Rohmann,2016-07-25 It is estimated that only a small fraction less than 1 per cent of ancient literature has survived to the present day The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by academics In an approach that presents evidence for the role played by Christian institutions writers and saints this book analyses a broad range of literary and legal sources some of which have hitherto been little studied Paying special attention to the problem of which genres and book types were likely to be targeted the author argues that in addition to heretical magical astrological and anti Christian books other less obviously subversive categories of literature were also vulnerable to destruction censorship or suppression through prohibition of the copying of manuscripts These include texts from materialistic philosophical traditions texts which were to become the basis for modern philosophy and science This book examines how Christian authorities theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world *Angels and Earthly Creatures*

Claire M. Waters,2004-01-14 Texts by for and about preachers from the twelfth to the fourteenth centuries reveal an intense interest in the preacher s human nature and its intersection with his angelic role Far from simply denigrating embodiment or excluding it from consideration these works recognize its centrality to the office of preacher and the ways in which preachers like Christ needed humanness to make their performance of doctrine effective for their audiences At the same time the texts warned of the preacher s susceptibility to the fleshly failings of lust vainglory deception and greed Preaching s problematic juxtaposition of the earthly and the spiritual made images of women preachers real and fictional key to understanding and exploiting the power as well as the dangers of the feminized flesh Addressing the underexamined bodies of the clergy in light of both medieval and modern discussions of female authority and the body of Christ in medieval culture *Angels and Earthly Creatures* reinserts women into the history of preaching and brings together discourses that would have been intertwined in the Middle Ages but are often treated separately by scholars The examination of handbooks for preachers as literary texts also demonstrates their extensive interaction with secular literary traditions explored here with particular reference to Chaucer s *Canterbury Tales* Through a close and insightful reading of a wide variety of texts and figures including Hildegard of Bingen Birgitta of Sweden and Catherine of Siena Waters offers an original examination of the preacher s unique role as an intermediary standing between heaven and earth between God and people participating in and responsible to both sides of that divide [The Pursuit of Belief - Christian Classics Collection](#) Johann Wolfgang von Goethe,Martin Luther,Henryk Sienkiewicz,Dante Alighieri,Henry Van Dyke,David Hume,James Allen,Ralph Waldo Emerson,Andrew Murray,John

Discourse and Practice Frank Reynolds, David Tracy, 1992-05-14 Discourse and Practice strives to stretch the boundaries of commonly accepted notions of philosophical discourse in order to introduce comparative considerations It is united by a concern to tease out the

philosophical discourse and practices which inhere in seemingly unphilosophical texts These texts range from ethnographical materials to mythical and fictive narratives and finally to explicitly theoretical traditions Each author in attending to the details of his or her area study strives to demonstrate the implicit and explicit philosophical agendas at play The comparative examples offer valuable insights for how discourse can be redefined One consistent assumption presented here is that the element of practice which has long been posed in opposition to theory must be treated as an integral aspect of the philosophical import of any tradition Historical traditions covered include East Asia Papua New Guinea and Tibet as well as the more familiar territory of Western disciplinary fields

Rhetorical Delivery as Technological Discourse Ben McCorkle, 2012-01-19 According to Ben McCorkle the rhetorical canon of delivery traditionally seen as the aspect of oratory pertaining to vocal tone inflection and physical gesture has undergone a period of renewal within the last few decades to include the array of typefaces color palettes graphics and other design elements used to convey a message to a chosen audience McCorkle posits that this redefinition while a noteworthy moment of modern rhetorical theory is just the latest instance in a historical pattern of interaction between rhetoric and technology In *Rhetorical Delivery as Technological Discourse A Cross Historical Study* McCorkle explores the symbiotic relationship between delivery and technologies of writing and communication Aiming to enhance historical understanding by demonstrating how changes in writing technology have altered our conception of delivery McCorkle reveals the ways in which oratory and the tools of written expression have directly affected one another throughout the ages To make his argument the author examines case studies from significant historical moments in the Western rhetorical tradition Beginning with the ancient Greeks McCorkle illustrates how the increasingly literate Greeks developed rhetorical theories intended for oratory that incorporated writerly tendencies diminishing delivery's once prime status in the process Also explored is the near eradication of rhetorical delivery in the mid fifteenth century the period of transition from late manuscript to early print culture and the implications of the burgeoning print culture during the nineteenth century McCorkle then investigates the declining interest in delivery as technology designed to replace the human voice and gesture became prominent at the beginning of the 1900s Situating scholarship on delivery within a broader postmodern structure he moves on to a discussion of the characteristics of contemporary hypertextual and digital communication and its role in reviving the canon while also anticipating the future of communication technologies the likely shifts in attitude toward delivery and the implications of both on the future of teaching rhetoric *Rhetorical Delivery as Technological Discourse* traces a long view perspective of rhetorical history to present readers a productive reading of the volatile treatment of delivery alongside the parallel history of writing and communication technologies This rereading will expand knowledge of the canon by not only offering the most thorough treatment of the history of rhetorical delivery available but also inviting conversation about the reciprocal impacts of rhetorical theory and written communication on each other throughout this history

Making Christians Denise Kimber Buell, 2020-11-10 How

did second century Christians vie with each other in seeking to produce an authoritative discourse of Christian identity In this innovative book Denise Buell argues that many early Christians deployed the metaphors of procreation and kinship in the struggle over claims to represent the truth of Christian interpretation practice and doctrine In particular she examines the intriguing works of the influential theologian Clement of Alexandria ca 150 210 c e for whom cultural assumptions about procreation and kinship played an important role in defining which Christians have the proper authority to teach and which kinds of knowledge are authentic Buell argues that metaphors of procreation and kinship can serve to make power differentials appear natural She shows that early Christian authors recognized this and often turned to such metaphors to mark their own positions as legitimate and marginalize others as false Attention to the functions of this language offers a way out of the trap of reconstructing the development of early Christianity along the axes of heresy and orthodoxy while not denying that early Christians employed this binary Ultimately Buell argues strategic use of kinship language encouraged conformity over diversity and had a long lasting effect both on Christian thought and on the historiography of early Christianity A perceptive and closely argued contribution to early Christian studies Making Christians also branches out to the areas of kinship studies and the social construction of gender
