Discovering Calculus with the HP-28 and the HP-48 Robert Thomas Smith, Roland B. Minton, 1992 This supplementary text for the standard calculus course focuses on how the HP 28S and the HP 48SX 2 graphing supercalculators will aid in improving students understanding of calculus The calculators are capable of rapid production of graphics and calculations so classes that have access to the machines will save valuable time on graphing and calculations With supercalculators such as the HP 28S and the HP 48SX students can focus on true Calculus concepts rather than on computational details

Discovering Calculus with the TI-81 and the TI-85 Robert Thomas Smith, Roland B. Minton, 1993 Focusing on how the TI 81 and the TI 85 two graphing calculators are designed to aid in the understanding of calculus this book concentrates on the discovery of relationships and experimenting rather than on computational details Differences between the two calculators are pointed out where appropriate as the TI 85 is newer and developed especially for the calculus audience By not emphasizing button pushing but concepts and the application of those concepts a simple programme is built to improve skills In addition many programming notes are included throughout Calculus Laboratories with Mathematica, Volume 2
