*Disaster Recovery Through the Lens of Justice* Alessandra Jerolleman, 2019-01-25 There has been increased attention to the topics of disaster recovery and disaster resilience over the past several years particularly as catastrophic events such as Hurricane Katrina and Superstorm Sandy have brought to light the increasing vulnerability of so many communities This manuscript brings together existing research along with policy analysis in order to look at disaster recovery through the lens of justice This includes understanding the mechanisms through which vulnerability is exacerbated and the extent to which the regulations and agency cultures drive this outcome While existing analyses have sought to understand the particular characteristics of both resilient and vulnerable communities there have been few attempts to understand the systemic inequities and injustice that is built into United States disaster policies programs and legislation This manuscript thus begins from the understanding that social and economic structures including land use policies and historic practices such as redlining have concentrated hazard risk into vulnerable zones whose inhabitants do not benefit from the very policies that create and increase their risk

**Ambulatory Surgery Principles and Practices** AORN., 2003

Disciplines, Disasters, and Emergency Management David A. McEntire, 2007 Disasters such as the 9 11 terrorist attacks the Indian Ocean Tsunami and Hurricane Katrina illustrate the salience and complexity of disasters Both scholars and practitioners therefore agree that we must take a more proactive and holistic approach to emergency management which should logically be derived from a sound understanding of the academic literature and the most pressing concerns facing professionals in the field today *Disciplines Disasters and Emergency Management* reviews what is known about catastrophic events from the standpoint of various academic areas of study The introductory chapter by the editor David A McEntire discusses the importance of and difficulties associated with multi and interdisciplinary research on disasters and emergency management Well known scholars such as Drabek Gibbs Pine Scanlon Sylves Waugh Zakour and others then join efforts with budding students who have recently been exposed to the disaster management profession Their review of our current level of

knowledge represents 23 disciplines including geography engineering sociology gerontology public administration international relations law environmental management criminal justice and information science etc The concluding chapter summarizes the contributions of various disciplines identifies potential research opportunities and describes ways to address future disaster problems Besides comparing the similarities and differences among the findings from diverse fields of study Disciplines Disasters and Emergency Management suggests that scholars may increase their comprehension of disasters by focusing attention on the unique concept of vulnerability Recommendations for disaster reduction also make this a useful book for professionals in emergency management Whether you are a seasoned expert in disaster research or a novice in emergency management this book will help you acquire cutting edge knowledge about disasters and emergency management
