implementing nearly all significant legal developments at Lloyd's in the last 25 years **The Law of Liability Insurance** Malcolm A. Clarke, 2017-07-20 Now in its second edition this book is an authoritative and comprehensive review on all aspects of the law that relate to liability insurance contracts. It aims to cover all the major types of liability insurance not just professional indemnity insurance and presents the issues according to the general principles of contract law. Updated to include the impact of the Insurance Act 2015 the book takes a comparative view of the law tailored to those professionals operating in a global economy as well as academics and post graduate students **Deferred Prosecution Agreements and Directors' Liability** Natalie Turney, 2024-07-15 This book provides an in-depth analysis of deferred prosecution agreements (DPAs), a tool first introduced in the United States and since implemented in the United Kingdom and other jurisdictions. The central focus of the book is the impact of DPAs on company directors. DPAs were first introduced in the US for individuals but are now used predominantly for corporate defendants. In the UK, DPAs have only ever been available for companies. The consideration of individuals in the introductory stage in the UK is explored in depth as well as the consideration and targeting of individuals in cases that have followed. Company directors are exposed to liability because of this negotiated deal between the company and prosecutors and this book addresses the key areas of exposure and how various parties should address these risk areas in accordance with the law. The book is an increasingly necessary contribution to the topical discussion of the fallout of unsuccessful prosecutions of individuals implicated in the wrongdoing constituting the basis of DPAs, calling into question not only treatment of those individuals but also the integrity of the DPA tool itself. It also considers the impact of DPAs and arising exposures on directors and officers' D & O liability insurance, therefore covering potential risk areas and the ability of directors to access a defence in protecting themselves from liability. The book covers the impact on all areas of a D & O policy, considering D & O policy wording and insurance law in doing so, providing a rounded account of issues arising in relation to company directors and how interested parties can act in the best interests of all whilst in accordance with law and policy. The primary audience for this book will be lawyers and practitioners in the corporate crime and/or insurance law space, including general counsels, solicitors, barristers, consultants, prosecuting authorities, legal academics and so forth. It will also be of interest to company directors and to students of financial crime, corporate criminal crime and insurance law and will have great international appeal. Organisations likely to use the book will include prosecuting authorities, law firms working on corporate criminal liability or D & O insurance cases and companies looking to protect themselves where there is alleged wrongdoing **The Law of Insurance Warranties** Alastair Owen, 2021-06-21 The book provides a detailed review of efforts to reform the law on insurance warranties in Australia, New Zealand and the UK, arguing that none of these have been successful. The text proposes a radical new approach to reform of this area of the law, demonstrating through detailed stress testing of these proposals that they would deliver more consistent and equitable outcomes than those achieved to date. Reform of the historically inequitable law of insurance warranties in commercial

insurance has been introduced in Australia New Zealand and most recently the UK This book demonstrates that all these reforms have flaws and that none of them can be relied upon to deliver consistently equitable and predictable outcomes in particular the UK's as yet largely untested Insurance Act 2015 is shown to have serious flaws that have not previously been identified Building on lessons from these three jurisdictions the book sets out an alternative approach for dealing with breaches of insurance warranties and demonstrates that this would consistently deliver better outcomes than any of the existing attempts at reforming this area of the law Providing an unprecedented multi jurisdictional review of the law on insurance warranties and in particular the treatment of warranties in the Insurance Act 2015 as well as outlining an innovative and radical alternative approach to reform the book will be of considerable interest and value to practitioners academics and students as well as to other common law jurisdictions contemplating reform of this area of the law The Global Insurance Market and Change Anthony A Tarr, Julie-Anne Tarr, Maurice Thompson, Dino Wilkinson, 2023-10-17 This book focuses on the global landscape in which insurance is transacted and where it is evolving driven from within by transformative technologies and externally by the necessity to address risks like climate change and health crises such as the COVID 19 pandemic It discusses the dynamic challenges and opportunities that lie ahead for the industry in areas such as on demand insurance embedded insurance parametric insurance autonomous vehicles the rise of fintech the cyber risk landscape and through initiatives driven by distributed ledger technology or blockchain solutions Moreover it covers the major external challenges confronting the global insurance market such as the growing insurance protection gap in relation to the affordability and insurability of natural catastrophes and climate change and pandemics like COVID 19 This book examines innovations in insurance driven by the industry as well as externally imposed changes and dynamics impacting the industry It describes these changes the industry's responses and the legal framework in which they occur It canvasses additional regulatory and law reform initiatives that may be necessary to achieve an effective balance between the various competing interests The book is the first to address these matters holistically with a particular focus upon insurance law it will describe these changes and industry responses and the legal framework in which they occur The Global Insurance Market will be directly relevant to legal professionals insurers insurtechs fintechs brokers CEOs of insurance companies risk managers legal counsel academics researchers the judiciary and policy makers It will also serve as a valuable resource for students of all levels *Insurance Law and the Financial Ombudsman Service* Judith Summer, 2013-05-02 Insurance Law and the Financial Ombudsman Service is an in depth look at the workings and insurance decisions of the Financial Ombudsman Service The book analyses how the Ombudsman Service decides insurance cases and compares its approach to that of a court This book sets out the rules procedure and approach of the Ombudsman Service succinctly summarises the relevant insurance law and compares and analyses it against a comprehensive review of material about insurance complaints gathered since the formation of the Ombudsman Service in 2001 *Insurance, Climate Change and the Law* Franziska

Arnold-Dwyer,2024-04-03 The insurance industry has found itself at the front line of climate change challenges providing insurance cover in relation to risks associated with climate change As risk carriers insurers pay claims for climate change related losses such as property damage caused by windstorms flooding and wildfires which have been increasing in frequency and severity As major institutional investors insurance companies invest in assets that may be increasingly vulnerable to climate risks Insurance regulators across the globe have therefore started to require insurance companies to identify manage and report on climate change risks that could pose a threat to their financial stability However managing and reporting on the effect of climate risk on an insurer s balance sheet is an inward looking perspective that does not stem climate change It needs to be paired with an outward looking perspective that takes account of the insurance industry s impact on the environment and the insurance industry s capacity to influence what policyholders investee enterprises and other business partners do to address climate change challenges For the insurance industry the key components of positive outward impact are impact underwriting and impact investment This book sets out the current legal and regulatory landscape for impact underwriting and impact investment Whilst the focus of research and regulatory interventions to date has been on inward impact in this book it will be argued that to take positive climate action that supports the Paris Agreement goals and the national and international Net Zero targets the debate should now move on to considering the positive outward impact the insurance industry can make and how we can create a legal environment to facilitate this The book puts forward the case for a new vision of the role of the insurance industry as climate action enablers and makes proposals for insurance products and risk transfer and loss resilience structures that can support policyholders in their transition to a Net Zero economy The audience for this book will include legal practitioners insurance industry professionals financial and insurance regulators policymakers and interested academics
