**A Durkheimian Analysis and Synthesis of Four Contemporary Approaches to Moral Education** Keiichi Ito,1993 The purpose of this study was to analyze four contemporary approaches to moral education from the sociological perspective of Durkheim These four approaches were inculcation values clarification the moral discussion approach and the just community approach In this study Durkheim s theory of morality and moral education were identified and the parameters were selected from the key concepts of Durkheim The four approaches were analyzed by seven parameters transmitting social values teaching discipline and moral conduct stressing the group or society emphasizing altruism or affective components of morality imposing values prior to autonomy the teacher as an authority and a socializer and the child as a reactor and an asocial being Results of the analyses indicated that inculcation and the just community approach had several parameters of moral education in common with Durkheim because both of them accepted the socialization process which was the fundamental concept of Durkheim s education theory On the contrary values clarification and the moral discussion approach had nothing in common with Durkheim because they focused on individual moral learning or value clarifying and rejected the teaching of the content of values The conclusion reached was that a practical moral education such as the just community approach needed to employ Durkheim s notion of socialization However the limitations of Durkheim s theory which missed the existence of spontaneous relationships among children were also pointed out Consequently a synthesis of the four approaches involved respect for the child s spontaneity and peer relationship within the framework of Durkheim Finally an outline of an integrated moral education program was proposed

*The Development of Durkheim's Social Realism* Robert Alun Jones,1999-11-04 Drawing on the kind of historicist perspective encouraged by Quentin Skinner and Richard Rorty this book explores the development of Durkheim s social realism Durkheim argued that social facts should be studied as real concrete things but Professor Jones argues that his social realism was less a sociological method than a way of speaking and thinking about social phenomena through which Durkheim hoped to secure the allegiance of French citizens to the Third Republic Professor Jones s book based on many years research in this area takes advantage for the first time of newly discovered lecture notes from Durkheim s philosophy class of 1883 4 and explores the significance of German social science in Durkheim s thought The Development of Durkheim s Social Realism will be of immense value to graduate students and scholars in sociology social theory social and political philosophy and
