## **Disasters That Changed Australia:**

**Disasters That Changed Australia** Richard Evans, 2009-10-01 Australian history is full of disasters. Some are natural but many more are man-made results of individual or collective stupidity, reckless decisions or greed. In *Disasters That Changed Australia*, Richard Evans nominates the worst disasters in an engrossing, insightful account of what happened and why. Picture British General Douglas Haig through sheer arrogance and determination sending thousands of Australian men into swampy, disease-ridden enemy territory for no strategic gain. Or a feral legion of rabbits let loose on the environment, turning furry friends into an uncontrollable plague. Including Cyclone Tracy, Black Friday, the Snowy Mountains Scheme, and the destruction of megafauna thousands of years ago, these are just many of the debacles that have defined Australia. Richard Evans goes beneath the familiar stories and myths and urges us to rethink how we respond to disasters to avoid making the same mistakes again. *Disasters that Changed Australia* Richard Evans, 2009. From natural phenomenon such as Cyclone Tracy and the Ash Wednesday and Black Friday fires to key moments in our military history such as Flanders in 1917 and the fall of Singapore, this is an essential guide to understanding the people, the ideas, and the events that defined the course of Australia's history. *Handbook Of Disaster Risk Reduction & Management: Climate Change And Natural Disasters* Christian N Madu, 2017-07-25. Climate change is increasingly of great concern to the world community. The earth has witnessed the buildup of greenhouse gases (GHG) in the atmosphere, changes in biodiversity, and more occurrences of natural disasters. Recently, scientists have begun to shift their emphasis away from curbing carbon dioxide emission to adapting to carbon dioxide emission. The increase in natural disasters around the world is unprecedented in earth's history, and these disasters are often associated to climate changes. Many nations along the coastal lines are threatened by massive floods and tsunamis. Earthquakes are increasing in intensity, and erosion and droughts are problems in many parts of the developing countries. This book is therefore to investigate ways to prepare and effectively manage these disasters and possibly reduce their impacts. The focus is on mitigation strategies and policies that will help to reduce the impacts of natural disasters. The book takes an in-depth look at climate change and its association to socio-economic development and cultures, especially in vulnerable communities, and investigates how communities can develop resilience to disasters. A balanced and a multiple perspective approach to manage the risks associated with natural disasters is offered by engaging authors from the entire globe to proffer solutions. **Climate Change, Ecological Catastrophe, and the Contemporary Postcolonial Novel** Justyna Poray-Wybranowska, 2020-12-21. *Climate Change, Ecological Catastrophe, and the Contemporary Novel* responds to the critical need for transdisciplinary research on the relationship between colonialism and catastrophe. It represents the first sustained analysis of the connection between colonial legacy and present-day ecological catastrophe in postcolonial fiction. Analyzing contemporary South Asian and South Pacific novels that grapple with climate change and catastrophe, environmental exploitation, and instability, and human-nonhuman relationships in degraded environments, it offers a much

needed corrective to dominant narratives about climate crisis and the everyday Highlighting the contributions of literary fiction from the postcolonial South to the growing field of the environmental humanities this book reconsiders the novel's relationship with climate change and the contemporary environmental imaginary Counter to dominant current theoretical discourses it demonstrates that the novel form is ideally suited to literary and imaginative engagements with climate change and ecological catastrophe The six case studies it examines connect contemporary ecological vulnerability to colonial legacies reveal the critical role animals and the environment play in literary imaginations of post catastrophe recovery and together constellate a decolonial perspective on ecological catastrophe in the era of climate change Drawing on the work of Indigenous authors and scholars who write about and against the Anthropocene this book displaces conventional ways of thinking about the relationship between the mundane and the catastrophic and promotes greater dialogue between the largely siloed fields of postcolonial Indigenous and disaster studies
