Disaster Hits Home New Policy For Urban Housing Recovery:

Disaster Hits Home Mary C. Comerio, 2023-12-22 Whenever a major earthquake strikes or a hurricane unleashes its fury the devastating results fill our television screens and newspapers Mary C Comerio is interested in what happens in the weeks and months after such disasters particularly in the recovery of damaged housing Through case studies of six recent urban disasters Hurricane Hugo in South Carolina Hurricane Andrew in Florida the Loma Prieta and Northridge earthquakes in California as well as earthquakes in Mexico City and Kobe Japan Comerio demonstrates that several fundamental factors have changed in contemporary urban disasters The foremost change is in scale and as more Americans move to the two coasts future losses will continue to be formidable because of increased development in these high hazard areas Moreover the visibility of disasters in the news media will assure that response efforts remain highly politicized And finally the federal government is now expected to be on the scene with personnel programs and financial assistance even as private insurance companies are withdrawing disaster coverage from homeowners in earthquake and hurricane prone regions Demonstrating ways that existing recovery systems are inadequate Comerio proposes a rethinking of what recovery means a comprehensive revision of the government's role and more equitable programs for construction financing She offers new criteria for a housing recovery policy as well as real financial incentives for preparedness for limiting damage before disasters occur and for providing a climate where private insurance can work Her careful analysis makes this book important reading for policymakers property owners and anyone involved in disaster mitigation Whenever a major earthquake strikes or a hurricane unleashes its fury the devastating results fill our television screens and newspapers Mary C Comerio is interested in what happens in the weeks and months after such disasters particularly in t *Housing Recovery After Disasters* Frances L. Edwards, 2019-08-15 This book contains housing policy scholars and practitioners examining the existing theories of community long term recovery and the central role of housing in resilience They propose public policy changes that are needed to improve recovery from future devastating community level disasters **Business and Post-disaster**

Management C. Michael Hall, Sanna Malinen, Rob Vosslander, Russell Wordsworth, 2016-01-29 This book provides a comprehensive examination of the effects of a natural disaster on businesses and organisations and on a range of stakeholders including employees and consumers Research on how communities and businesses respond to disasters can inform policy and mitigate the cost and impacts of future disasters This book discusses how places recover following a disaster and the vital roles that business and other organisations play This volume gives a detailed understanding of business organisational and consumer responses to the Christchurch earthquake sequence of 2010 2011 which caused 185 deaths the loss of over 70 per cent of buildings in the city's CBD major infrastructure damage and severely affected the city's image Despite the devastation the businesses organisations and people of Christchurch are now undergoing significant recovery The book sheds significant new light not only on business and organisation response to disaster but on how business and

urban systems may be made more resilient *Rebuilding Asia Following Natural Disasters* Patrick Daly, R. Michael Feener, 2016-04-07 Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades including massive earthquakes volcanic eruptions and tsunamis this book explores complex and changing understandings and practices of relief recovery and reconstruction These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders and provide in depth explorations of the ways in which local communities are transformed on multiple levels not only by the impact of disaster events but also by the experiences of rebuilding This timely volume highlights how the experiences of Asia can contribute towards post disaster responses globally to safeguard future communities and reduce vulnerabilities This is a valuable resource for academic researchers interested in post disaster transformations and development studies practitioners in NGOs and government officials dealing with disaster response and disaster risk reduction **The Resilient City** Lawrence J. Vale, Thomas J. Campanella, 2005-01-20 In 1871 the city of Chicago was almost entirely destroyed by what became known as The Great Fire Thirty five years later San Francisco lay in smoldering ruins after the catastrophic earthquake of 1906 Or consider the case of the Jerusalem the greatest site of physical destruction and renewal in history which over three millennia has suffered wars earthquakes fires twenty sieges eighteen reconstructions and at least eleven transitions from one religious faith to another Yet this ancient city has regenerated itself time and again and still endures Throughout history cities have been sacked burned torched bombed flooded besieged and leveled And yet they almost always rise from the ashes to rebuild Viewing a wide array of urban disasters in global historical perspective The Resilient City traces the aftermath of such cataclysms as the British invasion of Washington in 1814 the devastation wrought on Berlin Warsaw and Tokyo during World War II the late 20th century earthquakes that shattered Mexico City and the Chinese city of Tangshan Los Angeles after the 1992 riots the Oklahoma City bombing the destruction of the World Trade Center Revealing how traumatized city dwellers consistently develop narratives of resilience and how the pragmatic process of urban recovery is always fueled by highly symbolic actions The Resilient City offers a deeply informative and unsentimental tribute to the dogged persistence of the city and indeed of the human spirit **Reconstructing Kobe** David W. Edgington, 2011-01-01 The Hanshin Earthquake was the largest disaster to affect postwar Japan and one of the most destructive postwar natural disasters to strike a developed country Although the media focused on the disaster s immediate effects the long term reconstruction efforts have gone largely unexplored Drawing on extensive fieldwork David Edgington records the first ten years of reconstruction and recovery and asks whether planners successfully exploited opportunities to make a more sustainable and disaster proof city This book is an intricate investigation of one of the largest redevelopment projects in recent memory **Handbook of Disaster Research** Havidán Rodríguez, William Donner, Joseph E. Trainor, 2017-11-16 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research It provides an

interdisciplinary approach to disasters with theoretical methodological and practical applications Attention is given to conceptual issues dealing with the concept disaster and to methodological issues relating to research on disasters These include Geographic Information Systems as a useful research tool and its implications for future research This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow

Resettlement Challenges for Displaced Populations and Refugees Ali Asgary,2018-08-16 The main focus of this book is to help better understand the multidimensionality and complexity of population displacement and the role that reconstruction and recovery knowledge and practice play in this regard According to the UN Refugee Agency UNHCR the total number of people forcibly displaced due to wars and conflicts disasters and climate change worldwide exceeded 66 million in 2016 Many of these displaced populations may never be able to go back and rebuild their houses communities and businesses This text brings together recovery and reconstruction professionals researchers and policy makers to examine how displaced populations can rebuild their lives in new locations and recover from disasters that have impacted their livelihoods and communities This book provides readers with an understanding of how disaster recovery and reconstruction knowledge and practice can contribute to the recovery and reconstruction of displaced and refugee populations This book will appeal to students researchers and professionals working in the field

Local Disaster Management Gina Yannitell Reinhardt, Lex Drennan,2020-06-09 Local Disaster Management explores what resilience means for local communities and local governments on the front line of responding to disasters and emergencies Disaster management is often seen as a major international issue undertaken by global actors such as the UN Red Cross and Red Crescent Yet fundamentally all disasters are local Every disaster regardless of its type affects individuals families and communities before they escalate to encompassing one or many communities or nations This volume therefore explores fundamental issues of disaster and emergency management at the local level What is resilience What does resilience mean for a local government seeking to lessen the impact of disasters on their community How do local governments adapt through their experiences of disasters and how do they recover from catastrophic experiences This book explores these issues with chapters from top scholars in the field draws out lessons for local government officials and disaster managers seeking to build community resilience prepare their communities for a changing environment and facilitate recovery after disasters strike Local Disaster Management provides invaluable insight for local governments charged with managing the inescapable effects of climate change and the increasing frequency and severity of disasters as well as for scholars of local governance disaster resilience government policy and disaster management The chapters were originally published as a special issue in Local Government Studies

Navigating Natural Hazards in Mountainous Topographies Gowhar Meraj, Shizuka Hashimoto, Pankaj Kumar,2024-08-15 Nature's Fury Navigating Natural Hazards in Mountainous Topographies shall be a comprehensive guide to the unique challenges and hazards associated with mountainous regions and the efforts being made to mitigate their

impact The book shall provide a detailed overview of natural hazards such as earthquakes landslides avalanches and flash floods and explores their impacts on communities and the environment It would delve into the science of risk assessment and vulnerability analysis and shall offer practical insights into mitigation strategies such as early warning systems evacuation plans and disaster response efforts The book will also explore the role of technology and predictive modeling in mountain hazards management and the relationship between mountain hazards and climate change With realworld examples and case studies from the Himalayas the Andes and the Rockies the book shall provide a comprehensive examination of the field of mountain hazards management It will cover community based disaster management and preparedness environmental conservation and sustainable development and the balancing of tourism and conservation in mountainous regions The book will also include lessons learned from major mountain disasters and the importance of international cooperation in mountain hazards management It would cater wide audience including professionals in the field of disaster management an environmental scientist or even an enthusiast of mountain landscapes We propose to have an engaging writing style and practical insights in this book that will provide a valuable resource for anyone interested in navigating the unique challenges and hazards of mountainous topographies
