Coombe, 1983 Crafting the Scene Will Hong, 2022-06-01 Bringing together an understanding of cinematic technique and creative choices, this book explores how directors make the technical choices to tell a story in the best and most effective way. Analyzing examples from films throughout, it demonstrates how to practice analysis and application to take your storytelling to the next level through creative choices. This book provides a model to bridge the gap between theory and practice by analyzing famous scenes and breaking them down not solely for critical value and within historical context but primarily for practical value and application. Author Hong illustrates how an understanding of dramatic storytelling and the dramatic context behind scenes allows filmmakers to produce impactful and powerful stories. Foregrounding reading film and media to allow you to engage with films in a critical and perceptive way, this book will help you make films to connect with your audience. Through looking at complete scenes as the primary unit of drama, it teaches how to analyze story movement across a scene to build better stories, pulling practical lessons from these famous moments in cinema to enable better work across preproduction on set and during post production. Serving as a guide through a single semester-long class focused on direction and production, this book is aimed at advanced students and aspiring filmmakers. It is essential reading for filmmakers wishing to build on their creative and technical skills and enrich their storytelling. **Billboard**, 1953-10-03 In its 114th year, *Billboard* remains the world's premier weekly music publication and a diverse digital events brand.
