The Montreal Massacre Peter

Eglin, Stephen Hester, 2006-01-01 The Montreal Massacre A Story of Membership Categorization Analysis adopts an ethnomethodological viewpoint to analyze how the murder of women by a lone gunman at the Ecole Polytechnique in Montreal was presented to the public via media publication over a two week period in 1989 All that the public came to know and understand of the murders the murderer and the victims was constituted in the description and commentaries produced by the media What the murders became therefore was an expression of the methods used to describe and evaluate them and central to these methods was membership category analysis the human practice of perceiving people places and events as members of categories and to use these to explain actions This is evident in the various versions comprising the overall story of the Massacre it was a crime it was a tragedy it was a horror story The killer's story is also based on his own categorial analysis he said his victims were feminists The media commentators formulated the significance of the murders in categorial terms it implicated a wider problem that of violence against women and thus the reasons for the murders were shown to be categorial matters As a contribution to sociology and as a demonstration of the significance of ethnomethodology for understanding social life the book reveals the methodical and particularly categorial character of how sense is made of events such as this and how such methodical and categorial resources are central to human interaction

be a sound financial decision but despite the lure of healthy profits individuals and mutual funds have been reluctant to invest in this type of stock After all who would take pride in supporting the tobacco industry knowing it sells a deadly product And what social responsibilities do investors bear with respect to compulsive gamblers who have lost so much money that suicide becomes an attractive option Canada the Good considers more than five hundred years of debates and regulation that have conditioned Canadians attitudes towards certain vices Early European settlers implemented a Christian moral order that regulated sexual behaviour gambling and drinking Later some transgressions were diagnosed as health issues that required treatment Those who refused the label of illness argued that behaviours formerly deemed as vices were within the range of normal human behaviour This historical synthesis demonstrates how moral regulation has changed over time how it has shaped Canadians lives why some debates have almost disappeared and others persist and why some individuals and groups have felt empowered to tackle collective social issues Against the background of the evolution of the state the enlargement of the body politic and mounting forays into court activism the author illustrates the complexity over time of various forms of social regulation and the control of vice *True Crime and Women* Lili Pâquet, Rosemary
