A Review of the Environmental Protection Agency's Science to Achieve Results Research Program National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on the Review of Environmental Protection Agency's Science to Achieve Results Research Grants Program, 2017-08-24. Environmental research has driven landmark improvements that led to the protection of human and ecosystem health. Recognizing the value of knowledge generated by environmental research and the ingenuity within academic and nonprofit institutions, the US Environmental Protection Agency (EPA) created a program known as Science to Achieve Results or STAR in 1995. STAR is EPA's primary competitive extramural grants program. A Review of the Environmental Protection Agency's Science to Achieve Results Research Program assesses the program's scientific merit, public benefits, and overall contributions in the context of other relevant research and recommends ways to enhance those aspects of the program. This report also considers the conclusions and recommendations of a prior National Research Council review of the STAR program. 2003. The STAR program's research priorities in light of the nation's environmental challenges and the effects of recent STAR funding trends on obtaining scientific information needed to protect public health and the environment.

Handbook of Indoor Air Quality Yinping Zhang, Philip K. Hopke, Corinne Mandin, 2022-11-23. People live in indoor environment about 90% of lifetime and an adult inhales about 15 kg air each day over 75% of the human body's daily mass intake (air, food, water). Therefore, indoor air quality (IAQ) is very important to human health. This book provides the basic knowledge of IAQ and highlights the research achievements in the past two decades. It covers the following 12 sections: introduction, indoor air chemicals, indoor air particles, measurement and evaluation, source/sink characteristics, indoor chemistry, human exposure to indoor pollutants, health effects and health risk assessment, IAQ and cognitive performance, standards and guidelines, IAQ control, and air quality in various indoor environments. It provides a combination of an introduction to various aspects on IAQ, studies, the current state of knowledge, various advances, and the perspective of IAQ studies. It will be very helpful for the researchers and technicians in the IAQ and the related fields. It is also useful for experts in other fields and general readers who want to obtain a basic understanding of and research advances in the field of IAQ.

group of experts in IAQ research have been recruited to write the chapters Their research interests and experience cover the scope of the book In addition some experienced experts in IAQ field have been invited as advisors or reviewers to give their comments suggestions and revisions on the handbook framework and the chapter details Their contribution guarantees the quality of the book We are very grateful to them Last but not least we express our heartfelt thanks to Prof Spengler Harvard University for writing the foreword of the current Handbook of Indoor Air Quality both as a pioneer scientist who contributed greatly to indoor air science and as an Editor in chief of Handbook of Indoor Air Quality 2001 1st ed New York McGraw Hill In addition to hard copies the book is also published online and will be updated by the authors as needed to keep it aligned with current knowledge These salient features can make the handbook fresh with the research development

Anthropocene Unseen Cymene Howe, Anand Pandian, 2020 The idea of the Anthropocene often generates an overwhelming sense of abjection or apathy It occupies the imagination as a set of circumstances that counterpose individual human actors against ungraspable scales and impossible odds There is much at stake in how we understand the implications of this planetary imagination and how to plot paths from this present to other less troubling futures With *Anthropocene Unseen: A Lexicon* the editors aim at a resource helpful for this task a catalog of ways to pluralize and radicalize our picture of the Anthropocene to make it speak more effectively to a wider range of contemporary human societies and circumstances Organized as a lexicon for troubled times each entry in this book recognizes the gravity of the global forecasts that invest the present with its widespread air of crisis urgency and apocalyptic possibility Each also finds value in smaller scales of analysis capturing the magnitude of an epoch in the unique resonances afforded by a single word The Holocene may have been the age in which we learned our letters but we are faced now with circumstances that demand more experimental plasticity Alternative ways of perceiving a moment can bring a halt to habitual action opening a space for slantwise movements through the shock of the unexpected Each small essay in this lexicon is meant to do just this drawing from anthropology literary studies artistic practice and other humanistic endeavors to open up the range of possible action by contributing some other concrete way of seeing the present Each entry proposes a different way of conceiving this Earth from some grounded place always in a manner that aims to provoke a different imagination of the Anthropocene as a whole The Anthropocene is a world engulfing concept drawing every thing and being imaginable into its purview both in terms of geographic scale and temporal duration Pronouncing an epoch in our own name may seem the ultimate act of apex species self aggrandizement a picture of the world as dominated by ourselves Can we learn new ways of being in the face of this challenge approaching the transmogrification of the ecosphere in a spirit of experimentation rather than catastrophic risk and existential dismay This lexicon is meant as a site to imagine and explore what human beings can do differently with this time and with its sense of peril Cymene Howe is Associate Professor in the Department of Anthropology and founding faculty of the Center for Energy and Environmental Research in the Human Sciences CENHS at Rice University She is the author of *Intimate Activism* Duke
