Disasters And The Networked Economy Routledge Studies In Development Economics:

Disasters and the Networked Economy J.M. Albala-Bertrand, 2013-05-02 In the wake of Katrina and Haiti it is evident that disaster response economic policy and development are intrinsically linked this book is a welcome intervention Albala Bertrand is a renowned expert in the area of disasters and development this book is the long awaited follow up to his 1993 book with Clarendon Press

Disasters and the Networked Economy J.M. Albala-Bertrand, 2013-05-02 Mainstream quantitative analysis and simulations are fraught with difficulties and are intrinsically unable to deal appropriately with long term macroeconomic effects of disasters In this new book J M Albala Bertrand develops the themes introduced in his past book *The Political Economy of Large Natural Disasters* Clarendon Press 1993 to show that societal networking and disaster localization constitute part of an essential framework to understand disaster effects and responses The author's last book argued that disasters were a problem of development rather than a problem for development This volume takes the argument forward both in terms of the macroeconomic effects of disaster and development policy arguing that economy and society are not inert objects but living organisms Using a framework based on societal networking and the economic localization of disasters the author shows that societal functionality defined as the capacity of a system to survive reproduce and develop is unlikely to be impaired by natural disasters This book will be of interest to scholars and practitioners involved in disaster analysis and response policy and will also be relevant to students of development economics

Journal of Economic Literature ,2014

Peripheral Visions of Economic Development Mario Garcia-Molina, Hans-Michael Trautwein, 2015-10-05 This book explores peripheral visions on economic development both in the sense that it deals with specific issues of economic development and underdevelopment in countries at the periphery of the world economy and in terms of its exploration of the economic thinking developed in those regions particularly in Latin America Bringing together an international group of historians of thought economic historians and development economists from Latin America Europe and other parts of the world this volume is highly credited and is an excellent contribution to development economic studies This book is divided into four parts Following the introduction the first set of papers describes the evolution of core periphery perspectives in key contributions by Raúl Prebisch Oskar Lange Albert Hirschman Celso Furtado and Homero Cuevas The second set discusses the links between unbalanced productive structures and external trade in peripheral countries The third set contains papers on critical episodes in the development of monetary and financial systems in Latin America during the 19th and 20th centuries The fourth set deals with geographical and institutional aspects of path dependence in the governance of external trade and in the development of liberties property rights and economic education in Europe Latin America and Africa Several chapters make use of hitherto unexplored archival material Other chapters draw attention to important episodes or literatures that have largely gone unnoticed in the English speaking world Yet others combine conceptual innovations with work on new historical data and other sources hitherto not utilized in such contexts This book is

ideal for those who study and research development economics history of economic thought and economic history especially in Latin America The Routledge Handbook of the Political Economy of the Environment Éloi Laurent, Klara Zwickl, 2021-10-27 Featuring a stellar international cast list of leading and cutting edge scholars The Routledge Handbook of the Political Economy of the Environment presents the state of the art of the discipline that considers ecological issues and crises from a political economy perspective This collective volume sheds new light on the effect of economic and power inequality on environmental dynamics and conversely on the economic and social impact of environmental dynamics The chapters gathered in this handbook make four original contributions to the field of political economy of the environment First they revisit essential concepts and methods of environmental economics in the light of their political economy Second they introduce readers to recent theoretical and empirical advances in key issues of political economy of the environment with a special focus on the relationship between inequality and environmental degradation a nexus that has dramatically come into focus with the COVID crisis Third the authors of this handbook open the field to its critical global and regional dimensions global issues such as the environmental justice movement and inequality and climate change as well as regional issues such as agriculture systems air pollution natural resources appropriation and urban sustainability Fourth and finally the work shows how novel analysis can translate into new forms of public policy that require institutional reform and new policy tools Ecosystems preservation international climate negotiations and climate mitigation policies all have a strong distributional dimension that chapters point to Pressing environmental policy such as carbon pricing and low carbon and energy transitions entail numerous social issues that also need to be accounted for with new analytical and technological tools This handbook will be an invaluable reference research and teaching tool for anyone interested in political economy approaches to environmental issues and ecological crises **Advances in Spatial and Economic Modeling of Disaster Impacts** Yasuhide Okuyama, Adam Rose, 2019-11-08 This book presents essential advances in analytical frameworks and tools for modeling the spatial and economic impacts of disasters In the wake of natural disasters such as Hurricane Katrina the Haiti Earthquake and the East Japan Earthquake and Tsunami as well as major terrorist attacks the book analyzes disaster impacts from various perspectives including resilience space time extensions and decision making strategies in order to better understand how and to what extent these events impact economies and societies around the world The contributing authors are internationally recognized experts from various disciplines such as economics geography planning regional science civil engineering and risk management Thanks to the insights they provide the book will benefit not only researchers in these and related fields but also graduate students disaster management professionals and other decision makers **Regional Research Frontiers - Vol. 1** Randall Jackson, Peter Schaeffer, 2017-04-17 This volume focuses on frontiers in regional research and identifies trends and future developments in the areas of innovation regional growth and migration It also addresses topics such as mobility regional forecasting and regional policy and includes expert contributions on disasters

China's War against the Many Faces of Poverty Jing Yang, Pundarik Mukhopadhaya, 2016-03-10 China's War against the Many Faces of Poverty measures multidimensional poverty in China and deprivation related to income education health issues living standards and social security The book adopts a well developed methodology using three different empirical datasets to analyse aspects of regional diversity across rural and urban and migrant populations of China The book also analyses the links between development policies considered by the government and the various facets of poverty in light of rapid economic growth and addresses important policy implications In the existing literature in depth research on multidimensional poverty in China is almost non existent This book is a pioneer study in this important field of research With its innovative approach in concepts and methodologies and in its analysis of policy implications make this book a definitive and valuable addition to the literature

Growth and Institutions in African Development Augustin K. Fosu, 2015-03-24 Recent years have seen a sustained research effort exploring the African development experience The extant literature has offered a large set of explanations as to why the African development

record has lagged behind that of other regions of the developing world This new volume brings international contributors together to focus on the role of growth and institutions First it provides brief evidence on the growth and institutional records as well as on development outcomes during the post independence period Second it targets certain growth determinants including industrial embeddedness innovation exchange rate regimes and environmental quality Third it sheds light on the dynamics and distribution of growth and on growth enhancing sectors of the economy Finally it investigates several issues of institutional development as well as institutions generating development outcomes Though focused on these two key areas the coverage strives to achieve a comprehensive analysis of how Africa's development may have been enhanced or undermined and to offer lessons for the future This volume is essential reading for all scholars of development economics and development studies

The Routledge Companion to Humanitarian Action Roger Mac Ginty, Jenny H Peterson, 2015-03-24 The Companion on Humanitarian Action addresses the political ethical legal and practical issues which influence reactions to humanitarian crisis It does so by exploring the daily dilemmas faced by a range of actors including policy makers aid workers the private sector and the beneficiaries of aid and by challenging common perceptions regarding humanitarian crisis and the policies put in place to address these Through such explorations it provides practitioners and scholars with the knowledge needed to both understand and improve upon current forms of humanitarian action The Companion will be of use to those interested a range of humanitarian programmes ranging from emergency medical assistance military interventions managing refugee flows and the implementation of international humanitarian law As opposed to addressing specific programmes it will explore five themes seen as relevant to understanding and engaging in all modes of humanitarian action The first section explores varying interpretations of humanitarianism including critical historical and political economic explanations as well as more practice based explorations focused on notions needs assessments and evaluation Following this readers will be exposed to the latest debates on a range of humanitarian principles including neutrality and sovereignty before exploring the key issues faced by the main actors involved in humanitarian crisis from international NGOs to local community based organizations The final two sections address what are seen as key dilemmas in regards to humanitarian action and emerging trends in the humanitarian system including the increasing role of social media in responding to crises Whilst not a how to guide the Companion contains many practical insights for policy makers and aid workers whilst also offering analytical insights for students of humanitarian action Indeed throughout the book readers will come to the realization that understanding and improving humanitarian action simultaneously requires both active critical reflection and an acceptance of the urgency and timeliness of action that is required for humanitarian assistance to have an impact on vital human needs Exploring a sector that is far from homogenous both practitioners and scholars alike will find the contributions of this book offers them a deeper understanding of the motivations and mechanics of current interventions but also insight into current changes and progress occurring in the field

of humanitarian practice *Catastrophe, Gender and Urban Experience, 1648-1920* Deborah Simonton, Hannu Salmi, 2016-10-04 As Enlightenment notions of predictability progress and the sense that humans could control and shape their environments informed European thought catastrophes shook many towns to the core challenging the new world view with dramatic impact This book concentrates on a period marked by passage from a society of scarcity to one of expenditure and accumulation from ranks and orders to greater social mobility from traditional village life to new bourgeois and even individualistic urbanism The volume employs a broad definition of catastrophe as it examines how urban communities conceived adapted to and were transformed by catastrophes both natural and human made Competing views of gender figure in the telling and retelling of these analyses women as scapegoats as vulnerable as victims even as cannibals or conversely as defenders organizers of assistance inspirers of men and men in varied guises as protectors governors and police heroes leaders negotiators and honorable men Gender is also deployed linguistically to feminize activities or even countries Inevitably however these tragedies are mediated by myth and memory They are not neutral events whose retelling is a simple narrative Through a varied array of urban catastrophes this book is a nuanced account that physically and metaphorically maps men and women into the urban landscape and the worlds of catastrophe *Development Economics through the Decades* Shahid Yusuf, 2008-12-16 This volume not only offers an invaluable retrospective of the World Bank's best thinking on development but also has the analytical caliber and policy insights to become an indispensable source for those dealing with the present and future growth and equity challenges faced by the developing countries Ernesto Zedillo **Modeling Spatial and Economic Impacts of Disasters** Yasuhide Okuyama, Stephanie E. Chang, 2013-06-29 This volume is dedicated to the memory of Barclay G Jones Professor of City and Regional Planning and Regional Science at Cornell University Over a decade ago Barclay took on a fledgling area of study economic modeling of disasters and nurtured its early development He served as the social science program director at the National Center for Earthquake Engineering Research NCEER a university consortium sponsored by the National Science Foundation and the Federal Emergency Management Agency of the United States In this capacity Barclay shepherded and attracted a number of regional scientists to the study of disasters He organized a conference held in the ill fated World Trade Center in September 1995 on The Economic Consequences of Earthquakes Preparing for the Unexpected He persistently advocated the importance of social science research in an establishment dominated by less than sympathetic natural scientists and engineers In 1993 Barclay organized the first of a series of sessions on Measuring Regional Economic Effects of Unscheduled Events at the North American Meetings of the Regional Science Association International RSAI This unusual nomenclature brought attention to the challenge that disasters largely unanticipated often sudden and always disorderly pose to the regional science modeling tradition The sessions provided an annual forum for a growing coalition of researchers where previously the literature had been fragmentary scattered and episodic Since Barclay's unexpected passing in 1997 we have continued this effort in his tradition

Community, Economy and COVID-19 Clifford J. Shultz, II, Don R. Rahtz, M. Joseph Sirgy, 2022-08-23 This volume explores the impact of the COVID 19 pandemic on the health safety and socioeconomic well being of community residents of selected countries around the world It is built on an overarching framework of studying community well being applied here to the analyses of one of the most significant crises of our time Most important are the lessons learned from the experiences in these countries including insights and recommendations on how to mitigate future pandemics Building on years of research each chapter is written by an accomplished scholar with interests and expertise on various assessments of community well being development in the country of study The authors share cases and analyses and highlight failures and successes they offer sound policy recommendations on how to restore the health safety and multidimensional wellness of community residents and how to decrease the likelihood and impact of future crises Some of the policy recommendations in this multi country compendium can be used to assist crisis prevention and recovery beyond pandemics The volume shows how the lessons learned and shared from community responses to the pandemic can provide critical and useful policy insights to shape best practices in mitigating other disasters like hurricanes floods earthquakes tornadoes wars riots acts of domestic and international terrorism weapons of mass destruction and industrial accidents This is a must read for researchers across the social sciences health sciences and management studies and for government and non government professionals involved in community health and well being

New Subjects and New Governance in India Ranabir Samaddar, Suhit K. Sen, 2014-03-14 This volume looks at the ways in which governance in the exercise of its strategies also acts as a process of production of subjects It argues that governance is not a one sided affair starting and ending with those who rule and govern producing fiat decrees and diktats but a productive process one that produces subjects of governance who in turn respond to the process and make the field of governance a contentious one Against the backdrop of the first transition of democracy in India from its origin in a colonial polity to the first phase of its independent life after the promulgation of the Indian Constitution in 1950 this volume explores the second transition towards developmental democracy examining the interrelations between globalisation development and structures of governance The volume suggests that while there is need to reflect on the governance of transition it is important to question how democracy negotiates this transition
