Crossing The River Creating A Conceptual Revolution In Community And Disability:

Crossing the River David B. Schwartz, 1992 Presents a new conception of care that seeks to embed persons with disabilities in a web of personal relationships to make their living experience more connected to the other people in their community to find ways to involve them intrinsically in the flow of their community Schwartz points out the promise potential and limits of this new direction illustrating with a series of exciting experiments in social policy in Pennsylvania This book also has important implications for other groups disenfranchised from their communities those with mental illness and those who are homeless *Pathways to Inclusion* John Lord, Peggy Hutchison, 2007 Community Practice David A.

Hardcastle, Patricia R. Powers, Stanley Wenocur, 2004 *Community Practice* is a comprehensive resource for social workers and students eager to learn how to practice effectively in complex systems and diverse communities In this completely revised edition of the definitive text in the field the authors have thoroughly updated each chapter and added two entirely new chapters on community building and community organizing New material on topics such as negotiation and mediation community advocacy participatory rural appraisal the narrative approach to social change community involvement representative client boards and the latest in grassroots endeavors make this text as inspiring as it is practical Drawing upon the wealth of information available from local organizations the Internet newspapers and academic journals the authors introduce contemporary experiments and analyze classic modes of community practice and change The content exercises and references offer instructors the flexibility necessary to tailor their courses to undergraduate graduate and doctoral level students This new edition will continue to provide a comprehensive and integrated overview of the theory and skills fundamental to all areas of social work practice Broad in scope it offers students as well as practitioners the tools necessary to promote the welfare of individuals and communities Public Administration and Disability Julie Ann Racino, 2014-12-16

Based on decades of evidence based research and technical assistance Public Administration and Disability Community Services Administration in the US brings together the diverse expert perspectives and discusses the leading efforts of the past three decades in the field of disability and community services The book highlights the development of **Claiming Disability** Simi Linton, 1998-01-01 From public transportation and education to adequate access to buildings the social impact of disability has been felt everywhere since the passage of the Americans with Disabilities Act in 1990 And a remarkable groundswell of activism and critical literature has followed in this wake *Claiming Disability* is the first comprehensive examination of Disability Studies as a field of inquiry Disability Studies is not simply about the variations that exist in human behavior appearance functioning sensory acuity and cognitive processing but the meaning we make of those variations With vivid imagery and numerous examples Simi Linton explores the divisions society creates the normal versus the pathological the competent citizen versus the ward of the state Map and manifesto *Claiming Disability* overturns medicalized versions of disability and establishes disabled people and their allies as the rightful claimants to this territory

Cruel Compassion Thomas Szasz, 1998-02-01 Cruel Compassion is the capstone of Thomas Szasz's critique of psychiatric practices Reexamining psychiatric interventions from a cultural historical and political economic perspective Szasz demonstrates that the main problem that faces mental health policy makers today is adult dependency Millions of Americans diagnosed as mentally ill are drugged and confined by doctors for noncriminal conduct go legally unpunished for the crimes they commit and are supported by the state not because they are sick but because they are unproductive and unwanted Obsessed with the twin beliefs that misbehavior is a medical disorder and that the duty of the state is to protect adults from themselves we have replaced criminal punitive sentences with civil therapeutic programs The result is the relentless loss of individual liberty erosion of personal responsibility and destruction of the security of persons and property symptoms of the transformation of a Constitutional Republic into a Therapeutic State unconstrained by the rule of law Szasz shows convincingly that not until we separate therapy from coercion much as the founders separated theology from coercion shall we be able to get a handle on our seemingly intractable psychiatric and social problems No contemporary thinker has done more than Thomas Szasz to expose the myths and misconceptions surrounding insanity and the practice of psychiatry Now in Cruel Compassion he gives us a sobering look at some of our most cherished notions about our humane treatment of society's unwanted and perhaps more importantly about ourselves as a compassionate and democratic people

cultures again combining abstract theoretical analysis with concrete case studies of alternative economic formations from local self sufficiency movements to cooperatives and other anti capitalist institutional experiments These case studies exhibit an impressive range of variation from first world to third world from reformist to utopian transformative Finally Schroyer links the project to the global justice movement that opposes corporate globalization and eventually links participatory economics and democratic politics to a new image of science as participatory social learning

Outcome-Based Evaluation Robert L. Schalock,2013-03-09 This book is the product of 30 years of experience with program evaluation During this time both service recipients and educational and social programs have experienced major cultural and political shifts in service delivery philosophy including a focus on quality mainstreaming deinstitutionalization community inclusion and an emphasis on measurable outcomes Recently stakeholders of these programs have demanded more than just the provision of service forcing program administrators to evaluate their programs effectiveness and efficiency The era of accountability is here and my major goal in writing this book is to help current and future program administrators understand that they need to look beyond simply the provision of service Indeed they need to be competent in outcome based evaluation which I define as a type of program evaluation that uses valued and objective person referenced outcomes to analyze a program's effectiveness impact or benefit cost By design this book can be read from the perspective of a consumer or producer of outcome based evaluation As a consumer the reader will be introduced to the various techniques used in outcome based evaluation and how to interpret data from outcome based evaluation analyses As a producer the reader will be instructed in how to do outcome based evaluation analyses along with how to use and act on their results For both the consumer and producer two questions should guide the use of outcome based evaluation
