for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies
