*Woman President* Kristina Horn Sheeler, Karrin Vasby Anderson, 2013-08-08 What elements of American political and rhetorical culture block the imagining and thus the electing of a woman as president Examining both major party and third party campaigns by women including the 2008 campaigns of Hillary Clinton and Sarah Palin the authors of *Woman President Confronting Postfeminist Political Culture* identify the factors that limit electoral possibilities for women Pundits have been predicting women's political ascendancy for years And yet although the 2008 presidential campaign featured Hillary Clinton as an early frontrunner for the Democratic presidential nomination and Sarah Palin as the first female Republican vice presidential nominee no woman has yet held either of the top two offices The reasons for this are complex and varied but the authors assert that the question certainly encompasses more than the shortcomings of women candidates or the demands of the particular political moment Instead the authors identify a pernicious backlash against women presidential candidates one that is expressed in both political and popular culture In *Woman President Confronting Postfeminist Political Culture* Kristina Horn Sheeler and Karrin Vasby Anderson provide a discussion of US presidentiality as a unique rhetorical role Within that framework they review women's historical and contemporary presidential bids placing special emphasis on the 2008 campaign They also consider how presidentiality is framed in candidate oratory campaign journalism film and television digital media and political parody

**The War on Poverty in Mississippi** Emma J. Folwell, 2020-03-18 President Lyndon B Johnson's war on poverty instigated a ferocious backlash in Mississippi Federally funded programs the embodiment of 1960s liberalism directly clashed with Mississippi's closed society From 1965 to 1973 opposing forces transformed the state In this state level history of the war on poverty Emma J Folwell traces the attempts of white and black Mississippians to address the state's dire economic circumstances through antipoverty programs At times the war on poverty became a powerful tool for black empowerment But more often antipoverty programs served as a potent catalyst of white resistance to black advancement After the momentous events of 1964 both black activism and white opposition to black empowerment evolved due to these federal efforts White Mississippians deployed massive resistance in part to stifle any black economic empowerment twisting antipoverty programs into tools to marginalize black political power Folwell uncovers how the grassroots war against the war on poverty laid the foundation for the fight against 1960s liberalism as Mississippi became a national model for stonewalling social change As Folwell indicates many white Mississippians hardwired elements of massive resistance into the political economic and social structure Meanwhile they abandoned the Democratic Party and honed the state's Republican Party spurred by a new conservatism

**International Relations** Dr. Raghwendra Kishore, 2021-09-11 The history of international relations is often traced back to the Peace of Westphalia of 1648 where the modern state system was developed Prior to this the European medieval organization of political authority was based on a vaguely hierarchical religious order Westphalia instituted the legal concept of sovereignty which essentially meant that rulers or the legitimate sovereigns had no internal equals within a defined territory and no external superiors as the ultimate authority within the territory's sovereign borders A simple way to view this is that sovereignty says I'm not allowed to tell you what to do and you are not allowed to tell me what to do Classical Greek and Roman authority at times resembled the Westphalian system but both lacked the notion of sovereignty Westphalia encouraged the rise of the independent nation state the institutionalization of diplomacy and armies This particular European system was exported to the Americas Africa and Asia via colonialism and the standards of civilization The contemporary international system was finally established through decolonization during the Cold War However this is somewhat oversimplified While the nation state system is considered modern many states have not incorporated the system and are termed pre modern This book is an attempt in this direction and hope that will be useful to students academicians and researchers Contents Origin and Contemporary Relevance of the Cold War Nature of the Post Cold War Global Order Vietnam War and International Politics Discussion of Petroleum Supply's Relation to World Markets Afghan Civil War Gulf War Collapse of the Soviet Union Yugoslav Crisis

Hart,2009-07-01 Roderick Hart may be among the few Americans who believe that what politicians say in a campaign

actually matters. He also believes that campaigns work. Even as television coverage, political ads, and opinion polls turn elections into field days for marketing professionals, Hart argues convincingly that campaigns do play their role in sustaining democracy mainly because they bring about a dialogue among candidates, the press, and the people. Here he takes a close look at the exchange of ideas through language used in campaign speeches, political advertising, public debates, print and broadcast news, and a wide variety of letters to the editor. In each case, the participants choose their words differently, and this, according to Hart, can be a frustrating challenge to anyone trying to make sense of the issues. Yet he finds that the process is good for Americans: campaigns inform us about issues, sensitize us to the concerns of others, and either encourage us to vote or at least heighten our sense of the political world. Hart comes to his conclusions by using DICTION, a computer program that has enabled him to unearth substantive data such as the many subtle shifts found in political language over the past fifty years. This approach yields a rich variety of insights, including empirically based explanations of impressions created by political candidates. For example, in 1996 Bill Clinton successfully connected with voters by using many human-interest words like "you," "us," "people," and "family." Bob Dole, however, alienated the public and even undermined his own claims of optimism by using an abundance of denial words like "can't," "shouldn't," and "couldn't." Hart also tracks issue buzzwords such as "Medicare" to show how candidates and voters define and readjust their positions throughout the campaign dialogue. In the midst of today's increased media hype surrounding elections, Americans and the candidates they elect do seem to be listening to each other as much as they did in years gone by. Hart's wide-ranging, objective investigation upends many of our stereotypes about political life and presents a new, more bracing understanding of contemporary electoral behavior.
