UT-2201 Interface Converter Instruction

1 Summary

In order to carry through remote digital communication between computers with various standard serial interface converter functions or intelligent instruments, it needs some exchange of standard serial interface converter of compatible RS-232C and RS-485 standard is able to convert serial and RS-232 signal to balance difference RS-485 signal and extend the communication distance to 1.2km. The external power just adopts a particular RS-232 charge pump to drive the system, and power absolutely without disturbing the RS-232 serial interface. An internal data delay rate transmitter and particular RS current automatically control the data stream direction is ideal of an handshake signal (for example: RTN, ETRN etc.) There by it guarantees the function under RS-485 without changing the program compiled under RS-232 half-duplex mode and assures the adaptation to current operation software and interface hardware. The transmission rate of 960-115.2Kbps, has capable of applying between host computers, host computer and to instruments or external equipment and from data to data, data to data remote and multi-communication network. It implements multi-machine response communication and commonly used in systems of industrial automation control (oil-well used, Elevator, car parking, ATMA, bus charge, subway cell exit, staff attendance management, and toll highway etc.
