Keresztes, 2025-01-15 Photography and the Making of the Nazi Racial Community examines the role of photography in the construction of the Nazi Volksgemeinschaft a racially exclusive community during the Third Reich Julie R Keresztes explores how the dictatorship promoted photography for those who belonged to that community and excluded Jews from the practice As Nazi officials dispossessed Jewish photographers and robbed them of their equipment studios and eventually their lives they made photography more accessible to non Jewish Germans But they inadvertently created spaces for photography to be used as resistance and revenge in concentration camps where forced laborers salvaged photographs that exposed the extermination of Europe's Jews As the victims of Nazi persecution used photography to gather evidence of the Holocaust German troops and their families used photography to portray themselves as dutiful members of the Volksgemeinschaft rather than show the reality of war and genocide Ultimately Photography and the Making of the Nazi Racial Community shows how the configuration of photography along racial lines shaped the imagery of the Second World War Published in Association with the US Holocaust Memorial Museum *The Routledge Companion to Photography, Representation and Social Justice* Moritz Neumüller, 2022-12-30 Including work by leading scholars artists scientists and practitioners in the field of visual culture The Routledge Companion to Photography Representation and Social Justice is a seminal reference source for the new roles and contexts of photography in the twenty first century Bringing together a diverse set of contributions from across the globe the volume explores current debates surrounding post colonial thinking empowerment identity contemporary modes of self representation diversity in the arts the automated creation and use of imagery in science and industry vernacular imagery and social media platforms and visual mechanisms for control and manipulation in the age of surveillance capitalism and deep fakes as well as the role of imagery in times of crisis such as pandemics wars and climate change The analysis of these complex themes will be anchored in existing theoretical frameworks but also include new ways of thinking about social justice and representation and how to cope with our daily image tsunami Individual chapters bring together a diverse set of contributions featuring essays interviews conversations and case studies by artists scientists curators scholars medical doctors astrophysicists and social activists who all share a strong interest in how lens based media have shaped our world in recent years Expanding on contemporary debates within the field the Companion is essential
