Extinction In Our Times Global Amphibian Decline:

Extinction in Our Times James P. Collins, Martha L. Crump, Thomas E. Lovejoy III, 2009-07-07 For over 350 million years thousands of species of amphibians have lived on earth but since the 1990s they have been disappearing at an alarming rate in many cases quite suddenly and mysteriously What is causing these extinctions What role do human actions play in them What do they tell us about the overall state of biodiversity on the planet In *Extinction in Our Times* James Collins and Martha Crump explore these pressing questions and many others as they document the first modern extinction event across an entire vertebrate class using global examples that range from the Sierra Nevada of California to the rainforests of Costa Rica and the Mediterranean coast of North Africa Joining scientific rigor and vivid storytelling this book is the first to use amphibian decline as a lens through which to see more clearly the larger story of climate change conservation of biodiversity and a host of profoundly important ecological evolutionary ethical philosophical and sociological issues

Reproductive Technologies and Biobanking for the Conservation of Amphibians Aimee J. Silla, Andy J. Kouba, Harold Heatwole, 2022-10-03 How to decelerate loss of global biodiversity is one of the greatest challenges of our generation Reproductive technologies have enormous potential to assist the recovery of species by enhancing reproductive output facilitating genetic management and supporting reintroduction of threatened species Of particular value are cryopreservation technologies coupled with the establishment of global gene banks to conserve in perpetuity the remaining extant genetic diversity of threatened amphibians *Reproductive Technologies and Biobanking for the Conservation of Amphibians* brings together leading experts in the field to provide a comprehensive overview of current best practices summarise technological advancements and present a framework for facilitating the integration of reproductive technologies and biobanking into conservation breeding programs for threatened amphibians It is an invaluable reference for the next generation of conservation practitioners captive breeding facilities researchers and policy makers involved with biodiversity conservation

Examining Energy and the Environment around the World Bruce E. Johansen, 2019-04-01 This volume addresses ten issues pertaining to energy and

the environment such as climate change fossil fuels endangered species and renewable energy and examines how these issues are affecting countries around the world In the industrial age first powered by coal and then more often by oil environmental degradation nearly inevitably followed resource exploitation and energy production This book examines environmental issues in specific countries around the world as well as solutions some of these countries have discovered in order to help save the environment This volume includes 10 chapters each addressing a specific issue relating to energy and the environment as it pertains to a variety of countries including toxic chemicals pollution deforestation and climate change Each chapter begins with an introduction to the issue Following the chapter introduction each chapter highlights that issue in eight countries and provides historic perspective This work provides an overview for high school students and college students at the undergraduate level on 10 important topics that address matters relating to energy and the environment in the 21st century

An Introduction to the Amphibians of Ecuador Luis A. Coloma, William E. Duellman, 2024-12-27 An Introduction to the Amphibians of Ecuador is the first of four volumes which are comprehensive well illustrated and authoritative works making them invaluable to biologists conservationists and others This initial volume delves into the cultural history of amphibians encompassing ethnobatrachology and folklore while summarizing the amphibian iconography found in Ecuadorian archaeology Moreover it covers topics such as bioprospecting sustainable management and biotrade activities The history and present state of amphibian biology research are also addressed Furthermore it explores in comprehensive detail the rich amphibian diversity of Ecuador providing a thorough review of biogeography amphibian declines and conservation Subsequent volumes list the characteristics of each species define each taxon and compare them to similar other species Natural history and reproductive behavior where known are described as are data on vocalizations larvae and ontogenetic changes Amphibian distributions are illustrated with physiographic maps with dots Each volume addresses the declines extinctions and conservation status of each species and provides notations of their occurrence in reserves

KEY FEATURES Summarizes the ethnozoological aspects of amphibians Provides a thorough history of research Introduction to three volumes providing accounts for each of the 3 orders 19 families 78 genera and over 650 species from Ecuador

Necroculture Charles Thorpe, 2016-06-24 In this book the author draws on Karl Marx s writings on alienation and Erich Fromm s conception of necrophilia in order to understand these aspects of contemporary culture as expressions of the domination of the living by the dead under capitalism Necroculture is the ideological reflection and material manifestation of this basic feature of capitalism the rule of dead capital over living labor The author argues that necroculture represents the subsumption of the world by vampire capital

Encyclopedia of Biodiversity, Revised Edition Stanley Rice, 2020-06-01 Praise for the previous edition make s high level scientific concepts accessible to secondary students Library Journal clearly written and well organized School Library Journal Fulfilling educational benchmarks identified by the National Academy of Sciences this encyclopedia is an excellent choice for both public and academic libraries Recommended

Choice a thorough and informative work provide s accessible information There is simply no other work that compares to this High school and public libraries will welcome such a well researched title Booklist The text is suitable for high school students but advanced enough for adult readers too presents important biodiversity topics a handy overview for term papers and class presentations Library Journal Biodiversity and ecology are founded in evolutionary science In order to understand why species of organisms occupy different parts of the world it is important to comprehend how they evolved Encyclopedia of Biodiversity Revised Edition examines this evolutionary framework with the help of more than 150 entries and five essays averaging at least 2 000 words each High school teachers can use these entries grouped by topic to meet many of the science education goals established by the National Academy of Sciences Written by a leading expert in the field this comprehensive full color encyclopedia makes information about groups of organisms from bacteria to mammals and about ecological concepts and processes such as biogeography and ecological succession clearly and readily available to students and the general public Tables at the end of each entry have a consistent structure allowing readers to see how environmental conditions and biodiversity have changed through evolutionary time Entries include Acid rain and fog Biodiversity in the Jurassic period Darwin s finches Gal pagos Islands Peter and Rosemary Grant Life in bogs Natural selection Population genetics Seedless plants Tropical rainforests and deforestation Alfred Russel Wallace

Green Criminology and Green Theories of Justice Michael J. Lynch, Michael A. Long, Paul B. Stretesky, 2019-12-11 This book offers an alternative analysis of the various theories and dimensions of green and environmental justice which are rooted in political economy Much green criminological literature sidelines political economic theoretical insights and therefore with this work the authors enrich the field by vigorously exploring such perspectives It engages with a number of studies relevant to a political economic approach to justice in order to make two key arguments that capitalism has produced profound ecological injustices and that the concept of ecological justice human and ecological rights itself needs critiquing Green Criminology and Green Theories of Justice is a timely text which urges the field to revisit its radical roots in social justice while broadening its disciplinary horizons to include a meaningful analysis of political economy and its role in producing and responding to environmental harm and injustice

Amphibian Species in Environmental Risk Assessment Strategies Marcelo L Larramendy, Guillermo Eli Liwszyc, 2023-12-18 With the expansion of human settlements and the environmental changes brought about by human activity and pollutants toxicology and risk assessment of amphibian species has become increasingly of interest to toxicologists involved in environmental research This book focuses specifically on environmental risk assessment in premetamorphic stages and adults of amphibians Amphibian ecotoxicology is not totally understood in scientific research and as such environmental risk assessment in these vertebrates is an area of rapidly growing interest It has the potential to answer some of the questions regarding risks to our environment An ideal companion this book will be useful to toxicologists and ecologists investigating risk assessment in the environments of amphibians while also of interest to those working in

The Great Acceleration J. R. McNeill, Peter Engelke, 2016-04-04 The pace of energy use greenhouse gas emissions and population growth has thrust the planet into a new age the Anthropocene Humans have altered the planet's biogeochemical systems without consciously managing them *The Great Acceleration* explains the causes consequences and uncertainties of this massive uncontrolled experiment *Amphibian Biology, Volume 11, Part 4* Harold Heatwole, John W. Wilkinson, 2015-01-02 Amphibian species around the world are unusually vulnerable to a variety of threats by no means all of which are properly understood Volume 11 in this major series is published in parts devoted to the causes of amphibian decline and to conservation measures in regions of the world This volume Part 4 in the series is concerned with Southern Europe Italy Malta Croatia Slovenia Serbia Montenegro Bosnia and Herzegovina Macedonia Albania Greece Romania Hungary Bulgaria Turkey and Cyprus Each chapter has been written by experts from each country describing the ecological background and the conservation status of affected species with an emphasis on native species As well as infectious diseases and parasites threats take the form of introduced and invasive species pollution destruction and alteration of habitat and climatic change These are discussed as they affect each species All these countries have monitoring schemes and conservation programs whose origins and activities are described Recommendations for action are also made Edited by leading scholars in the field Volume 11 when complete will provide a definitive survey of the amphibian predicament and a stimulus to further research with the objective of arresting the global decline of an entire class of animal *Ranaviruses*

Matthew J. Gray,V. Gregory Chinchar,2015-04-27 This is the first book on ranaviruses Ranaviruses are double stranded DNA viruses that cause hemorrhagic disease in amphibians reptiles and fish They have caused mass die offs of ectothermic vertebrates in wild and captive populations around the globe There is evidence that this pathogen is emerging and responsible for population declines in certain locations Considering that amphibians and freshwater turtles are suitable hosts and the most imperiled vertebrate taxa in the world ranaviruses can have significant impacts on biodiversity and ecosystem function Additionally many fish that are raised in aquaculture facilities and traded internationally are suitable hosts thus the potential economic impact of ranaviruses is significant Ranaviruses also serve as a model for replication and gene function of large double stranded DNA viruses There is an urgent need to assemble the contemporary information on ranaviruses and provide guidance on how to assess their threats in populations Through the Global Ranavirus Consortium 24 experts from six countries were organize to write this volume the first book on ranaviruses The book begins with a discussion on the global extent of ranaviruses case histories of infection and disease in ectothermic vertebrates and current phylogeny Basic principles of ranavirus ecology and evolution are covered next with a focus on host pathogen interactions and how the virus emerges in its environment There are two chapters that will discuss the molecular biology of ranaviruses host response to infection and the genes responsible for immune system evasion One chapter establishes standards for testing for infection and diagnosing ranaviral disease The book ends by providing guidance on how to design ranavirus surveillance studies and analyze data to determine risk and discussing the role of the Global Ranavirus Consortium in organizing research and outreach activities

Using the Biological Literature Diane Schmidt,2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three centuries Using the Biological Literature A Practical Guide Fourth Edition is an annotated guide to selected resources in the biological sciences presenting a wide ranging list of important sources This completely revised edition contains numerous new resources and descriptions of all entries including textbooks The guide emphasizes current materials in the English language and includes retrospective references for historical perspective and to provide access to the taxonomic literature It covers both print and electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition

Evolutionary Ecology of Amphibians Gregorio Moreno-Rueda,Mar Comas,2023-06-30

Amphibians are the oldest tetrapod group and show an astonishing diversity in lifestyles many of them being unique However globally they are on a decline Hence their study is fundamental to understanding the evolution of diversity and conserving them This book authored by experts from around the world summarizes the current knowledge on the evolutionary ecology of amphibians The book treats biological concepts related to the evolution ecology physiology immunology behaviour and morphology of amphibians in their different states This book constitutes an actualized work indispensable for evolutionary ecologists and herpetologists *The Routledge Companion to Environmental Ethics* Benjamin Hale, Andrew Light, Lydia Lawhon, 2022-07-29 Written for a wide range of readers in environmental science philosophy and policy oriented programs The Routledge Companion to Environmental Ethics is a landmark comprehensive reference work in this interdisciplinary field Not merely a review of theoretical approaches to the ethics of the environment the Companion focuses on specific environmental problems and other concrete issues Its 65 chapters all appearing in print here for the first time have been organized into the following eleven parts I Animals II Land III Water IV Climate V Energy and Extraction VI Cities VII Agriculture VIII Environmental Transformation IX Policy Frameworks and Response Measures X Regulatory Tools XI Advocacy and Activism The volume not only explains the nuances of important core philosophical positions but also cuts new pathways for the integration of important ethical and policy issues into environmental philosophy It will be of immense help to undergraduate students and other readers coming up to the field for the first time but also serve as a valuable resource for more advanced students as well as researchers who need a trusted resource that also offers fresh policy centered approaches

Global Interdependence Akira Iriye, 2014-01-14 Global Interdependence provides a new account of world history from the end of World War II to the present an era when transnational communities began to challenge the long domination of the nation state In this single volume survey leading scholars elucidate the political economic cultural and environmental forces that have shaped the planet in the past sixty years Offering fresh insight into international politics since 1945 Wilfried Loth examines how miscalculations by both the United States and the Soviet Union brought about a Cold War conflict that was not necessarily inevitable Thomas Zeiler explains how American free market principles spurred the creation of an entirely new economic order a global system in which goods and money flowed across national borders at an unprecedented rate fueling growth for some nations while also creating inequalities in large parts of the Middle East Latin America and Africa From an environmental viewpoint J R McNeill and Peter Engelke contend that humanity has entered a new epoch the Anthropocene era in which massive industrialization and population growth have become the most powerful influences upon global ecology Petra Goedde analyzes how globalization has impacted indigenous cultures and questions the extent to which a generic culture has erased distinctiveness and authenticity She shows how paradoxically the more cultures blended the more diversified they became as well Combining these different perspectives volume editor Akira Iriye presents a model of transnational historiography in which individuals and groups enter history not primarily as citizens of a country but as

migrants tourists artists and missionaries actors who create networks that transcend traditional geopolitical boundaries

How to Write a PhD in Biological Sciences John Measey, 2021-11-29 You don't have to be a genius to write a PhD. Of course it will always involve a lot of hard work and dedication but the process of writing is a whole lot easier if you understand the basic ground rules. This book is a guide through the dos and don'ts of writing a PhD. The Golden Toad Trevor Ritland, Kyle Ritland, 2025-06-17 The Costa Rican cloud forest a mysterious amphibian killer and a vanished species with support from Leonardo DiCaprio's Re-wild campaign twin documentarians and environmental writers follow their father's footsteps into the heart of the modern extinction crisis. As young boys Trevor and Kyle Ritland were fascinated by the magnificent golden toad of Costa Rica a brilliant species their biologist father showed

them in his projector's slide shows Native to only one wind battered ridgeline high on the continental divide above the cloud forests of Monteverde thousands of golden toads would congregate for a few weeks each year in ephemeral pools among the twisted roots to mate deposit their offspring and retreat again beneath the earth But from one year to the next the toads disappeared without a trace the last of them vanished more than thirty years ago Since then only rumors remain alleged sightings by local residents which beg the question could the golden toad still be alive In *The Golden Toad* Trevor and Kyle set off to investigate an environmental mystery with unexpected revelations a story that speaks to our own collective and uncertain future Guided by Costa Rican naturalists including the last person to have seen the golden toad alive Trevor searches for survivors while Kyle hunts the killer and their paths lead them through an imperiled forest a deadly pandemic and a changing climate finally intertwining at the site of the golden toad's last emergence deep in Monteverde's Bosque Eterno de Los Niños The toad's demise becomes a haunting foretelling of approaching ecological crisis but with a gold lining on the horizon *The Golden Toad* changes the conversation around extinction climate change and conservation while exploring environmental grief resurrection and hope in a changing world
