**Strange Worlds, Fantastic Places** Jane MacAndrew, Andrew Kerr-Jarrett, 1998 Describes how different kinds of plants and animals adapt to strange and extreme environments *Extreme Birds* Dominic Couzens, 2011 A wonderful collection of bird superlatives Fascinating facts and beautiful photographs make this one a winner Library Journal **Weird Science and Bizarre Beliefs** Gregory L. Reece, 2008-10-30 Does the giant Yeti roam the mountain ranges of Tibet Does a real life Shangri La lie waiting to be discovered in a Himalayan valley Do transmissions from lost civilizations beam messages of salvation to humankind What lost creatures lurk in the murky depths of Scotland's brooding Loch Ness And who or what is responsible for the implacable monoliths which tower over Easter Island The obsession that so many now have with the uncanny and the unnatural is in itself a mystery It prompts serious questions which could have remarkable answers Drinking deep from the wells of esoteric knowledge Greg Reece undertakes a heroic quest for solutions Braving the darkest recesses of cult belief he stalks the twilight borderlands of contemporary culture where at the outer edges of mainstream thought things become downright freaky and outlandish Taking his life in both hands the author explores a subterranean cavern reputed to be the home of elusive blue skinned troglodytes goes hiking in the backwoods for a glimpse of Bigfoot investigates the truth of Alternative Archaeology in search of Atlantis and tests for himself the time travel and anti gravity theories of famed inventor Nikola Tesla Unashamedly revelling in the unexplained Weird Science and Bizarre Beliefs is both a penetrating analysis of the hidden underbelly of science pseudo science and religion as well as an unforgettable journey into the innermost depths of the fantastic the extraordinary and the peculiar *Winged Worlds* Olga Petri, Michael Guida, 2023-06-26 This edited collection explores our often surprising modes of co inhabiting the cultural and aerial worlds of birds It focuses on our encounters with non captive birds and the cultural geographies of feathered flight This book offers a timely contribution to the more than human geographies of flight space and territory The chapters support an ethics of attention as a new basis for the conservation and cultivation of aerial habitats Contributions adopt an interdisciplinary approach to the patterns of intrusion and escape that shape our encounters with birds and unsettle our traditionally terrestrial concepts of space Each chapter focuses on a different aspect of our shared lives with birds ranging from scientific observation to the social media enabled spectacle of co habitation and spatial competition Written in a thought provoking style this book seeks to address a dearth of critical perspectives on the cultural geographies of flight and its implications for the ways in which we understand common spaces around and above us in the context of any effort at conservation **The Spectator** , 1881 **The Aquatic World of Penguins** David G Ainley, Rory P Wilson, 2023-11-10 Centuries ago when penguins were first encountered by European explorers they were not thought to be birds but rather a fish like relative Subsequent accumulation of knowledge has shown penguins to be an avian species with unrivaled aquatic attributes owing to a number of evolutionary adaptations shape change low drag ability to regulate buoyancy and extraordinary surface

compliance from their featheration They are indeed the most extremely specialized diving bird having given up flight which otherwise is hugely advantageous to the benefit of underwater prowess such as speed maneuverability and an ability to exploit an extraordinary range of depths This flightlessness however also comes with costs that are substantial for a seabird such as the inability to cover large distances quickly in reaction to ephemeral prey and the energy needed to cope with moving through an aqueous environment which is more resistant than air For penguins the high energetic costs in exploiting the ocean environment thus makes them especially sensitive to changes in food availability or their access to their prey While a number of penguin books cover the natural history mainly of breeding aspects few address in much detail the incredible aquatic nature of these creatures A huge amount of information has been amassed over recent past decades thanks to dramatic advances in microelectronics bio logging and maturation of some long term studies of penguin life history This work represents an integration of all these data with charts maps and graphs along with richly illustrated photos by experts in the field

**Air** Peter Adey, 2014-06-15 Outside of yoga class, we don't pay too much attention to the air we take in every day. Long one of the essential elements to life on earth from the atmospheric composition that gave life to the coal-forming forests some three hundred million years ago to the air that fuels our most important technologies today, we think little of its incredible properties. In this innovative cultural and scientific history, Peter Adey takes stock of the great ocean of air that surrounds us, exploring our attempts to understand, engineer, make sense of, and find meaning in it. Adey examines how humans have managed and manipulated air as a natural resource and, in doing so, have been taken to the limits of survival brought to high altitude mountain peaks, subterranean worlds, and the troughs of new moral depths. Going beyond how vital air has been to our philosophical, scientific, and technological pursuits, he also reveals the way that the artistic and literary imagination has been lifted through air and how, in air, cultures have learned to express and inspire each other. Combining established figures such as Joseph Priestley, John Scott Haldane, and Marie Curie with unlikely individuals from painting, literature, and poetry, this richly illustrated book unlocks new perspectives into the science and culture of this pervasive but unnoticed substance.

The Order of Purple Thorn Xin BanHongShuangXi, 2019-12-15 There was righteousness in the heaven and earth, and it was all in the shape of a hodgepodge. The bottom part was a river while the top part was a sun. In the human world, one could live freely. With a righteous heart, there was no difference between a region, a gender, or a status. His name was Nan Feng, and he had crawled out from the pile of dead to be reborn. Uninhibited but not losing the truth with action to open up a different path for themselves with the ability to walk out of a colorful life. The story began with the Redbud Token Book Collection. Redbud Order 195782611.
