Dinosaurs In Fantastic Fiction:

Dinosaurs in Fantastic Fiction Allen A. Debus, 2006 This literary survey examines how paleoliterature originated developed and matured from its inception to the present day It follows trends on the crafting of classic dinosaurs investigating the figurative and metaphoric meaning of fictional dinosaurs and related prehistoria An appendix provides brief summaries of deserving dinosaur texts organized alphabetically by author Provided by publisher **Dinosaurs Ever Evolving** Allen A. Debus, 2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century **Dinosaurs by the Decades** Randy Moore, 2014-07-23 Providing an appealing chronology of all things dinosaur this book covers these ancient creatures roles and surprising importance in science religion and society at large This exhaustive up to date book contains more than 2 000 entries about dinosaurs and dinosaur related topics It provides not only detailed information about their discovery underlying science and recent technologies and theories but also encompasses all of the facets of dinosaurs in society for example their use in consumer marketing and promotion popularization of dinosaurs in the media as proof for both evolutionists and creationists to substantiate their claims about life s origins and as cultural artifacts Organized chronologically the book offers an informative and entertaining timeline of how dinosaurs have appeared in science religion and society since they were discovered in the 1800s covering everything from dinosaur museum displays to how dinosaurs served advocates of young Earth creationism This fascinating work enables a broad appreciation for the surprising significance of dinosaurs in many aspects of our daily lives and modern society *Kong, Godzilla and the Living Earth* Allen A. Debus, 2022-06-24 During the 2010s science fiction s immortal adversaries King Kong and Godzilla representing our conflicts per Carl Sagan s dream dragons analogy made comebacks in American cinema The blockbuster Kaiju resurged onto the screen depicting these protectors of an Earth plagued by mankind s hubris and folly With Earth s future hanging in the balance their climactic 2021 staging settled a score between the two giant monsters resolving Toho s classic 1963 film King Kong vs Godzilla As formidable creatures emerging from Time s Tomb on Mother Earth metaphorical Kong and Godzilla are considered here in light of new millennial environmentalism s stark reality This book nostalgic in tone explores the meaning of Kong and Godzilla as planetary saviors titanic protectors of a theoretical living Earth Gaia defending the globe from a prehistoric plague of adversaries *When the Asteroid Hits* Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large

chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries. Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak, it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago. This startling announcement captivated the media and tilted the science fiction world, but in reality, history may have been punctuated repeatedly by such events. This book collects and analyzes ideas of asteroid, comet, and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci-fi stories, films, and televised science documentaries. The author examines social and geopolitical fears tied to the prospect of a cosmic-borne catastrophe. Science fiction and speculation are artfully melded. **Prehistoric Monsters** Allen A. Debus, 2014-11-21. Over centuries, discoveries of fossil bones spawned legends of monsters such as giants and dragons. As the field of earth sciences matured during the 19th century, early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus, Triceratops, and Stegosaurus. This historical study examines how these genuine beasts morphed in the public imagination into mythical, powerful engines of destruction and harbingers of cataclysm, taking their place in popular culture, film, and literature as symbols of lost worlds where time stands still. **The Routledge Companion to Victorian Literature** Dennis Denisoff, Talia Schaffer, 2019-11-11. The Routledge Companion to Victorian Literature offers 45 chapters by leading international scholars working with the most dynamic and influential political, cultural, and theoretical issues addressing Victorian literature today. Scholars and students will find this collection both useful and inspiring. Rigorously engaged with current scholarship that is both historically sensitive and theoretically informed, the Routledge Companion places the genres of the novel, poetry, and drama, and issues of gender, social class, and race in conversation with subjects like ecology, colonialism, the Gothic, digital humanities, sexualities, disability, material culture, and animal studies. This guide is aimed at scholars who want to know the most significant critical approaches in Victorian studies, often written by the very scholars who helped found those fields. It addresses major theoretical movements such as narrative theory, formalism, historicism, and economic theory, as well as Victorian models of subjects such as anthropology, cognitive science, and religion. With its lists of key works, rich cross-referencing, extensive bibliographies, and explications of scholarly trajectories, the book is a crucial resource for graduate students and advanced undergraduates while offering invaluable support to more seasoned scholars. *The Mammoth Book of Best New Horror 18* Stephen Jones, 2011-08-04. The year's darkest tales of terror. Here is the latest edition of the world's premier annual showcase of horror and dark fantasy fiction. It features some of the very best short stories and novellas by today's masters of the macabre, including Neil Gaiman, Brian Keene, Elizabeth Massie, Glen Hirshberg, Peter Atkins, and Tanith Lee. The Mammoth Book of Best New Horror also features the most comprehensive yearly overview of horror around the world, lists of useful contact addresses, and a fascinating necrology. It is the one book that is required reading for every fan of macabre fiction. **Reimagining Dinosaurs in Late**

Victorian and Edwardian Literature Richard Fallon, 2021-11-04 Reimagining Dinosaurs argues that transatlantic popular literature was critical for transforming the dinosaur into a cultural icon between 1880 and 1920 [Multispecies Storytelling in Intermedial Practices](#) Ida Bencke, Jørgen Bruhn, 2022-03-08 Multispecies Storytelling in Intermedial Practices is a speculative endeavor asking how we may represent relay and read worlds differently by seeing other species as protagonists in their own rights What other stories are to be invented and told from within those many tongued chatters of multispecies collectives Could such stories teach us how to become human otherwise Often the human is defined as the sole creature who holds language and consequently is capable of articulating representing and reflecting upon the world And yet the world is made and remade by ongoing and many tongued conversations between various organisms reverberating with sound movement gestures hormones and electrical signals Everywhere life is making itself known heard and understood in a wide variety of media and modalities Some of these registers are available to our human senses while some are not Facing a not so distant future catastrophe which in many ways and for many of us is already here it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest yet radical hope If we keep reproducing the same kind of languages the same kinds of scientific gatekeeping the same kinds of stories about our place in nature we remain numb in the face of collapse Multispecies Storytelling in Intermedial Practices offers steps toward a self critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia Artists activists writers and scientists give a myriad of different interpretations of how to tell our worlds using different media and possibly gives hints as to how to change it too [Library of Congress Subject Headings](#) Library of Congress. Cataloging Policy and Support Office, 2009 [Library of Congress Subject Headings](#) Library of Congress, Library of Congress. Office for Subject Cataloging Policy, 2006 *Science-fiction Studies*, 2006 *How Life Began* Alexandre Meinesz, 2024-05-31 The origin of life is a hotly debated topic The Christian Bible states that God created the heavens and the Earth all in about seven days roughly six thousand years ago This episode in Genesis departs markedly from scientific theories developed over the last two centuries which hold that life appeared on Earth about 3.5 billion years ago in the form of bacteria followed by unicellular organisms half a millennia later It is this version of genesis that Alexandre Meinesz explores in this engaging tale of life's origins and evolution How Life Began elucidates three origins or geneses of life bacteria nucleated cells and multicellular organisms and shows how evolution has sculpted life to its current biodiversity through four main events mutation recombination natural selection and geologic cataclysm As an ecologist who specializes in algae the first organisms to colonize Earth Meinesz brings a refreshingly novel voice to the history of biodiversity and emphasizes here the role of unions in organizing life For example the ingestion of some bacteria by other bacteria led to mitochondria that characterize animal and plant cells and the chloroplasts of plant

cells As Meinesz charmingly recounts life s grandeur is a result of an evolutionary tendency toward sociality and solidarity He suggests that it is our cohesion and collaboration that allows us to solve the environmental problems arising in the decades and centuries to come Rooted in the science of evolution but enlivened with many illustrations from other disciplines and the arts How Life Began intertwines the rise of bacteria and multicellular life with Vermeer s portrait of Antoni van Leeuwenhoek the story of Genesis and Noah Meinesz s son s early experiences with Legos and his own encounters with other scientists All of this brings a very human and humanistic tone to Meinesz s charismatic narrative of the three origins of life

Dinosaur Sculpting Allen A. Debus,Bob Morales,Diane E. Debus,2013-08-28 This new book greatly expanded from the 1995 first edition describes detailed step by step procedures for sculpting molding and painting original prehistoric animals It emphasizes the use of relatively inexpensive materials including oven hardening polymer clay and wire Additional tips are offered on how to build distinctive dino dioramas and scenes involving one s own original sculptures that you will learn how to conceive and build This book will appeal to a new generation who would like to break into the industry of paleosculpture Techniques range from basic to advanced The authors also discuss what it means to be a paleoartist

Science Fiction Literature through History Gary Westfahl,2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics authors works and subgenres written by a distinguished scholar This encyclopedia deals with written science fiction in all of its forms not only novels and short stories but also mediums often ignored in other reference books such as plays poems comic books and graphic novels Some science fiction films television programs and video games are also mentioned particularly when they are relevant to written texts Its focus is on science fiction in the English language though due attention is given to international authors whose works have been frequently translated into English Since science fiction became a recognized genre and greatly expanded in the 20th century works published in the 20th and 21st centuries are most frequently discussed though important earlier works are not neglected The texts are designed to be helpful to numerous readers ranging from students first encountering science fiction to experienced scholars in the field

American Dinosaur Abroad Ilja Nieuwland,2019-05-15 In early July 1899 an excavation team of paleontologists sponsored by Andrew Carnegie discovered the fossil remains in Wyoming of what was then the longest and largest dinosaur on record Named after its benefactor the *Diplodocus carnegii* or Dippy as it s known today was shipped to Pittsburgh and later mounted and unveiled at the Carnegie Museum of Natural History in 1907 Carnegie s pursuit of dinosaurs in the American West and the ensuing dinomania of the late nineteenth century coincided with his broader political ambitions to establish a lasting world peace and avoid further international conflict An ardent philanthropist and patriot Carnegie gifted his first plaster cast of Dippy to the British Museum at the behest of King Edward VII in 1902 an impulsive diplomatic gesture that would result in the donation of at least seven reproductions to museums across Europe and Latin America over the next decade in England Germany France

Austria Italy Russia Argentina and Spain In this largely untold history Ilja Nieuwland explores the influence of Andrew Carnegie's prized skeleton on European culture through the dissemination reception and agency of his plaster casts revealing much about the social political cultural and scientific context of the early twentieth century Articulating Dinosaurs Brian Noble, 2016-08-12 In this remarkable interdisciplinary study anthropologist Brian Noble traces how dinosaurs and their natural worlds are articulated into being by the action of specimens and humans together Following the complex exchanges of palaeontologists museums specialists film and media makers science fiction writers and their diverse publics he witnesses how fossil remains are taken from their partial state and re composed into astonishingly precise animated presences within the modern world with profound political consequences *Articulating Dinosaurs* examines the resurrecting of two of the most iconic and gendered of dinosaurs First Noble traces the emergence of *Tyrannosaurus rex* the king of the tyrant lizards in the early twentieth century scientific literary and filmic cross currents associated with the American Museum of Natural History under the direction of palaeontologist and eugenicist Henry Fairfield Osborn Then he offers his detailed ethnographic study of the multi media model making curatorial and laboratory preparation work behind the Royal Ontario Museum's ground breaking 1990s exhibit of *Maiasaura* the good mother lizard Setting the exhibits at the AMNH and the ROM against each other Noble is able to place the political natures of *T rex* and *Maiasaura* into high relief and to raise vital questions about how our choices make a difference in what comes to count as nature An original and illuminating study of science culture and museums *Articulating Dinosaurs* is a remarkable look at not just how we visualize the prehistoric past but how we make it palpable in our everyday lives *Neo-Gothic Narratives* Sarah E. Maier, Brenda Ayres, 2020-03-31 *Neo Gothic Narratives* defines and theorises what exactly qualifies as such a text what mobilises the employment of the Gothic to speak to our own times whether nostalgia plays a role and whether there is room for humour besides the sobriety and horror in these narratives across various media What attracts us to the Gothic that makes us want to resurrect reinvent echo it Why do we let the Gothic redefine us Why do we let it haunt us Does it speak to us through intertextuality self reflectivity metafiction immersion affect Are we reclaiming the history of women and other subalterns in the Gothic that had been denied in other forms of history Are we revisiting the trauma of English colonisation and seeking national identity Or are we simply tourists who enjoy cruising through the otherworld The essays in this volume investigate both the readerly experience of Neo Gothic narratives as well as their writerly pastiche **Library Journal**, 2006 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately
