*Extreme Birder* Lynn E. Barber, 2011-03-17 One woman one year 723 species of birds In 2008 Lynn Barber's passion for birding led her to drive fly sail walk stalk and sit in search of birds in twenty five states and three provinces Traveling more than 175 000 miles she set a twenty first century record at the time second to only one other person in history Over 272 days Barber observed 723 species of birds in North America north of Mexico recording a remarkable 333 new species in January but with the dwindling returns typical to Big Year birding only eight in December a month that found her crisscrossing the continent from Texas to Newfoundland from Washington to Ontario In the months between she felt every extreme of climate well being and emotion But whether finally spotting an elusive Blue Bunting or seeing three species of eiders in a single day she was also challenged inspired and rewarded by nearly every experience Barber's journal from her American Birding Association sanctioned Big Year covers the highlights of her treks to forests canyons mountain ranges deserts oceans lakes and numerous spots in between Written in the informal style of a diary it captures the detail humor challenges and fun of a good adventure travelogue and also conveys the remarkable diversity of North American birds and habitat For actual or would be travel birders Lynn Barber's *Extreme Birder* provides a fascinating binoculars eye view of one of the best loved pastimes of nature lovers everywhere Lynn Barber challenges a traditionally male dominated pursuit the birding big year and is successful beyond her wildest dreams She is an inspiration for all who love adventure nature and birds Lynn Hassler author *Birds of the American Southwest* *Big Years, Biggest States* Lynn E. Barber, 2020-04-30 Undertaking a Big Year requires a more extreme version of planning than what is needed to bird in a typical year In a Big Year a birder is trying to see or hear new birds every day day after day throughout the whole year The first woman to complete a North American Big Year continental United States and Canada and identify over 700 species Lynn E Barber clocked more than 175 000 miles and ticked off a then record setting 723 species over twelve months in 2008 Yet even as an anomaly a female birder in the then male dominated world of competitive birding she took the initiative to reimagine the whole idea of a Big Year in the two biggest states in the country At home in both Texas and Alaska Barber offers an inside look into how to plan execute and thoroughly enjoy a year of finding the birds that inhabit two of the nation's most diverse landscapes The drastic differences between the climate geography plant life and habitat at the far northern and southern edges of the US mainland mean seeing a distinct number of birds in each state that are not found in the other Yet as states with both coastal and international boundaries Texas and Alaska provide countless opportunities to see the most seasonally varied far flying and specifically adapted birds in the world As Barber chronicles her travels throughout the Texan and Alaskan landscapes serious and casual birders alike will appreciate her lively and informative prose and commitment to her distinct approach to the Big Year challenge [Going Places](#) Robert Burgin, 2013-01-08 Successfully navigate the rich world of travel narratives and identify fiction and nonfiction read alike with this detailed and expertly constructed guide Just as savvy travelers make use of
