**Earth in Human Hands** David Grinspoon, 2025-05-01 NASA Astrobiologist and renowned scientist Dr David Grinspoon brings readers an optimistic message about humanity s future in the face of climate change For the first time in Earth s history our planet is experiencing a confluence of rapidly accelerating changes prompted by one species humans Climate change is only the most visible of the modifications we ve

made up until this point inadvertently to the planet And our current behavior threatens not only our own future but that of countless other creatures By comparing Earth s story to those of other planets astrobiologist David Grinspoon shows what a strange and novel development it is for a species to evolve to build machines and ultimately global societies with world shaping influence Without minimizing the challenges of the next century Grinspoon suggests that our present moment is not only one of peril but also great potential especially when viewed from a 10 000 year perspective Our species has surmounted the threat of extinction before thanks to our innate ingenuity and ability to adapt and there s every reason to believe we can do so again Our challenge now is to awaken to our role as a force of planetary change and to grow into this task We must become graceful planetary engineers conscious shapers of our environment and caretakers of Earth s biosphere This is a perspective that begs us to ask not just what future do we want to avoid but what do we seek to build What kind of world do we want Are humans the worst thing or the best thing to ever happen to our planet Today we stand at a pivotal juncture and the answer will depend on the choices we make

*The Rebirth of Education* Lant Pritchett,2013-09-30 Despite great progress around the world in getting more kids into schools too many leave without even the most basic skills In India s rural Andhra Pradesh for instance only about one in twenty children in fifth grade can perform basic arithmetic The problem is that schooling is not the same as learning In *The Rebirth of Education* Lant Pritchett uses two metaphors from nature to explain why The first draws on Ori Brafman and Rod Beckstrom s book about the difference between centralized and decentralized organizations The Starfish and the Spider Schools systems tend be centralized and suffer from the limitations inherent in top down designs The second metaphor is the concept of isomorphic mimicry Pritchett argues that many developing countries superficially imitate systems that were successful in

other nations much as a nonpoisonous snake mimics the look of a poisonous one Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success Such an ecosystem needs to be open to variety and experimentation locally operated and flexibly financed The only main cost is ceding control the reward would be the rebirth of education suited for today's world
