**The Three Ethologies** Matthew Calarco, 2024-05-15 From factory farming to invasive experimentation to the use of animals in the entertainment industry human interactions with animals frequently involve unjustifiable forms of exploitation violence and death Activists have put significant effort into limiting or abolishing such problematic forms of human animal interactions For philosopher Matthew Calarco this critical focus on restrictions while vitally important does not go far enough in reforming our relationships with animals Instead we need to interrogate the values that structure our lives as a whole to ask What might a good life in common with animals look like The Three Ethologies articulates positive ideals of human interactions with animals and offers an affirmative approach to constructing human animal relations anew Calarco develops three distinct but interrelated ethological lenses to this end 1 ethos as individual character the self 2 ethos as shared practices and relations the social and 3 ethos as the typical dwelling places of animals and human beings the environment This three pronged framework leads us to an inspiring vision of how ethological living can help us to reimagine philosophical ideals of goodness truth and beauty

[An Introduction to Human-Animal Relationships](#) Clive R. Hollin, 2021 An Introduction to Human Animal Relationships is a comprehensive introduction to the field of human animal interaction from a psychological perspective across a wide range of themes Hollin examines the topic of the relationships between humans and animals as seen in owning a companion animal alongside more indirect relationships such as our approaches to eating meat The core issues under discussion include the moral and ethical issues raised in using animals for entertainment in therapy to keep us safe and in sports such as horse racing The justifications for

hunting and killing animals as sport and using animals in scientific experimentation are considered The closing chapter looks to the future and considers how conservation and climate change may influence human animal relationships This key text brings an important perspective to the field of human animal studies and will be useful to students and scholars in the fields of psychology sociology animal welfare anthrozoology veterinary science and zoology
