Extraterrestrial Life - Galactic Humans Jefferson Viscardi, 2013-02-18 There are indeed too many inhabited worlds schoolrooms to name or number and in this upcoming book we have particularly focused on communicating with those who look primarily exactly like us and who exist spread out throughout this and other galaxies The human template used by the souls to learn in each of these planets have been perfected according to the collective level of spiritual growth and also to the conditions presented by each planet From birthing to reproduction patterns of humans to beliefs and occupations A new world of variables to the galactic human s ways of life is unveiled magically as one flips through the pages Presentations aside Treb Bor yit NE who also functions in the capacity of a spiritual guide to the medium have made the connections possible to each of the human races all more advanced than our own These benevolent beings who so graciously agreed to donate a little of their time and wisdom in order to share with us what is life like in their planets where moral imbalances such as wrath greed sloth pride lust envy gluttony or any feeling of disconnection from self to others no longer plagues one s society We are both delighted to present to you this master piece as a gift from human hearts to human souls and we are persuaded it will inspire you We are truly humbled for having found favor among these races of enlightened consciousnesses to be worthy of their attention and object of their kindness We are very excited to be given the opportunity to learn about their processes and to be authorized to fully share what we heard and discovered word by word in this transcribed material with you and our world Have an excellent journey Jefferson Viscardi Rob Gauthier Exotheology Joel L. Parkyn, 2021-08-31 Speculation regarding the plurality of worlds and the existence of intelligent extraterrestrials has remained an important question for Christian theology from antiquity until modernity Advancements in space science now reveal a vast universe containing trillions of galaxies and new discoveries of exoplanets providing an unprecedented greater context and perspective in consideration of the place of humanity possible intelligent extraterrestrials and the role of divinity in relation to creatures These scientific discoveries have increased the importance of understanding the relation of extraterrestrials to the Christian doctrines of the incarnation and redemption An examination of the history of developments in scientific and theological thought on extraterrestrials from antiquity to the twenty first century will demonstrate a consistent pattern of theological formulations of extraterrestrials and their relation to Christian theology however without sufficient resolution En route this book explores ideas of extraterrestrial anthropology psychology morphological possibilities sociological compositions extraterrestrial religions implications of contact and argues for a divine pedagogy of potential modalities of supernatural presence and action with extraterrestrial intelligences **Journal of the British Interplanetary Society** British Interplanetary Society, 1983 Bound with vol 1 1934 is the Society s annual report and list of members 1934 **The Privileged Planet** Guillermo Gonzalez, Jay W. Crowe,1986 This is the first in depth study in English of the international debate that developed between 1750 and 1900 concerning the question of the existence of extraterrestrial intelligent life Taking a history of ideas approach the author describes the controversies that arose over this question and reveals the great extent to which this issue influenced astronomical philosophical and religious thought Professor Crowe shows that the majority of the leading astronomers of the last two centuries participated in this debate and he analyzes how their views interacted with new developments such as Newtonian mechanics stellar astronomy Darwinian theory and astrophysics This fascinating and critical history shows that the longstanding and widespread belief in extraterrestrial life has for centuries acted to alter major areas of our intellectual life **The Plurality of Worlds** William Whewell,Edward Hitchcock,2025-03-28 Explore the age old question of extraterrestrial life with *The Plurality of Worlds* a fascinating exploration of cosmology and planetary systems by William Whewell and Edward Hitchcock This thought provoking work delves into the concept of multiple worlds and the potential for life beyond Earth examining the scientific and theological implications of such a possibility Drawing upon the principles of natural theology the authors investigate the likelihood of other inhabited planets and the significance of humanity s place in the universe This meticulously prepared print edition offers a window into historical perspectives on space science and the enduring debate surrounding the plurality of worlds A compelling read for anyone interested in astronomy religion and science and the search for life beyond our own This work has been selected by scholars as being culturally important and is

This book is a selective and fascinating history of scientific speculation about intelligent extraterrestrial life From Plutarch to Stephen Hawking some of the most prominent western scientists have had quite detailed perceptions and misperceptions about alien civilizations Johannes Kepler fresh from transforming astronomy with his work on the shape of planetary orbits was quite sure alien engineers on the moon were excavating circular pits to provide shelter Christiaan Huygens the most prominent physical scientist between Galileo and Newton dismissed Kepler s speculations but used the laws of probability to prove that planetarians on other worlds are much like humans and had developed a sense of the visual arts Carl Sagan sees clearly that Huygens is a biological chauvinist but doesn t see as clearly that he Sagan may be a cultural technological chauvinist when he assumes aliens have highly developed technology like ours but better Basalla traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even traces the influence of popular culture on science Sagan always admitted how much E R Burroughs Martian novels influenced his speculations about Mars Throughout Basalla weaves his theme that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic He questions the common modern scientific reasoning that life converges on intelligence and intelligence converges on one science valid everywhere He ends the book by agreeing with Stephen Hawking usually a safe bet that intelligence is overrated for survival in the universe and that we are most likely alone **One Life, Many Worlds** Julliena

Okah,2018-06-27 According to a 2009 AOL poll 90 percent of respondents believe there is definitely 65 percent or possibly 25 percent intelligent life elsewhere in the universe One Life Many Worlds My Journeys Through the Heavens and Hells of Extraterrestrial Worlds is the extraordinary story of Julliena Okah a globally recognized solo violinist also a scholar of German philosophy who had contact with nonhuman beings during her childhood in Japan and continued to have visitations from otherworldly beings throughout her life In the book Ms Okah recalls her nonhuman reincarnation through contacts with other beings remembering her existence when she lived on a super advanced amazingly beautiful golden world This book describes how to exceed the human realm to a better life in higher stage of existence It is an odyssey motivated by fantastic and unimaginable events that are still affecting her today While this story is one of hope and inspiration it is also one of rough passage Fraught with peril including two suicide attempts and three near death experiences all of which she escaped with the help of external forces Ms Okah gained deeper understandings of human life and the inhabitants in other worlds and how they can help us In this book she explores the meaning and purpose of life This is not a self help book It is a nonfiction

work that asks the reader to welcome Ms Okah's phenomenal experiences as she recalls memories of previous lives lived as well as seeing life before birth out of body experiences travels to other worlds and also her struggles to be accepted by her family and friends since childhood. She adamantly searched for knowledge through her academic studies and also her otherworldly personal experiences. Along with her life-long research and descriptions, she will provide vivid insight into mystifying events. It has been said that the facts often distort the truth and the truth can at times be stranger than fiction. Such is her story. This is a truly unique book of her spiritual awakening and the unimaginable paths on which she has been led around the world and beyond. This book including various encounters with UFOs and alien incidents in many countries she lived in. Being an educated and internationally known person, it was difficult to disclose her true story, yet Ms Okah believes that it is important for the people to realize the worlds outside of earth. *One Life, Many Worlds* Julliena Okah, 2020-10-08. How to exceed the human realm and attaining the higher realm of existence is the main subject of this book. *One Life Many Worlds My Journeys through the Heavens and Hells of Extraterrestrials World* Captured by Aliens Joel Achenbach, 2003. The great minds of the human race employing ever more fabulous technology have peered into the depths of space and discovered that we exist on a tiny speck in a universe that is vast beyond comprehension. But there is one thing we have yet to discover: a single scrap of extraterrestrial life. We have heard no signals, found no alien picnic trash. The aliens who allegedly abduct people in the middle of the night have a strange way of evaporating in the harsh glare of scientific scrutiny. And so at the turn of the millennium, we are in an intellectual fix: we know the universe only through its structure, its physical properties, its chemistry. Of its biology, we can only guess. Are there creatures out there like us, with big brains and restless spirits? Or are we, for all intents and purposes, alone? If aliens exist, if there really are intelligent creatures zooming around the galaxy, then where in our nation are they? Washington Post reporter Joel Achenbach, the author of *Why Things Are* and a commentator for National Public Radio, puts the ET debate into the context of the space program, discoveries in astronomy, and the hunger for meaning and spiritual nourishment in an era when science often doesn't provide the answers that people desire. He finds that the topic of extraterrestrial life is poisoned by wishful thinking by the natural human yearning to make contact with our brothers and sisters in space. But he also finds some fascinating, admirable, and maddening characters who have pursued the truth about extraterrestrial life: Carl Sagan, the brilliant astronomer who brought the cosmos to the masses; Dan Goldin, the cantankerous head of NASA who still believes in the dream of the Space Age; Henry Harris, a former Las Vegas lounge singer who is assigned the job of figuring out how to get a spaceship to Alpha Centauri; and various and sundry ufologists, experiencers, spiritualists, and channelers for whom the aliens are an ever-present reality. In this fascinating, funny, and spirited book, Achenbach discovers that the search for life elsewhere leads us on a looping road back to the fundamental questions about life on Earth. To think coherently about extraterrestrial life, we first must come to terms with who we are, why we exist, and what it means to carry around in our cells an evolutionary history that took four billion years to unfold.

Achenbach's message is that it is a wonderful and thrilling thing to be a sentient human being a creature capable of foolish romanticism in a universe that is mostly rocks and gas and dust and empty space Civilizations Beyond Earth Douglas A. Vakoch, Albert A. Harrison, 2011-09-01 Astronomers around the world are pointing their telescopes toward the heavens searching for signs of intelligent life If they make contact with an advanced alien civilization how will humankind respond In thinking about first contact the contributors to this volume present new empirical and theoretical research on the societal dimensions of the Search for Extraterrestrial Intelligence SETI Archaeologists and astronomers explore the likelihood that extraterrestrial intelligence exists using scientific insights to estimate such elusive factors as the longevity of technological societies Sociologists present the latest findings of novel surveys tapping into the public's attitudes about life beyond Earth to show how religion and education influence beliefs about extraterrestrials Scholars from such diverse disciplines as mathematics chemistry journalism and religious studies offer innovative solutions for bridging the cultural gap between human and extraterrestrial civilizations while recognizing the tremendous challenges of communicating at interstellar distances At a time when new planets are being discovered around other stars at an unprecedented rate this collection provides a much needed guide to the human impact of discovering we are not alone in the universe
