Reading Marie al-Khazen's Photographs Yasmine Nachabe

Taan, 2020-11-26 The Lebanese photographer Marie al Khazen seized every opportunity to use her camera during the years that she was active between 1920 and 1940. She not only documented her travels around tourist sites in Lebanon but also sought creative experimentation with her camera by staging scenes, manipulating shadows, and superimposing negatives to produce different effects in her prints. Within her photographs, Bedouins and European friends, peasants and landlords, men and women comfortably share the same space. Her photographs include an intriguing collection portraying her family and friends living their everyday lives in the 1920s and 30s. Zgharta, a village in the north of Lebanon, Yasmine Nachabe Taan explores these photographs, emphasizing the ways in which notions of gender and class are inscribed within them and revealing how they are charged with symbols of women's emancipation to today's viewers through women's presence as individuals separate from family restrictions of that time. Images in which women are depicted smoking cigarettes, driving cars, riding horses, and accompanying men on hunting trips counteract the common ways in which women were portrayed in contemporary Lebanon.

Active Landscape Photography Anne C Godfrey, 2020-01-15

Photographs play a hugely influential but largely unexamined role in the practice of landscape architecture and design. Through a diverse set of essays and case studies, this seminal text unpacks the complex relationship between landscape architecture and photography. It explores the influence of photographic seeing on the design process by presenting theoretical concepts from photography and cultural theory through the lens of landscape architecture practice to create a rigorous open discussion. Beautifully illustrated in full color throughout with over 200 images, subjects covered include the diversity of everyday photographic practices for design decision making, the perception of landscape architecture through photography transcending the objective and subjective with photography, and deploying multiplicity in photographic representation as a means to better represent the complexity of the discipline. Rather than solving problems and providing tidy solutions to the ubiquitous relationship between photography and landscape architecture, this book aims to invigorate a wider dialogue about photography's influence on how landscapes are understood, valued, and designed. Active photographic practices are presented throughout for professionals, academics, students, and researchers.
