Management Planning for Cultural Heritage Ken Taylor,Giulio Verdini,2021-12-30 Management Planning for Cultural Heritage challenges traditional perceptions of and about the heritage planning process while also presenting a comprehensive analysis of the ever widening field of Cultural Heritage Conservation Drawing on the authors experience in teaching and involvement in international practice the book examines the changes that are taking place in modes of thinking about heritage as part of increasingly complex urban transformations and considers how these must engage with and inform professional practice The book also acknowledges that international best practice has developed a great deal over the last 40 years and needs to be adapted applied and refined through the recognition and application of regional values tangible and intangible based on cultural

attitudes and practices Emphasising the critical role of heritage planning and management in guiding change Taylor and Verdini argue that this is especially critical if we are to safeguard values identity and significance In this sense heritage is understood not only as a technical process but also as a social construct The book therefore promotes a people centred approach to cultural heritage management Management Planning for Cultural Heritage will be of interest to students scholars and practitioners working in heritage studies and conservation While the text has professional application it also sets out to present a sound theoretical foundation relevant to the body of knowledge associated with management of cultural heritage places

Vertical Urbanism

Zhongjie Lin,José L. S. Gámez,2018-04-27 Studies of compact cities have evolved along with the rising awareness of climate change and sustainable development Relevant debates however reveal that the prevailing definitions and practices of compact cities are tied primarily to traditional Western urban forms This book reinterprets compact city and develops a ground breaking discourse of Vertical Urbanism a concept that has never been critically articulated It emphasizes Vertical Urbanism as a dynamic design strategy instead of a static form distinguishing it from the stereotyped concept of vertical city or towers in the park dominant in China and elsewhere and suggests its adaptability to different geographic and cultural contexts Using Chinese cities as laboratories of investigation this book explores the design ecological and sociocultural dimensions of building compact cities and addresses important global urban issues through localized design solutions such as the relationship between density and vitality the integration of horizontal and vertical dimensions of design and the ecological and social adaptability of combinatory mega forms In addition through discussions with scholars from the United States China and Japan this book provides an insight into the theoretical debates

surrounding compact city and Vertical Urbanism in the global context Scholars and students in architecture and urban planning will be attracted by this book Also it will appeal to readers with an interest in urban development and Asian studies

City, Climate, and Architecture Sascha Roesler, 2025-01-27 Second and revised edition The publication rethinks climate control a key concern of the discipline of architecture through the lens of city climate phenomena over the course of the 20th century Based on a history of climate control on urban scales it promotes the integration of indoors and outdoors in order to reduce environmental and thermal loads in cities Just as heating and cooling practices inside the buildings are affecting the urban climate outdoors urban heat islands are influencing the energy requirements and thermal conditions inside the buildings While the first part of the book focuses on the interwar period in Europe the publication's second part considers examples from all over the globe tracing the growing significance of ecological thinking for the design of urban environments Main outcome of a six years research project on architecture and urban climate funded by the Swiss National Science Foundation New and revised edition KLIMA POLIS a series highlighting design driven approaches to urban climates across the globe

The Routledge Handbook of Urban Design Research Methods Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field urban design has been made unmade and remade at the intersections of multiple disciplines and professions It is now a decisive moment for urban design to reflect on its rigour and relevance This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus on the related research designs and methods The specific aim scope and structure of this handbook are appealing to a range of audiences interested and or involved in shaping places and public spaces What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency affordance place informality and performance In addition to the introduction chapter this handbook includes 80 contributors and 52 chapters organised into five parts The commissioned chapters showcase a wide range of topics research designs and methods with references to relevant scholarly works on the related topics and methods
