relatively new field The Landscape Urbanism Reader is an inspiring signal to the future of city making as well as an indispensable reference for students teachers architects and urban planners      *Landscape Infrastructure* Ying-Yu Hung,Gerdo Aquino,2013-05-28 Now available as revised edition The successful title on integrated ecological landscape planning Infrastructure as we know it no longer belongs in the exclusive realm of engineers and transportation planners In the context of rapidly changing cities and towns infrastructure is experiencing a paradigm shift where multiple use programming and the integration of latent ecologies is a primary consideration Defining contemporary infrastructure requires a multi disciplinary team of landscape architects engineers architects and planners to fully realize the benefits to our cultural and natural systems This book examines the potential of landscape as infrastructure via essays by notable authors and supporting case studies by SWA landscape architects and urban designers among them the technologically innovative roof domes for Renzo Piano s California Academy of Science in San Francisco the restoration of the Buffalo Bayou in Houston and several master plans for ecological corridors in China and Korea Other projects develop smart re use concepts for railroad tracks that no longer serve their original purpose such as Kyung Chun railway in Seoul or Katy Trail in Dallas All case studies are described extensively with technical diagrams and plans for repositioning infrastructure as a viable medium for addressing issues of ecology transit urbanism performance and habitat      **Waste and Urban Regeneration** Jeong Hye Kim,2020-11-26 Waste and Urban Regeneration examines the Nanjido region of Seoul and its transformation from Nanjido Landfill to the World Cup Park and its relation to the urban ecology within the context of the city s urban development during the late twentieth and early twenty first centuries The study analyses the urban ecological meanings of the site s two distinct forms by consolidating them with the Lefebvrian urban theory and relational ecological theories This book looks at environmental transformations and their link to South Korea s political and economic changes how Seoul City controlled waste populations the borderline characterisations of the inhabited landfill and its community the regeneration of the landfill into the post landfill park and site specific artworks which explored the conflict between the invisible presence of the landfill s garbage and its history As one of the first accounts

of a landfill and landfill turned park of South Korea this study is a must read for academics and researchers interested in waste management ecology landscape theory and history      *Designing Urban Transformation* Aseem Inam,2013-10-23 While designers possess the creative capabilities of shaping cities their often singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form In response to this paradox *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better The book focuses on a powerful question What can urbanism be by arguing that the most significant transformations occur by fundamentally rethinking concepts practices and outcomes Drawing inspiration from the philosophical movement known as Pragmatism the book proposes three conceptual shifts for transformative urban practice a beyond material objects city as flux b beyond intentions consequences of design and c beyond practice urbanism as creative political act Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo Horizonte Boston Cairo Karachi Los Angeles New Delhi and Paris The book is a rare integration of theory and practice that proposes essential ways of rethinking city design and building processes while drawing critical lessons from actual examples of such processes      **Development: Identities, representations, alternatives** Stuart Corbridge,2000 Brings together more than one hundred articles dealing with the discipline of development in all its diversity Key topics include the transformation of peasant economies agribusiness rural urban relations markets industrialization workers trade aid and structural adjustment A unique set in its comprehensiveness and diversity it also considers four key challenges for development theory and practice relating to capabilities ethics sustainability and regulation      Architecture and Urbanism: A Smart Outlook Shaimaa Kamel,Hanan Sabry,Ghada F. Hassan,Mostafa Refat,Abeer Elshater,Ahmed S. Abd Elrahman,Doaa K. Hassan,Rowaida Rashed,2020-11-02 This proceedings addresses the challenges of urbanization that gravely affect the world s ecosystems To become efficiently sustainable and regenerative buildings and cities need to adopt smart solutions This book discusses innovations of the built environment while depicting how such practices can transform future buildings and urban areas into places of higher value and quality The book aims to examine the interrelationship between people nature and technology which is essential in pursuing smart environments that optimize human wellbeing motivation and vitality as well as promoting cohesive and inclusive societies Urban Sociology Community Involvement Place making and Cultural Continuity Environmental Psychology Smart living Just City The book presents exemplary practical experiences that reflect smart strategies technologies and innovations by established and emerging professionals provides a forum of real life discourse The primary audience for the work will be from the fields of architecture urban planning and built environment systems including multi disciplinary academics as well as professionals      *Elemental Architecture* Phillip James Tabb,2018-10-31 *Elemental Architecture* presents a new and

refreshing approach to sustainable architectural practice Going beyond the standard performance based and quantitative sustainable measures it incorporates a broader framework of considerations including the more poetic and noetic possibilities of environmental design The book is structured around the ancient Greek and medieval alchemists system of the Five Temperaments fire earth air water and ether Phillip James Tabb examines how these elements produce both positive and negative environmental forces which have an impact on architectural design from drinking water and fresh air to torrential floods and tornados He shows how responding to or enhancing these forces can help us to create a more sustainable healthy and purposeful architecture To illustrate this each chapter draws on seminal contemporary works of architecture from Peter Zumthor s Bruder Klaus Field Chapel to Frank Lloyd Wright s masterpiece at Fallingwater These examples are accompanied by over a hundred high quality illustrations Expanding the discussion of sustainability to include phenomenological as well as qualitative considerations *Elemental Architecture* is ideal for students and researchers with an interest in sustainable architecture and architectural theory

*The Urbanism of Frank Lloyd Wright* Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright s designs for remaking the modern city Stunningly comprehensive *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect s work and offers new and important perspectives on the history of modernism Neil Levine places Wright s projects produced over more than fifty years within their historical cultural and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City Rather Levine reveals Wright s larger more varied interesting and complex urbanism demonstrated across the span of his lengthy career Beginning with Wright s plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright s place among the leading contributors to the creation of the modern city Wright s often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come

**Center Places and Cherokee Towns** Christopher Bernard Rodning, 2015-08-15 Examines how architecture and other aspects of the built environment such as hearths burials and earthen mounds formed center places within the Cherokee cultural landscape In *Center Places and Cherokee Towns* Christopher B Rodning opens a panoramic vista onto protohistoric Cherokee culture He posits that Cherokee households and towns were anchored within their cultural and natural landscapes by built features that acted as center places Rodning investigates the period from just

before the first Spanish contact with sixteenth century Native American chiefdoms in La Florida through the development of formal trade relations between Native American societies and English and French colonial provinces in the American South during the late 1600s and 1700s Rodning focuses particularly on the Coweeta Creek archaeological site in the upper Little Tennessee Valley in southwestern North Carolina and describes the ways in which elements of the built environment were manifestations of Cherokee senses of place Drawing on archaeological data delving into primary documentary sources dating from the eighteenth century and considering Cherokee myths and legends remembered and recorded during the nineteenth century Rodning shows how the arrangement of public structures and household dwellings in Cherokee towns both shaped and were shaped by Cherokee culture Center places at different scales served as points of attachment between Cherokee individuals and their communities as well as between their present and past Rodning explores the ways in which Cherokee architecture and the built environment were sources of cultural stability in the aftermath of European contact and how the course of European contact altered the landscape of Cherokee towns in the long run In this multi faceted consideration of archaeology ethnohistory and recorded oral tradition Rodning adeptly demonstrates the distinct ways that Cherokee identity was constructed through architecture and other material forms Center Places and Cherokee Towns will have a broad appeal to students and scholars of southeastern archaeology anthropology Native American studies prehistoric and protohistoric Cherokee culture landscape archaeology and ethnohistory
