

Loosen the two 10mm hex screws (4) and push the support into position.

Mounting the Machine Support

To assemble the machine support, place the machine on the ground with the fuel tank facing downward.

Now loosen off the two hex, head screws (4) until the ends of the support (1) fit easily into their respective mounting holes. Push the support fully home, insert the two M 10 x 10 screws (5) through the holes in the mounting plate and into the clutch housing and tighten them down securely.

Finish off by tightening down the two, hex screws (4) and securing the lock nuts (7) with a 10 mm open-end wrench.

Mounting the Handlebar

First join up the two halves of the handlebar at the hinge pin in the clamp. Then position the handlebar about 25 cm (10 in) further down the drive tube than the rubber grip so that the ends of the two handles point forwards in the direction of the cutting tool head.

Now align the handlebar (machine support must face downward) and secure it in position with the enclosed M 6 x 20 hexagon head screw, lockwasher and nut.

Mounting the Throttle Control and Stop Switch

The throttle lever (8) and stop switch (9) must be fitted to the right hand side of the handlebar (viewed from the powerhead). Remove the screw (10) from the clamp, bend open the clamp so that it slips over the handlebar. Then roll the screw (10), push the throttle lever (8) up to the rubber handle and adjust it to the most convenient operating position. Secure the clamp by tightening down the screw (10).
