Strengthening Peace in Post-Civil War States Matthew Hoddie, Caroline A. Hartzell, 2010-09-30 Among the more frequent and most devastating of conflicts civil wars from Yugoslavia to Congo frequently reignite and even spill over into the international sphere Given the inherent fragility of civil war peace agreements innovative approaches must be taken to ensure the successful resolution of these conflicts Strengthening Peace in Post Civil War States provides both analytical frameworks and a series of critical case studies demonstrating the effectiveness of a range of strategies for keeping the peace Coeditors Matthew Hoddie and Caroline A Hartzell here contend that lasting peace relies on aligning the self interest of individuals and communities with the society wide goal of ending war if citizens and groups have a stake in peace they will seek to maintain and defend it The rest of the contributors explore two complementary approaches toward achieving this goal restructuring domestic institutions and soft intervention Some essays examine the first tactic which involves reforming governments that failed to prevent war while others discuss the second an umbrella term for a number of non military strategies for outside actors to assist in keeping the peace **Regeneration of War-Torn Societies** NA NA, 2016-04-30

Regeneration and peacebuilding in war torn societies is a fast growing area of interest in world politics The book is an original and timely contribution to the study of post conflict transition through an examination of various aspects of regeneration and detailed analysis of examples of intent Four issues are highlighted in particular the legacies of modern conflict in the transitions to relative peace the question of ownership and accountability in the interactions between internal and external actors the need for coherent responses to regeneration the importance of case specific approaches The book's purpose is to encourage students policy makers and practitioners in governments intergovernmental organisations international and local non governmental organisations to understand and reflect on processes designed to promote social stability and relative peace and to re examine the nature of the tasks they confront and their responses The authors represent perspectives from law political economy social work development studies anthropology and international relations

The Economics of UN Peacekeeping Nadège Sheehan, 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism multilateralism human rights and humanitarian ideas UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN

armed forces e.g humanitarian aid election supervision disarmament mine clearance civilian protection and peacebuilding The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process Although UN peacekeeping has shortcomings it must be considered essential for organizing and defending the world politico economic order UN peacekeeping is a political activity but its production strongly depends on nations economic considerations Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission With low means and inadequate strategies to meet the challenges UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner s dilemma in contributions that delay deployments and create significant financial problems Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential This book believes that regional organizations can ease the UN s financial responsibility by managing conflicts in their regions But to be most effective they must involve the UN in their interventions This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues This research should be of interest to students and researchers looking at international and political economics as well as international relations defence security and peace studies Conflict and Fragility Armed Violence Reduction Enabling Development OECD,2009-03-02 Each year 740 000 people die as a result of armed violence This publication will help the international community to understand the dynamics of armed violence and outlines what can be done to reduce it Arming the South J. Brauer,P. Dunne,2002-05-10 After marked reductions in military spending in the 1990s military budgets around the world are on the increase In this book renowned authorities re examine the economics of military expenditure arms production and arms trade in developing nations It includes analysis of military spending in Africa Asia and Latin America and new forms of civil conflict as well as nine case studies Saudi Arabia South Africa Mozambique Angola Subsaharan Africa Greece Turkey Guatemala and Chile The book will serve as a valuable contribution to the fields of both development economics and security studies Peace and Conflict in Africa David Francis,2013-04-04 Nowhere in the world is the demand for peace more prominent and challenging than in Africa From state collapse and anarchy in Somalia to protracted wars and rampant corruption in the Congo from bloody civil wars and extreme poverty in Sierra Leone to humanitarian crisis and authoritarianism in Sudan the continent is the focus of growing political and media attention This book presents the first comprehensive overview of conflict and peace across the continent Bringing together a range of leading academics from Africa and beyond Peace and Conflict in Africa is an ideal introduction to key themes of conflict resolution peacebuilding security and development The book s stress on the importance of indigenous Africa approaches to creating peace makes it an innovative and exciting intervention in the field **Routledge Handbook of Peacebuilding**

Roger Mac Ginty,2013-02-15 This new Routledge Handbook offers a comprehensive state of the art overview of the meanings and uses of the term peacebuilding and presents cutting edge debates on the practices conducted in the name of peacebuilding The term peacebuilding has had remarkable staying power Other terms such as conflict resolution have waned in popularity while the acceptance and use of the term peacebuilding has grown to the extent that it is the hegemonic and over arching term for many forms of mediation reconciliation and strategies to induce peace Despite this however it is rarely defined and often used to mean different things to different audiences Routledge Handbook of Peacebuilding aims to be a one stop comprehensive resource on the literature and practices of contemporary peacebuilding The book is organised into six key sections Section 1 Reading peacebuilding Section 2 Approaches and cross cutting themes Section 3 Disciplinary approaches to peacebuilding Section 4 Violence and security Section 5 Everyday living and peacebuilding Section 6 The infrastructure of peacebuilding This new Handbook will be essential reading for students of peacebuilding mediation and post conflict reconstruction and of great interest to students of statebuilding intervention civil wars conflict resolution war and conflict studies and IR in general The Evolution of International Security Studies Barry Buzan,Lene

Hansen,2009-08-27 The first intellectual history of International Security Studies since 1945 providing an unparalleled survey for students and scholars **The Search for Security in Post-Taliban Afghanistan** Cyrus Hodes,Mark Sedra,2013-05-13 By the middle of 2007 Afghans had become increasingly disillusioned with a state building process that had failed to deliver the peace dividend that they were promised For many Afghans the most noticeable change in their lives since the fall of the Taliban has been an acute deterioration in security conditions Whether it is predatory warlords the Taliban led insurgency the burgeoning narcotics trade or general criminality the threats to the security and stability of Afghanistan are manifold The response to those threats both in terms of the international military intervention and the donor supported process to rebuild the security architecture of the Afghan state known as security sector reform SSR has been largely insufficient to address the task at hand NATO has struggled to find the troops and equipment it requires to complete its Afghan mission and the SSR process from its outset has been severely under resourced and poorly directed Compounding these problems rampant corruption and factionalism in the Afghan government particularly in the security institutions have served as major impediments to reform and a driver of insecurity This paper charts the evolution of the security environment in Afghanistan since the fall of the Taliban assessing both the causes of insecurity and the responses to them Through this analysis it offers some suggestions on how to tackle Afghanistan s growing security crisis Peace Operations and Organized Crime James Cockayne,Adam Lupel,2011-05-10 Peace operations are increasingly on the front line in the international community s fight against organized crime this book explores how in some cases peace operations and organized crime are clear enemies while in others they may become tacit allies The threat posed by organized crime to international and human security has become a matter of considerable strategic concern for national and international

decision makers so it is somewhat surprising how little thought has been devoted to addressing the complex relationship between organized crime and peace operations This volume addresses this gap questioning the emerging orthodoxy that portrays organized crime as an external threat to the liberal peace championed by western and allied states and delivered through peace operations Based upon a series of case studies it concludes that organized crime is both a potential enemy and a potential ally of peace operations and it argues for the need to distinguish between strategies to contain organized crime and strategies to transform the political economies in which it flourishes The editors argue for the development of intelligent transnational and transitional law enforcement that can make the most of organized crime as a potential ally for transforming political economies while at the same time containing the threat it presents as an enemy to building effective and responsible states The book will be of great interest to students of peacebuilding peace and conflict studies organised crime Security Studies and IR in general

Global Migrants, Global Refugees Aristide R. Zolberg, Peter M. Benda, 2001-06-01 In recent years several influential commentators have stated or strongly implied that the advanced industrial democracies are today being overwhelmed by a host of problems including rapid population growth the breakup of multi ethnic states environmental degradation and increasing economic differentials between the developing and developed worlds for which no effective solutions are at hand The migration inducing potential of these post Cold War developments has been a particular source of concern This volume provides a counter catastrophic view of developments and a more sober and balanced assessment of the challenges the United States and other industrial democracies face in the sphere of international migration than that offered in recent years The first part is devoted to a diagnosis of the problem revaluation of the notion of a migration crisis by examining the likely consequences of population growth environmental degradation and political conflict in the developing and post communist worlds Special attention is also given to the manifestations of these forces in the western hemisphere where they may have direct consequences for immigration to the United States In the second part the implications for U S policy are considered ranging from promotion of democracy and development of strategies for minimizing international migrations and refugee flows to the intricacies of humanitarian relief and intervention when preventive measures prove ineffective

Alternative Perspectives on Peacebuilding Mark S. Cogan, Hidekazu Sakai, 2022-10-11 This book analyses and furthers the academic debates on post liberal peacebuilding through a number of conceptual theoretical and empirical research outputs Part I includes a review of how the recent discourse on peacebuilding has evolved and three conceptual theoretical perspectives relevant to post liberal peacebuilding In particular the editors propose the concept of bespoke peacebuilding to articulate key features of new peacebuilding models Part II introduces five case studies that present how alternative peacebuilding models are being shaped or can be shaped in practice Essential reading for scholars and students in Peace and Conflict Studies International Relations and International Security Studies Chapter 8 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Warlord Democrats in Africa

Anders Themnér, 2017-04-15 Post war democratization has been identified as a crucial mechanism to build peace in war ridden societies supposedly allowing belligerents to compete through ballots rather than bullets A byproduct of this process however is that military leaders often become an integral part of the new democratic system using resources and networks generated from the previous war to dominate the emerging political landscape The crucial and thus far overlooked question to be addressed therefore is what effect the inclusion of ex militaries into electoral politics has on post war security Can warlord democrats make a positive contribution by shepherding their wartime constituencies to support the building of peace and democracy or are they likely to use their electoral platforms to sponsor political violence and keep war affected communities mobilized through aggressive discourses This important volume containing a wealth of fresh empirical detail and theoretical insight and focussing on some of Africa s most high profile political figures from Paul Kagame to Riek Machar to Afonso Dhlakama represents a crucial intervention in the literature of post war democratization Warlords in International Relations Paul B. Rich, 2016-07-27 This timely collection investigates the meaning of the widely used term warlordism in contemporary global politics The introduction develops an analytical framework in order for scholars to understand the range and differing intensity of differing types of warlordist and sub state conflict The volume then proceeds to an examination of warlordism in relation to the international markets in light weaponry and narcotics It also includes a series of case studies such as Somalia Rwanda Kashmir and Albania **Peacebuilding and Police Reform** Espen Barth Eide, Tor Tanke Holm, 2013-11-05 The contributions here discuss the issue of internationally assisted police reform in transitions from war to peace They include theoretical insights and informed case studies and a discussion of the trend towards internationally provided executive authority policing
