Dutchtown Michelle Provoost, B. W. Colenbrander, Floris Alkemade, 1999 Almere the Netherlands newest town took a significant step towards maturity with its recently completed city center designed by Rem Koolhaas leader of the Office for Metropolitan Architecture O M A the Netherlands most internationally oriented architectural practice Compared to such high profile O M A achievements as Euralille and Generic City Koolhaas scheme for Almere is an interesting departure as it succeeds both in the contexts of old Dutch towns and contemporary metropolitan design The scheme for the Almere city center shows Koolhaas at work in the context of the old Dutch townscape and the dynamic of the polder model it shows how O M A absorbed Dutchness and still stuck to its principles In addition to documenting the city center design this book explores the design process involving the city the property developers and the project leaders Also included are the designs made to flesh out the master plan amongst them a theater by Kazuyo Sejima housing by Claus Kaan and Frits van Dongen William Alsop s pop rock center Benthem Crouwel s business center O M A s parking garages and cinema and the public space design by DS Landschapsarchitecten *TransUrbanism* Joke Brouwer, Arjen Mulder, 2002 TransUrbanism is urbanism plus transformation TransUrbanism is urbanism plus globalization The city is no longer a clearly localizable spatial unit but has transformed into an urban field a collection of activities instead of a material structure Cities today are in a state of continuous decomposition but are also continually reorganizing and rearranging themselves expanding and shrinking TransUrbanism is a design strategy that allows cities to organize themselves as complex systems where small local structures incorporate global flows BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Rem Koolhaas y el surrealismo. Arquitectura convulsiva Javier Arias Madero, 2023-01-09 Este libro propone un acercamiento a la obra de Rem Koolhaas y su Office for Metropolitan Architecture desde la hipótesis de la existencia de una conexión intelectual intensa con el surrealismo que se manifiesta firmemente desde las primeras ideas y fases de concepción de proyecto en ciertas metodologías de desarrollo de las propuestas e incluso en la materialización constructiva del propio edificio Es Rem Koolhaas un arquitecto surrealista Tal afirmación nos resulta confusa si nos afanamos en buscar en su obra signos del onirismo exacerbado que terminó convirtiéndose en lo más representativo de la vanguardia parisina Exige la ocultación profunda y verdadera del surrealismo exclamation a André Breton en 1929 apelando a la importancia del compromiso revolucionario frente a otras consideraciones como la estética En este sentido el surrealismo que empapa la obra de Rem Koolhaas es heredero fiel de estas palabras pertenece al ámbito del proceso frente al de la forma Se encuentra oculto pero manteniendo importantes conexiones con los tres campos del conocimiento que el surrealismo tomó del psicoanálisis y que sirven para organizar el libro en tres partes El automatismo psíquico los sueños y la locura Javier Arias plantea colocar en una mesa de disección el trabajo de OMA Rem Koolhaas buscando vínculos no sólo con el surrealismo como el movimiento de vanguardia sino con otras corrientes de pensamiento y de creación artística del siglo XX a las que influyó notablemente y que

comparten su principio b sico el entendimiento de la realidad como una unidad superior de la que solo percibimos una parte reprimida por la raz n y por tanto la reivindicaci n de lo irracional la imaginaci n la fantas a y el delirio Design Quality in New Housing Matthew Cousins,2009-06-02 This book addresses the need for an in depth study into design quality in new housing The wider implications of policy and design are examined through a series of case studies of new housing projects in the UK and the Netherlands Dutch interdisciplinary design and modern methods of construction are widely considered to be of the highest quality from which much can be learned and understood This new guide offers architects the best practice for the design policy and construction of new homes The author considers proposals for the Thames Gateway and government incentives to create better quality housing including the 60 000 house and design reviews The wider implications of skills and training of architects planners design professionals and those parties involved in housing are also addressed □□□□□,2000

Densifying the Built Environment Nagisa Yano,2006 **Dictionary of Today's Landscape Designers** Pierluigi Nicolin,Francesco Repishti,2003 The aim of the book is to illustrate the different ways of understanding landscape creating a dictionary that can convey not just the scope of the designing processes and their related actors but to provide a first key for interpreting the various approaches to this discipline that has given rise to an entirely new dimension in designing the cityscape turning the open space of the city into a space for art and sculpture fpr garden and architecture and into a new field for cultural activity It documents the surprising extent of the planning experience and profiles world renowned architects engineers landscape architects artists and photographers It aslo provides the reader with a key interpretation of the different approaches to an experience that has introduced a new dimension in the physical transformation of our environment The dictionary features leading figures from the international scen including Tadao Ando Emilio Ambasz Daniel Buren Tony Cragg Walter de Maria Michael Heizer Nancy Holt Toyo Ito Anish Kapoor Rem Koolhaas Maya Lin Richard Long and James Turrell to name a few Over the last decade the concept of landscape has dramatically changed References to the discipline of landscape architecture can be found in urban planning in projects that reconstruct large disused areas in the design of public spaces parks and private gardens in Land Art and in photography This field has come to greater prominence with the increase in public projects and by keeping pace with new theoretical approaches and design practices This volume will be an invaluable reference for anyone involved in urban planning public art landscape architecture and landscape design

Urban Rules offers a compilation and discussion of significant rules invented and implemented by European North American and Asian cities. The reader does not only get an overview of the functionality and repercussions of these rule sets but also gains insight into the context and situation of the specific city through the lens of rule based governance. A city's code as the inverted, abstracted and extracted image of a city's actual situation. Setting standards is first and foremost a cultural act. We map cities by their rules. The publication is based on a database of approximately 100 relevant urban rules researched over the past three years at the ETH Zurich. These rules describe built form with regard to physical characteristics, qualities and consequences as well as the distribution of program, density, urban performance and aesthetics. Die Konkurrenz zwischen Traditionalisten und Modernen um die Definitionsmacht über den gebauten Raum hat sich zum Motor der Imagebildung in der Standortkonkurrenz städtischer Zentren entwickelt. Dabei stützen Neomoderne und Neotraditionalismus gleichermaßen die Simulation einer längst globalisierten, gleichwohl lokal inszenierten städtischen Kultur. Der Architektur fällt die Rolle zu, das zentrale Medium für Identifikation und touristische Attraktion zu werden. Werner Sewings historische und soziologische Essays zur Architekturdiskussion zwischen zweiter Moderne und Neotraditionalismus sowie zur Soziologie der Architektur als Profession werden ergänzt durch grundlegende Aufsätze zum Berliner Architekturstreit der neunziger Jahre.
