**Crossing Boundaries** Julie Thompson Klein, 1996 An interdisciplinary approach to knowledge **Crossing Boundaries**, 1997 **Crossing Boundaries** Julie Thompson Klein, 1996 Fuzzy Boundaries in Discourse Studies Péter B. Furkó, Ildikó Vaskó, Csilla Ilona Dér, Dorte Madsen, 2019-12-16 This book focuses on the multifarious aspects of fuzzy boundaries in the field of discourse studies a field that is marked by complex boundary work and a great degree of fuzziness regarding theoretical frameworks methodologies and the use of linguistic categories Discourse studies is characterised by a variety of theoretical frameworks and disciplinary fields research methodologies and lexico grammatical categories The contributions in this book explore some of the nuances and implications of the fuzzy boundaries in these areas resulting in a wide reaching volume which will be of interest to students and scholars of discourse studies in fields including sociology linguistics international relations philosophy literary criticism and anthropology Sustainable Knowledge R. Frodeman, 2013-12-02 Sustainable Knowledge rethinks the nature of interdisciplinary research and the place of philosophy and the humanities in society and offers a new account of what is at stake in talk about interdisciplinarity

**Writing-Intensive** Wendy Strachan, 2008-04-01 In one of the few book length studies of a major post secondary writing across the curriculum initiative from concept to implementation Writing Intensive traces the process of preparation for new writing requirements across the undergraduate curriculum at Simon Fraser University a mid sized Canadian research university As faculty members across campus were selected to pilot writing intensive courses and as administrators and committees adjusted the process toward full implementation planners grounded their pedagogy in genre theory a new approach for many non composition faculty So doing the initiative aimed to establish a coherent yet rhetorically flexible framework through which students might improve their writing in all disciplines Wendy Strachan documents this campus cultural transformation exploring successes and impasses with equal interest The study identifies factors to be considered to avoid isolating the teaching of writing in writing intensive courses to engender a university wide culture that naturalizes writing as a vital part of learning across all disciplines and to keep the teaching of writing organic and reflected upon in a scholarly manner across campus A valuable case history for scholars in writing studies WAC WID and curricular change studies

**Computer-Supported Collaborative Learning at the Workplace** Sean P. Goggins, Isa Jahnke, Volker Wulf, 2013-05-13 This book is an edited volume of case studies exploring the uptake and use of computer supported collaborative learning in work settings This book fills a significant gap in the literature A number of existing works provide empirical research on collaborative work practices Lave Davenport 2005 the sharing of information at work Brown Duguid 2000 and the development of communities of practice in workplace settings Wenger 1998 Others examine the munificent variation of information and communication technology use in the work place including studies of informal social networks formal information distribution and other socio technical combinations found in work settings Gibson Cohen 2003 Another

significant thread of prior work is focused on computer supported collaborative learning much of it investigating the application of computer support for learning in the context of traditional educational institutions like public schools private schools colleges and tutoring organizations Exciting new theories of how knowledge is constructed by groups Stahl 2006 how teachers contribute to collaborative learning reference to another book in the series and the application of socio technical scripts for learning is explicated in book length works on CSCL Book length empirical work on CSCW is widespread and CSCL book length works are beginning to emerge with greater frequency We distinguish CSCL at Work from prior books written under the aegis of training and development or human resources more broadly The book aims to fill a void between existing works in CSCW and CSCL and will open with a chapter characterizing the emerging application of collaborative learning theories and practices to workplace learning CSCL and CSCW research each make distinct and important contributions to the construction of collaborative workplace learning

*Integrating Knowledge Through Interdisciplinary Research* Dominic Holland, 2013-08-22 In this important new text Holland seeks to explain by means of social scientific and philosophical inquiry the difficulties that researchers often experience when attempting to integrate

knowledge from different academic disciplines either individually or as part of a team of subject specialists It is argued that the difficulty of integrating knowledge from different academic disciplines is the result of firstly an inadequate justification of the nature of scientific integration and differentiation and secondly the dominance of disciplinary specialization in scientific inquiry By focusing on both the theoretical justification for and the practical feasibility of integrating knowledge through interdisciplinary research this book asks what properties of reality make the integration of knowledge from different academic disciplines possible and to what extent it is feasible to integrate knowledge through interdisciplinary research within a traditional disciplinary context Accordingly the text is both philosophical and social scientific in content philosophical in the sense that it presents a theory of causal determination which will help researchers to understand how reality is both differentiated and interconnected social scientific in the sense that it presents the results of three case studies of collaborative interdisciplinary research projects The book is heavily informed by the philosophy of critical realism The philosophical argument about the possibility of integration and specialization in science draws explicitly on some of the key concepts of critical realism particularly those comprising the theory of integrative pluralism while critical realist assumptions underpin the social scientific argument about the causal influence of the social system of knowledge production By exploring researchers conceptions of knowledge and of reality on the one hand and their decisions about what sort of knowledge to produce on the other Holland shows how the difficulty of scientific integration is both a problem of knowledge and a problem of knowledge production This book is essential reading for students and academics interested in the emerging topic of knowledge integration and interdisciplinarity

**The Routledge Doctoral Student's Companion** Pat Thomson, Melanie Walker, 2010-04-07 This book addresses a set of interlocking and overlapping big questions that sit behind the plethora of doctoral advice texts and run through the practice of knowledge identity work

*The Oxford Handbook of Interdisciplinarity* Robert Frodeman, Julie Thompson Klein, Roberto Carlos Dos Santos Pacheco, 2017-01-26 Interdisciplinarity has become as important outside academia as within Academics policy makers and the general public seek insights to help organize the vast amounts of knowledge being produced both within research and at all levels of education The second edition of The Oxford Handbook of Interdisciplinarity offers a thorough update of this major reference work summarizing the latest advances within the field of inter and transdisciplinarity The collection is distinguished by its breadth of coverage with chapters written by leading experts from multiple networks and organizations The volume is edited by respected interdisciplinary scholars and supported by a prestigious advisory board to ensure the highest quality and breadth of coverage The Oxford Handbook of Interdisciplinarity provides a synoptic overview of the current state of interdisciplinary research education administration and management and of problem solving knowledge that spans the disciplines and interdisciplinary fields The volume negotiates the space between the academic community and society at large Offering the most broad based account of inter and transdisciplinarity to date its 47 chapters provide a snapshot of the state of knowledge integration as

interdisciplinarity approaches its century mark This second edition expands its coverage to discuss the emergence of new fields the increase of interdisciplinary approaches within traditional disciplines and professions new integrative approaches to education and training the widening international presence of interdisciplinarity its increased support in funding agencies and science policy bodies and the formation of several new international associations associated with interdisciplinarity This reference book will be a valuable addition to academic libraries worldwide important reading for members of the sciences social sciences and humanities engaged in interdisciplinary research and education and helpful for administrators and policy makers seeking to improve the use of knowledge in society      **Handbook of Interdisciplinary Teaching and**

**Administration** Rick Szostak, 2024-09-06 Championing an emerging global community of scholars this Handbook provides a detailed examination on how to successfully integrate interdisciplinarity into education programs A comprehensive look into the current landscape of the field it emphasises the importance of interdisciplinary teaching and administration in the development of creativity citizenship and information literacy This title contains one or more Open Access chapters

*Foundations of Interdisciplinary and Transdisciplinary Research* Bianca Vienni-Baptista, Isabel Fletcher, Catherine Lyall, 2023-07-11 Introduction chapter is available Open Access under CC BY NC ND licence This groundbreaking reader is designed to lower the barriers to interdisciplinarity and transdisciplinarity in research Edited by experienced researchers from a range of different fields it paves the way for future scholarship and effective research collaborations across disciplines Chapters offer extracts from key academic texts on topics such as the design funding evaluation and communication of research providing those new to the field with a thorough grounding They highlight examples of interdisciplinary and transdisciplinary triumphs and challenges Concluding each chapter is a commentary provided by practitioners from diverse backgrounds many of whom are themselves developing new approaches to inter and transdisciplinarity The book is the first ever comprehensive reader for interdisciplinarity and transdisciplinarity essential reading for those seeking to become effective collaborative researchers complete with concise introductions extracts commentary and further reading in each chapter This is a much needed primer that improves our understanding of the characteristics of interdisciplinarity and transdisciplinarity unlocking their exciting potential in research and teaching within and beyond academia      Under the Cover of Kindness Leslie Margolin, 1997 In *Under the Cover of Kindness* Leslie Margolin looks at how this country's social welfare system developed and with what results From his detailed examination of social work texts primarily case histories he argues persuasively that social work disguises its own assumptions and claims to power as a way of further legitimizing its actions By attending to these case histories Margolin shows how social work entails not only the intrusion into the previously private space of the home but also the constant justification of this intervention to both clients and workers themselves as representing charitable and disinterested help This book critically assesses how social workers invent themselves as they simultaneously invent their field of knowledge      *Interdisciplinary and Intercultural Programmes in Higher Education* Judith

L. Green, W. Douglas Baker, 2019-02-01 At the centre of this book is the exploration of how logic in use both leads to a particular understanding of the phenomena of interest such as opportunities for learning specific processes and shapes a particular view of what evidence counts in constructing claims The contributions brought together here invite readers to explore the processes involved in developing and studying educational innovations and to uncover the interdependent conceptual and epistemological actions processes and practices of instructors programme developers and students Taken together the book brings forward an argument related to the reflexive turn the understanding that researchers in the social sciences construct rather than find phenomena of interest Therefore this book creates the potential to examine not only the logic in use developed by different researchers but also to examine the complex nature of particular phenomena of interest to the researcher themselves This book was originally published as a special issue of *Pedagogies An Educational Journal*

Beyond Interdisciplinarity Julie Thompson Klein, 2021-07-03 *Beyond Interdisciplinarity* examines the broadening meaning of core concept across academic disciplines and other forms of knowledge In this book Associate Editor of *The Oxford Handbook of Interdisciplinarity* and internationally recognized scholar Julie Thompson Klein depicts the heterogeneity and boundary work of inter and trans disciplinarity in a conceptual framework based on an ecology of spatializing practices in transaction spaces including trading zones and communities of practice The book includes both crossdisciplinary work encompassing multi inter and trans disciplinary forms as well as cross sector work spanning disciplines fields professions government and industry and communities The first section of the book defines and explains boundary work discourses of interdisciplinarity and the nature of interdisciplinary fields In the second section Klein examines dynamics of working across disciplines including communication collaboration and learning with concrete examples and lessons from research projects and programs that transcend traditional fields The closing chapter examines reasons for failure and success then presents gateways to literature and other resources Throughout the book Klein emphasizes the roles of contextualization and historical change while factoring in the shifting relationship of disciplinarity and interdisciplinarity ascendancy of transdisciplinarity and intersections with other constructs including Mode 2 knowledge production convergence team science and postdisciplinarity The conceptual framework she provides also includes the role of boundary objects agents and organizations in brokering differences and creating for platforms for change Klein further explains why translation interlanguage and a communication boundary space are vital to achieving intersubjectivity and collective identity They foster not only pragmatics of negotiation and integration but also reflexivity transactivity and co production of knowledge with stakeholders beyond the academy Rhetorics of holism and synthesis compete with instrumentalities of problem solving and transgressive critiques However typical warrants today include complexity contextualization collaboration and socially robust knowledge Crossing boundaries remains complex but this book guides readers through the density of pertinent literature while expanding understandings of crossdisciplinary and cross sector work **Connected Science** Tricia A. Ferrett, David

Geelan, Whitney M. Schlegal, Joanne L. Stewart, 2013-07-10 Informed by the scholarship of teaching and learning SOTL Connected Science presents a new approach to college science education for the 21st century This interdisciplinary approach stresses integrative learning and pedagogies that engage students through open ended inquiry compelling real world questions and data rich experiences Faculty from a variety of disciplines and institutions present case studies based on research in the classroom offering insights into student learning goals and best practices in curriculum design Synthetic chapters bring together themes from the case studies present an overview of the connected science approach and identify strategies and future challenges to help move this work forward      **Specialized Communication** Thorsten Roelcke, Ruth Breeze, Jan Engberg, 2025-06-02 Specialized communication in science technology or institutions is one of the most important and exciting fields of applied linguistics The handbook captures the current and relevant knowledge of specialized languages and professional communication It promotes international communication on central issues where dialogue is urgently needed concerning both their intellectual underpinning and the day to day practices associated with them      **Composition, Rhetoric, and Disciplinarity** Rita Malenczyk, Susan Miller-Cochran, Elizabeth Wardle, Kathleen Yancey, 2018-04-02 Edited by four nationally recognized leaders of composition scholarship Composition Rhetoric and Disciplinarity asks a fundamental question can Composition and Rhetoric as a discipline continue its historical commitment to pedagogy without sacrificing equal attention to other areas such as research and theory In response contributors to the volume address disagreements about what it means to be called a discipline rather than a profession or a field elucidate tensions over the defined breadth of Composition and Rhetoric and consider the roles of research and responsibility as Composition and Rhetoric shifts from field to discipline Outlining a field with a complex and unusual formation story Composition Rhetoric and Disciplinarity employs several lenses for understanding disciplinarity theory history labor and pedagogy and for teasing out the implications of disciplinarity for students faculty institutions and Composition and Rhetoric itself Collectively the chapters speak to the intellectual and embodied history leading to this point to questions about how disciplinarity is and might be understood especially with regard to Composition and Rhetoric to the curricular conceptual labor and other sites of tension inherent in thinking about Composition and Rhetoric as a discipline and to the implications of Composition and Rhetoric s disciplinarity for the future Contributors Linda Adler Kassner Elizabeth H Boquet Christiane Donahue Whitney Douglas Doug Downs Heidi Estrem Kristine Hansen Doug Hesse Sandra Jamieson Neal Lerner Jennifer Helene Maher Barry Maid Jaime Armin Mej a Carolyn R Miller Kelly Myers Gwendolynne Reid Liane Robertson Rochelle Rodrigo Dawn Shepherd Kara Taczak
