Events and Urban Regeneration Andrew Smith, 2012-03-15. In recent years, major sporting and cultural events such as the Olympic Games have emerged as significant elements of public policy, particularly in efforts to achieve urban regeneration. As well as opportunities arising from new venues, these events are viewed as a way of stimulating investment, gaining civic engagement and publicizing progress to assist the urban regeneration process more generally. However, the pursuit of regeneration involving events is a practice that is poorly understood, controversial and risky. *Events and Urban Regeneration* is the first book dedicated to the use of events in regeneration. It explores the relationship between events and regeneration by analyzing a range of cities and a range of sporting and cultural events projects. It considers various theoretical perspectives to provide insight into why major events are important to contemporary cities. It examines the different ways that events can assist regeneration as well as problems and issues associated with this unconventional form of public policy. It identifies key issues faced by those tasked with using events to assist regeneration and suggests how practices could be improved in the future. The book adopts a multi-disciplinary perspective, drawing together ideas from the geography, urban planning and tourism literatures as well as from the emerging events and regeneration fields. It illustrates arguments with a range of international case studies placed within and at the end of chapters to show positive outcomes that have been achieved and examples of high profile failures. This timely book is essential reading for students and practitioners who are interested in events, urban planning, urban geography and tourism.

athletes with a disability compete alongside one another and non integrated events where athletes with a disability are separated by time but occurring in the same location Guided by a critical disability studies perspective the book highlights the strategic opportunity of sporting events to influence social change around community participation and attitudes and awareness about disability more broadly It also challenges assumptions about positive event legacies and suggests a need for a multi lateral approach to planning An important read for students researchers and scholars in the fields of sport policy sport development disability sport sport management disability studies and event studies *The Gender Equality Quest in*
