Central Asian Security Trends Views From Europe And Russia:

Central Asian Security Trends Strategic Studies Institute, 2011-04-01 The war in Afghanistan has made Central Asia an ever more important strategic theater and one over which many states compete to exert influence This monograph comprehensively analyzes Russia's efforts to exert its influence in the region through 2010 **Central Asian Security Trends** Stephen Blank, Army War College (U.S.). Strategic Studies Institute, 2011 The war in Afghanistan has added considerably to the strategic significance of Central Asia due to its proximity to the conflict Moreover the continuation of the war increasingly involves the vital interests of many other actors other than the U S and NATO forces currently there This monograph taken from SSI's conference Contemporary Issues in International Security with European and Russian scholars in 2010 provides a comprehensive analysis of the means and objectives of Russia's involvement in Central Asia It provides Russian perspectives concerning the other actors in Central Asia and how Moscow views the policy significance of those efforts and a French analysis of the strategic situation evolving there For obvious reasons the war in Afghanistan proximity to major global actors large energy holdings and for less obvious reasons i e that possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011 Central Asia is an increasingly important and interesting region **Central Asian Security Trends** Stephen Blank, 2014-11-20 The papers collected in this volume pertain to Central Asia Indeed they offer us two foreign views of the strategic situation evolving there a Russian and a French analysis For obvious reasons the war in Afghanistan proximity to major global actors large energy holdings and for less obvious reason i e the possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011 Central Asia is an increasingly important and interesting strategic region As such it merits sustained critical attention and analysis of the sort we are presenting here and that we have presented in the past We also intend to continue doing so in the future Yet for all of Central Asia's growing importance it is a hard area to grasp analytically To nonspecialists it is likely to be something of a terra incognita an unknown region whose landmarks impart a sense of unfamiliarity even unease to those coming from the outside to try and understand it Yet at the same time even for specialists its reality is elusive and debates abound as to the nature of its domestic politics in both individual states and across the region Moreover the question of the stability of either individual states or of the region a key question for foreign policymakers and analysts is one of the most contested of the questions currently being debated Central Asian Security Trends Stephen J. Blank, Strategic Studies Institute, U. S. Army War College, 2013-06-03 *Central Asian Security Trends* Stephen J. Blank, 2011-04-29 On January 25-26 2010 SSI organized a conference entitled Contemporary issues in International Security at the Finnish embassy in Washington DC This was the second in what we hoped will be annual conferences bringing together U S European and Russian scholars and experts to discuss such issues in an open forum The importance of such regular dialogues among experts is well known and the benefits

of these discussions are considerable Just as we published the papers of the 2008 conference in 2009 Stephen J Blank ed Prospects for U S Russian Security Cooperation Carlisle PA Strategic Studies Institute U S Army War College 2009 we are doing so now However in this case we are publishing the papers on a panel by panel basis The papers collected in this volume pertain to Central Asia Indeed they offer us two foreign views of the strategic situation evolving there a Russian and a French analysis For obvious reasons the war in Afghanistan proximity to major global actors large energy holdings and for less obvious reason i e the possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011 Central Asia is an increasingly important and interesting strategic region As such it merits sustained critical attention and analysis of the sort we are presenting here and that we have presented in the past We also intend to continue doing so in the future Yet for all of Central Asia s growing importance it is a hard area to grasp analytically To nonspecialists it is likely to be something of a terra incognita an unknown region whose landmarks impart a sense of unfamiliarity even unease to those coming from the outside to try and understand it Yet at the same time even for specialists its reality is elusive and debates abound as to the nature of its domestic politics in both individual states and across the region Moreover the question of the stability of either individual states or of the region a key question for foreign policymakers and analysts is one of the most contested of the questions currently being debated Many analysts have accepted what has become a paradigm that these states are fundamentally precarious due to internal cleavages between social and ethnic groups face potentially devastating environmental and economic hazards are fundamentally misgoverned autocracies that will inevitably explode sooner or later and carry within them the threat of Islamic fundamentalist and terrorist forces coming to power as a result of pervasive misrule However more recently it has become clear that Central Asian governments not surprisingly resent this characterization of their efforts and point to 20 years of stability often against all predictions as testimony for their capacity for growth and stability Obviously we cannot give a definitive answer to these questions in the space of a single collection of essays But the point of these essays and of the panel from which they have sprung is to encourage our readers to take a more lively interest in this region whose strategic future is increasingly entangled with U S interests and those of key allies and other major international actors As September 11 2001 showed threats originating here can reach out and touch the United States Certainly they can also reach out to Europe as subsequent terror attacks show For this reason we hope that the essays presented here as well as our previous efforts to understand trends in this region and what will be future publications along this line will help to enlighten policymakers and planners as well as specialists and other readers about the growing importance of the region and the increased necessity of obtaining a deeper understanding of its evolution Globalizing Central Asia Marlene Laruelle, Sebastien Peyrouse, 2015-02-12 In this global era Central Asia must be understood in both geo economic and geopolitical terms The region s natural resources compel the attention of rivalrous great powers and ambitious internal

factions The local regimes are caught between the need for international collaborations to valorize these riches and the need to maintain control over them in the interest of state sovereignty Russia and China dominate the horizon with other global players close behind meanwhile neighboring countries are fractious and unstable with real potential for contagion This pathbreaking introduction to Central Asia in contemporary international economic and political context answers the needs of both academic and professional audiences and is suitable for course adoption

Global Stability and U.S. National Security Kristen Boon, Aziz Z. Huq, 2012 Terrorism Commentary on Security Documents is a series that provides primary source documents and expert commentary on the worldwide counter terrorism effort Among the documents collected are transcripts of Congressional testimony reports by such federal government bodies as the Congressional Research Service CRS and the Government Accountability Office GAO and case law covering issues related to terrorism Most volumes carry a single theme and inside each volume the documents appear within topic based categories The series also includes a subject index and other indices that guide the user through this complex area of the law Volume 123 Global Stability and U S National Security includes documents that illuminate instability concerns in key regions of the world and offer insights into how the lack of stability negatively affects U S interests as well as the interests of other nations The documents selected by Douglas Lovelace include primarily studies of instability concerns in the Middle East and North Africa as well as a document providing a general assessment of global stability and reports on Southeast and Central Asia and Latin America

The Transformation of Russia's Armed Forces Roger N. McDermott, 2016-03-17 At no time since the end of the Cold War has interest been higher in Russian security issues and the role played in this by the modernization of Russia's Armed Forces The continued transformation of its Armed Forces from Cold War legacy towards a modern combat capable force presents many challenges for the Kremlin Moscow's security concerns domestically in the turbulent North Caucasus and internationally linked to the Arab Spring as well as its complex relations with the US and NATO and its role in the aftermath of the Maidan Revolution in Ukraine in 2014 further raises the need to present an informed analytical survey of the country's military past present and future This collection addresses precisely the nature of the challenges facing Russian policymakers as they struggle to rebuild combat capable military to protect Russian interests in the twenty first century This book was based on a special issue of the Journal of Slavic Military Studies
