

Centrifuge Manual

**Sarah Springman, Jan Laue, Linda

Centrifuge Manual:

Manual on Hydrocarbon Analysis, 1977 *Field Manuals* United States. War Department, 1979-05 **Laboratory**
Manual on Biotechnology P. M. Swamy, 2008 **Plant Molecular Biology — A Laboratory Manual** Melody S.
Clark, 2013-11-27 The aim of this manual is to encompass a broad range of the latest plant molecular biology techniques. However, it is acknowledged that any manual will be read and hopefully used by a wide range of people with different levels of experience. Hence the remit of the manual was widened to include a full range of basic molecular techniques so that novices do not have to consult several texts to enable the execution of each major experiment. The manual is divided into three main parts: Part I Basic Molecular Techniques. The reason behind this part is to provide a background knowledge of molecular techniques but also to reduce duplication in later chapters; this is particularly true of the methods contained in Chap 1. All authors provided very detailed methods and often forgot that some of these would be covered earlier. A particular favourite was DNA extraction methods where everyone managed to provide a slightly different variant. My view was that it is far less confusing for the reader to be presented with one standard protocol and accompanying troubleshooting tips than to read a different version in each chapter. In this way the basic techniques are addressed more in depth and my apologies to all authors for judicious use of the delete key. RNA methodology is covered in Chapter 3. This proceeds from the fundamentals of extraction, northern blotting etc to cDNA libraries.

District Laboratory Practice in Tropical Countries, Part 1 Monica Cheesbrough, 2005-09-08 This new edition includes an update on HIV disease. AIDS recently developed HIV rapid tests to diagnose HIV infection and screen donor blood and current information on antiretroviral drugs and the laboratory monitoring of antiretroviral therapy. Information on the epidemiology and laboratory investigation of other pathogens has also been brought up to date. Several new rapid simple to perform immunochromatographic tests to assist in the diagnosis of infectious diseases are described, including those for brucellosis, cholera, dengue, leptospirosis, syphilis and hepatitis. Recently developed IgM antibody tests to investigate typhoid fever are also described. The new classification of salmonellae has been introduced. Details of manufacturers and suppliers now include website information and e-mail addresses. The haematology and blood transfusion chapters have been updated, including a review of haemoglobin measurement methods in consideration of the high prevalence of anaemia in developing countries. The volume is packed with much valuable information which is presented in a format that is readily readable. There are ample clear illustrations, tables and photographs to render the various information easy to digest. The authors have succeeded in producing a work that will fulfil an important need for developing countries. I highly recommend this book with its Part I counterpart to anyone with an interest in the practice of laboratory medicine. Pathology. *District Laboratory Practice in Tropical Countries* sets the gold standard and is an essential read and reference for anyone engaged in clinical laboratory practice in the tropics.
