arguing that normative moral theories are attempts to develop optimal solutions to the problem of cooperation He claims that Rawlsian Contractarianism leads to the Maximin principle the action that maximizes the minimum value and that the Maximin principle is the most effective solution to the problem of cooperation He contrasts the Maximin principle with other principles and shows how they can often produce non cooperative results Using real world examples such as an autonomous vehicle facing a situation where every action results in harm home care machines and autonomous weapons systems Leben contrasts Rawlsian algorithms with alternatives derived from utilitarianism and natural rights libertarianism Including chapter summaries and a glossary of technical terms Ethics for Robots is essential reading for philosophers engineers computer scientists and cognitive scientists working on the problem of ethics for autonomous systems Philosophical Debates Steven M. Cahn, 2021-05-04 This volume completes a trilogy of Steven M Cahn s shorter writings that includes The Road Traveled and Other Essays 2019 and A Philosopher s Journey 2020 Included here are his contributions to three philosophical debates first whether events are fated to occur second whether God is knowable and third whether morality can conflict with happiness The book contains not only Cahn s essays but also edited versions of the writings to which he is responding thereby putting his remarks into context and rendering them accessible to all These pieces make clear why Professor Cahn is regarded as one of the leading philosophy teachers of his generation Exploring Philosophy of Religion Steven M. Cahn, 2016 In this remarkably accessible concise and engaging introduction to the philosophy of religion Steven M Cahn brings together a rich and balanced collection of sixty six classic and contemporary readings This unique anthology features a clear well organized structure and careful editing of many articles in order to sharpen their focus and make them understandable to students with little or no background in philosophy The book also reflects the importance of women s contributions to the field 40% of the contemporary readings are by women In addition topics often minimized in other collections are covered in more depth here including forgiveness and love ritual prayer and worship gender speaking of God and the afterlife **Exploring Philosophy of Religion** Steven M. On Moral Law and Quest for Selfhood Mohan Parasain,2016-07-15 This book offers an original intersection of concepts from Immanuel Kant s moral command ethics and S ren Kierkegaard s existential ethics The Kantian formulation of moral law is based on theoretical ground while Kierkegaardian ethics of the quest for selfhood views it as the very act of living The present work provides an account of both these perspectives and questions whether these approaches to morality are mutually exclusionary Using Slavoj i ek s parallax view in the realm of morality it argues that moral philosophy must engage with a constant critique of difference around which the transformation of our various perspectives to morality revolves This work appeals for furtherance of the conversation model and participation of perspectives to transcend positional confinement It advocates the traversing of the ethical parallax to allow for intellectual openness and an empathetic perception of the other Engaging and well researched this book will be of interest to scholars and researchers of ethics political philosophy and continental philosophy

Free Will, Neuroethics, Psychology and Theology Geran F. Dodson,2020-10-06 The topic of human free will has received more attention in the past several years due to the important discoveries of neuroscience but no consensus of opinion is evident in related disciplines The traditional approach to understanding free will in philosophy employs conceptual analysis to determine whether humans have freedom of choice Theology affirms that every person has free choice although God is somehow behind all human decisions Evolutionary psychology points to human behavior as the product of biological processes and antecedent events And neuroethics attempts to define what it means to be a thinking moral agent by investigating how neurons in the brain and chemical interactions combine to produce conscious actions An assessment and evaluation of these various positions is given in light of the evidence The issue of whether a person can be held morally responsible for their actions hinges on whether those actions originate from free will or are the result of determinism Theology makes assumptions of the existence of an absolute deity that has a hand in human decision making but there is no agreement regarding the nature of that intervention Recent scientific discoveries confront traditionally held religious beliefs and necessitate the creation of a new theology and articles of faith
