names of stars and planets Jewish symbols as well as Jewish dates all seem to be keys to unlocking the mystery of the famous star The star of Bethlehem was not the brightest of the heavenly lights nor was it the most spectacular starry manifestation of all time However it was part of the most meaningful set of celestial events in human history The God of Israel is surprising His ways are not our ways his thoughts are not our thoughts The star gives us a concrete example of God s intervention in the universe Book website www.starofbethlehem.info *The Book of Unconformities* Hugh Raffles,2020-08-25 From the author of the acclaimed *Insectopedia* a powerful exploration of loss endurance and the absences that permeate the present When Hugh Raffles s two sisters died suddenly within a few weeks of each other he reached for rocks stones and other seemingly solid objects as anchors in a world unmoored as ways to make sense of these events through stories far larger than his own A moving profound and affirming meditation *The Book of Unconformities* is grounded in stories of stones Neolithic stone circles Icelandic lava mica from a Nazi concentration camp petrified whale blubber in Svalbard the marble prized by Manhattan s Lenape and a huge Greenlandic meteorite that arrived with six Inuit adventurers in the exuberant but fractious New York City of 1897 As Raffles follows these fundamental objects unearthing the events they ve engendered he finds them losing their solidity and becoming as capricious indifferent and willful as time itself **Astrology and Cosmology in Early China** David W. Pankenier,2013-10-10 The ancient Chinese were profoundly influenced by the Sun Moon and stars making persistent efforts to mirror astral phenomena in shaping their civilization In this pioneering text David W Pankenier introduces readers to a seriously understudied field illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art architecture calendrical science myth technology and political and military decision making As elsewhere in the ancient world there was no positive distinction between astronomy and astrology in ancient China and so astrology or more precisely astral omenology is a principal focus of the book Drawing on a broad range of sources including archaeological discoveries classical texts inscriptions and paleography this thought provoking book documents the role of astronomical phenomena in the development of the Celestial Empire from the late Neolithic through the late imperial period **Journal of Astronist Studies Volume 1 Issue 1** Cometan,Juan Vivanco,Michael York,Monica Gyimah,2024-08-15 This marks the first issue of the Journal of Astronist Studies and begins what is hoped to be a long tradition of scholarly discourse on space religions and the broader intersection between astronomy religion and spirituality This issue begins with a peer reviewed article by myself that gives a short history and comparison between Astronism Cosmism and Cosmodeism This first article of the first issue sets the scene for a scholarly discourse of Astronist studies by providing some insight into the legacy of Astronism s predecessors in Cosmism and Cosmodeism This issue continues with an article by Juan Vivanco who is new to the field of scholarly writing but who boasts a long history of entrepreneurship in eco friendly construction and is based in Dubai In his piece Vivanco introduces readers to quantum cosmic theology and reflects on his experiences of cosmic meditation which has close links with the Astronist

practice of night sky exposition and meditation The third article in this issue is another peer reviewed piece from myself this time focusing on the concept of astromorphism This piece draws much inspiration from my master s dissertation but uniquely focuses on how the theory of an Astronic religious tradition contributes to the debate on the origins of religion The origins of religion emerged as an academic pursuit in the early nineteenth century but the role of prehistoric astrolatry was never given any prominence in the debate The second half of the issue begins with a piece by Professor Emeritus of cultural astronomy and astrology Michael York York gives his perspective on how geocentrism represented by modern paganism and cosmocentrism represented by Astronism compare and contrast York uses the sociological measuring tool of the ideal type to discuss the worldviews of geocentrism and cosmocentrism by analysing the aims of modern paganism and Astronism on whether humanity ought to escape Earth or attempt instead to restore our terrestrial conditions The final full length article in this issue comes from Dr Monica Gyimah who discusses issues involving a lack of state recognition and legal personality specifically impacting people who profess indigenous beliefs Gyimah provides an extensive analysis of the international legal framework geared towards protecting indigenous communities and gives several examples of how indigenous groups professing various forms of nature religion and polytheism remain unrecognised and their access denied to several fundamental rights protected under freedom of religion or belief This issue ends with my review of Tsvi Bisk s latest work *Cosmodeism A Worldview for the Space Age* It was a pleasure to read and review Bisk s work as many of the topics Bisk discusses in his work are prominent in Astronist philosophy I reviewed Bisk s work from my perspective both as an Astronist but also as the founder of Astronism in particular to emphasise my belief in the need for the greater practical organisation of those movements that affirm the doctrine of transcension in some form

Evil, Spirits, and Possession David L Bradnick, 2017-08-28 In *Evil Spirits and Possession An Emergentist Theology of the Demonic* David Bradnick develops a multidisciplinary view of the demonic using biblical theological social scientific and philosophical scientific perspectives Building upon the work of Pentecostal theologian Amos Yong this book argues for a theology informed by emergence theory whereby the demonic arises from evolutionary processes and exerts downward causal influence upon its constituent substrates Consequently evil does not result from conscious diabolic beings rather it manifests as non personal emergent forces that influence humans to initiate and execute nefarious activities Emergentism provides an alternative to contemporary views which tend to minimize or reject the reality of the demonic and it retains the demonic as a viable theological category in the twenty first century

Phenomenology of the Winter-City Abraham Akkerman, 2016-01-12 This book explores how the weather and city form impact the mind and how city form and mind interact It builds on Merleau Ponty s contention that mind the human body and the environment are intertwined in a singular composite and on Walter Benjamin s suggestion that mind and city form in mutual interaction through history have set the course of civilization Bringing together the fields of philosophy urbanism geography history and architecture the book shows the association of

existentialism with prevalence of mood disorder in Northern Europe at the close of Little Ice Age It explains the implications of city form and traces the role of the myths and allegories of urban design as well as the history of gender projection onto city form It shows how urbanization in Northern Europe provided easier access to shelter yet resulted in sunlight deprivation and yielded increasing incidence of depression and other mental disorder among the European middle class The book uses the examples of Kierkegaard Nietzsche Dostoevsky and Kafka to show how walking through the streets squares and other urban voids became the informal remedy to mood disorder a prominent trait among founders of modern Existentialism It concludes by describing how the connection of anguish and violence is relevant to winter depression in cities in North America in particular

Davis, 2025-06-20 Through a presentation of the oldest rock art dated in the Americas located in Monte Alegre Brazil this book analyzes an ancient ecological astronomy strategy that theoretically made the rapid human migration in the Americas successful It helps answer two vital questions long held by scholars and the general public alike How did humans survive the rapid and massive climate changes at the end of the ice age And how did founding populations especially in the Americas manage successful settlement relatively rapidly in ecosystems entirely foreign to them It further initiates questions about the universal role that astronomy and even astrology might have played in cognitive human evolution and the success of burgeoning sedentism and eventual civilization throughout the world The book makes a substantial contribution because of the wealth of cultural information it provides from Monte Alegre It explains the author's analysis of pictographs lithics and landscape modifications that were excavated there and provides novel findings on the chronology and archaeoastronomy of the art This book is indispensable for courses about Paleoindians peopling of the Americas environmental anthropology cosmology rock art studies archaeoastronomy paleoecology paleoethnobotany and Amazonia The pan American indications of this work will appeal to archaeologists historians art historians folklorists Native American and Indigenous scholars evolutionists cognitive scientists geographers and the general public **The Astronomical System of Aristotle** Gerardo Botteri, Roberto Casazza, 2023-05-01 This book shows that a rigorous study of Aristotle's Metaphysics is not simply an exercise in the history of astronomy but constitutes a broad inquiry into our germinal ideas about speed motion and the spherical nature of celestial

entities as well as the relation between theology and gnoseology Many have heard of Aristotle s First Unmoved Mover the one that moves all things without being moved Very few however have managed to capture the ultimate meaning of that entity One of the goals of this book is to explore why the existence of such a First Unmoved Mover is necessary but the journey to this end allows us to understand why Aristotle maintained that there are a total of 55 Unmoved Movers not just one The key is Aristotelian astronomy little studied so far in comparison with other aspects of his thought In this solid piece of research and free philosophical speculation that Botteri Casazza offer us the authors gaze raised to the sky by means of the naked eye analysis of celestial movements leads to the reconstruction of Aristotle s astronomical system key to understanding his cosmology his physics and even his metaphysics This book is a revised English translation from the original Spanish publication *El sistema astronómico de Aristóteles.
