Greenberg, 2006 Encyclopedia of Terrorist Natural and Man Made Disasters is the first and only reference compiling all major toxicological incidents both man made and environmental in nature Many of the man made incidents resulting from occupational or industrial accidents have also led to environmental contamination illness and death for a great number of victims Now for the first time these occurrences with hazardous material are documented in a single index Encyclopedia of Terrorist Natural and Man Made Disasters An ideal resource for emergency physicians EMS professionals public health professionals and toxicologists this encyclopedia describes incidents that can be traced through history Each event has been researched and reference citations are included With over 1200 entries the entire encyclopedia can be searched by source date or type of disaster Book includes a CD ROM Terror, Security, and Money John Mueller, Mark G. Stewart, 2011-10-07 In seeking to evaluate the efficacy of post 9 11 homeland security expenses which have risen by more than a trillion dollars not including war costs the common query has been Are we safer This however is the wrong question Of course we are safer the posting of a single security guard at one building s entrance enhances safety The correct question is Are any gains in security worth the funds expended In this engaging readable book John Mueller and Mark Stewart apply risk and cost benefit evaluation techniques to answer this very question This analytical approach has been used throughout the world for decades by regulators academics and businesses but as a recent National Academy of Science study suggests it has never been capably applied by the people administering homeland security funds Given the limited risk terrorism presents expenses meant to lower it have for the most part simply not been worth it For example to be considered cost effective increased American homeland security expenditures would have had each year to have foiled up to 1 667 attacks roughly like the one intended on Times Square in 2010 more than four a day Cataloging the mistakes that the US has made and continues to make in managing homeland security programs Terror Security and Money has the potential to redirect our efforts toward a more productive and far more cost effective course *Natural and Man-Made Catastrophes* S. Niggol Seo, 2019-01-14 A thorough explanation of the mathematical theories philosophies and economics of catastrophes with a view to how humanity should be prepared for events with catastrophic consequences This book presents a holistic view of natural and man made catastrophes from mathematical theories and philosophy through to economics and policy It is

both academic and applied in its approach offering both empirical evidence and academic reflections to give a new perspective on an ever developing topic and providing many examples of public policy and catastrophe responses from around the world

Natural and Man made Catastrophes Theories Economics and Policy Designs begins by introducing readers to numerous natural and man made catastrophes and how catastrophe theories have played a pivotal role in designing policies and responses to them It discusses hurricanes earthquakes nuclear disaster asteroid collision Large Hadron Collider artificial intelligence uncontrollable robots global warming infectious diseases without antibodies and bioterrorism It clarifies key mathematical and scientific theories such as catastrophe theory chaos singularity fractal tipping point unbounded variance fat tail and Feigenbaum constant on catastrophes The book goes on to examine ancient and contemporary philosophies that have played critical roles in humanity s understanding of catastrophic outcomes The book critically builds the economics of catastrophic events 1 by consolidating the catastrophe literature in natural sciences scientific theories and philosophy 2 by constructing global empirical catastrophe data and analytical models using historical data on hurricanes and earthquakes 3 and by critically reviewing policy experiences on the aforementioned catastrophic events Lays the foundation for the economic analyses and policy making on potential humanity universe threatening catastrophes Includes many examples of public policy and behavioral responses to catastrophes from around the world Provides a wide ranging commentary on crucial implications of the studies models and concepts of catastrophes Synthesizes the catastrophe literature in mathematical theories philosophical traditions economic analyses policy studies and contemporary concerns
