## **Exxon The Road Not Taken:**

**Exxon** Neela Banerjee, John H. Cushman (Jr.), David Hasemyer, Lisa Song, 2015 Relying on primary sources dating back to the 1970s describes how Exxon conducted cutting edge climate research and then without revealing what it had learned worked at the forefront of climate change denial manufacturing doubt about the scientific consensus that its own research had confirmed Adapted from publisher's description Falter Bill McKibben, 2019-04-16 Thirty years ago Bill McKibben offered one of the earliest warnings about climate change Now he broadens the warning the entire human game he suggests has begun to play itself out Bill McKibben's groundbreaking book *The End of Nature* issued in dozens of languages and long regarded as a classic was the first book to alert us to global warming But the danger is broader than that even as climate change shrinks the space where our civilization can exist new technologies like artificial intelligence and robotics threaten to bleach away the variety of human experience Falter tells the story of these converging trends and of the ideological fervor that keeps us from bringing them under control And then drawing on McKibben's experience in building 350.org the first truly global citizens movement to combat climate change it offers some possible ways out of the trap We're at a bleak moment in human history and we'll either confront that bleakness or watch the civilization our forebears built slip away Falter is a powerful and sobering call to arms to save not only our planet but also our humanity **Cultural Anthropology** John H. Bodley, 2016-10-24 Cultural Anthropology provides students with the anthropological tools to question and understand their own culture and the world Key updates for the sixth edition include a shorter length and more streamlined focus China and Hindu South Asia combined into a single chapter a new chapter assessing imperialism and the breakdown of states and more *Winning the Green New Deal* Varshini Prakash, Guido Girgenti, 2020-08-25 An urgent and definitive collection of essays from leaders and experts championing the Green New Deal and a detailed playbook for how we can win it including contributions by leading activists and progressive writers like Varshini Prakash Rhiana Gunn Wright Bill McKibben Rev William Barber II and more In October 2018 scientists warned that we have less than 12 years left to transform our economy away from fossil fuels or face catastrophic climate change At that moment there was no plan in the US to decarbonize our economy that fast Less than two years later every major Democratic presidential candidate has embraced the vision of the Green New Deal a rapid vast transformation of our economy to avert climate catastrophe while securing economic and racial justice for all What happened A new generation of leaders confronted the political establishment in Washington DC with a simple message the climate crisis is here and the Green New Deal is our last best hope for a livable future Now comes the hard part turning that vision into the law of the land In *Winning a Green New Deal* leading youth activists journalists and policymakers explain why we need a transformative agenda to avert climate catastrophe and how our movement can organize to win Featuring essays by Varshini Prakash cofounder of Sunrise Movement Rhiana Gunn Wright Green New Deal policy architect Joseph Stiglitz Nobel Prize winning economist Bill McKibben internationally renowned

environmentalist Mary Kay Henry the President of the Service Employees International Union and others we ll learn why the climate crisis cannot be solved unless we also confront inequality and racism how movements can redefine what s politically possible and overcome the opposition of fossil fuel billionaires and how a Green New Deal will build a just and thriving economy for all of us For anyone looking to understand the movement for a Green New Deal and join the fight for a livable future there is no resource as clear and practical as **Winning the Green New Deal** *Beyond Climate Breakdown* Peter Friederici,2023-10-10 The importance of telling new climate stories stories that center the persistence of life itself that embrace comedy and radical hope How dare you asked teenage climate activist Greta Thunberg at the United Nations in 2019 How dare the world s leaders fiddle around the edges when the world is on fire Why is society unable to grasp the enormity of climate change In *Beyond Climate Breakdown* Peter Friederici writes that the answer must come in the form of a story and that our miscomprehension of the climate crisis comes about because we have been telling the wrong stories These stories are pervasive they come from long narrative traditions sanctioned by capitalism Hollywood and social media and they revolve around a myth that the nation exists primarily as a setting for a certain kind of economic activity Stories are how we make sense of the world and our place in it The story that the economy takes priority over everything else may seem foreordained but Friederici explains actually reflect choices made by specific people out of self interest So we need new stories stories that center the persistence of life rather than of capitalism stories that embrace contradiction and complexity We can create new stories based on comedy and radical hope Comedy never says no hope sprouts like a flower in cracked concrete These attitudes require a new way of thinking an adaptive attitude toward life that slips the narrow yoke of definition **Jesus' Parables Speak to Power and Greed** Richard Q. Ford,2022-09-19 The psychological process of denial involves refusing to see what is in front of us and for some time we have been struggling to shape master narratives to encompass climate breakdown Jesus longer parables offer insight into the possibilities that are hidden within the hierarchies of power Through the work of understanding the experiences of all the parable actors we are invited to practice the empathy required to face the global challenges of the twenty first century **Why Trust Science?** Naomi Oreskes,2021-04-06 Why the social character of scientific knowledge makes it trustworthy Are doctors right when they tell us vaccines are safe Should we take climate experts at their word when they warn us about the perils of global warming Why should we trust science when so many of our political leaders don t Naomi Oreskes offers a bold and compelling defense of science revealing why the social character of scientific knowledge is its greatest strength and the greatest reason we can trust it Tracing the history and philosophy of science from the late nineteenth century to today this timely and provocative book features a new preface by Oreskes and critical responses by climate experts Ottmar Edenhofer and Martin Kowarsch political scientist Jon Krosnick philosopher of science Marc Lange and science historian Susan Lindee as well as a foreword by political theorist Stephen Macedo **Trauma and the Discourse of Climate Change** Lee Zimmerman,2020-03-24 The more the global north has

learned about the existential threat of climate change the faster it has emitted greenhouse gases into the atmosphere In *Trauma and the Discourse of Climate Change* Lee Zimmerman thinks about why this is by examining how climate change has been discursively constructed tracing how the ways we talk and write about climate change have worked to normalize a generalized bipartisan denialism more profound than that of the overt denialists Suggesting that we understand that normalized denial as a form of cultural trauma the book explores how the dominant ways of figuring knowledge about global warming disarticulate that knowledge from the trauma those figurations both represent and reproduce and by which they remain inhabited and haunted Its early chapters consider that process in representations of climate change across a range of disciplines and throughout the public sphere including Al Gore's *An Inconvenient Truth* Barack Obama's speeches and climate plans and the 2015 Paris Agreement Later chapters focus on how literary representations especially for the most part participate in such disarticulations and on how in grappling with the representational difficulties at the climate crisis's heart some works of fiction among them Cormac McCarthy's *The Road* and Russell Hoban's *Riddley Walker* work against that normalized rhetorical violence The book closes with a meditation centered on the dream of the burning child Freud sketches in *The Interpretation of Dreams* Highlighting the existential stakes of the ways we think and write about the climate *Trauma and the Discourse of Climate Change* aims to offer an unfamiliar place from which to engage the astonishing quiescence of our ecocidal present This book will be essential reading for academics and students of psychoanalysis environmental humanities trauma studies literature and environmental studies as well as activists and others drawn to thinking about the climate crisis

*The Oceanic Feeling* Isabella Lövin, 2024-01-05 Isabella Lövin's *The Oceanic Feeling* On the Need for a New Narrative is a unique document of a life spent on the front lines of the climate battle and at the negotiating tables where the future of our planet is decided The Swedish investigative journalist who became a member of the European Parliament and then served for seven years in government five of those as Deputy Prime Minister and Climate Minister takes us on a journey behind the scenes of climate and global ocean policy making Some may remember the viral picture of her signing the Swedish climate law in 2017 As Donald Trump just had signed a regressive executive order limiting women's sexual and reproductive rights surrounded by only men she by contrast signed progressive climate legislation surrounded by women Deeply concerned about the shrinking confidence in democracy Lövin offers a pedagogic and hopeful account of the fact that change can happen if there is a will and a vision But she also recognizes the main reason why humanity is not acting on the many global crises a narrative of egoism and individualism A truer and much more positive story can be found when we recognize *The Oceanic Feeling* a deep connection with nature people and the miraculous web of life on the planet putting empathy responsibility and awe at the center of what it is to be human How Lövin asks us can we convert the world to this new healthier narrative

**Strategic Climate Change Communications** Jasper Colin Fessmann, 2019-10-01 For over 30 years the science on climate change has been clear it is happening we humans caused it and it puts all our futures at risk

Global warming can still be reversed or at least the worst prevented if we act in time. However, despite valiant efforts by scientists, activists, and science reporters, little meaningful change has occurred. This is largely the result of well-funded professional strategic communication efforts by vested interests. They have been highly successful in achieving their central goal: protecting the profitable status quo by creating gridlock to slow down meaningful action on climate change. Strategic Climate Science Communications: Effective Approaches to Fighting Climate Denial analyzes some of the communication strategies employed by deniers and the psychological mechanisms behind how they work. Several experts offer specific counter-strategies to change the conversation and foster meaningful societal change on global warming. The book helps environmental journalists to build up resistance against being manipulated by highly effective public relations techniques often successfully used against them. It can also help scientists and activists to become more effective communicators. An effective strategy is best countered by even better strategy.

**The Routledge Companion to Advertising and Promotional Culture** Emily West, Matthew P. McAllister, 2023-04-04 This comprehensive second edition provides an updated essential guide to the key issues, methodologies, concepts, debates, and policies that shape our everyday relationship with advertising. This updated edition takes a critical look at advertising and promotion during the explosion of digital and social media, as well as with significant social and cultural shifts including the COVID-19 pandemic, the rise of the Black Lives Matter movement, the destabilization of democracies, and the rise of authoritarianism around the world and intensification of the climate crisis. The book offers global perspectives on advertising and promotion with attention to issues of diversity and difference. It contains eight sections: Historical Perspectives on Advertising and Promotion; Promotional Industries; Advertising Audiences; Advertising Identities; Advertising and in Crisis; Promotion and Politics; Promotionalism and Its Expansions; and Advertising, Promotion, and the Environment. With chapters written by leading international scholars working at the intersections of media and advertising studies, this book is a go-to source for scholars and students in communication, media studies, and advertising and marketing looking to understand the ways advertising has shaped consumer culture in the past and present.

**Cases in Public Relations Management** Patricia Swann, 2025-04-11 This fourth edition of Cases in Public Relations Management features a combination of new and tried and tested cases that give students a practical view of how on the ground public relations is practiced today. Showcasing both successes and failures in public relations management, this text uses a problem-based case study approach that encourages readers to put their knowledge to the test to assess what has worked and consider alternate approaches to the situations these cases explore. It features questions for discussion and prompts to dig deeper into the cases at hand. New to the fourth edition: Fifteen new cases including Anheuser-Busch InBev, Dove, Juul, FTX, Norfolk Southern, Barbie, and Nike. Emphasis on social media, sustainability, ethics, and social responsibility for communication management today. End-of-chapter activities that reinforce concepts. Developed for advanced students in strategic communication and public relations, this book prepares them for their future careers as communication and public

relations professionals The fourth edition features fully updated online resources student case guides with case supplements instructor case guides with sample answers to end of case questions in the text and PowerPoint lecture slides Please visit [www.routledge.com/9781032163642](http://www.routledge.com/9781032163642)

**Little Red Barns** Will Potter, 2025-07-08 We are in a fight for our lives against a rising authoritarian tide and this clear eyed compelling clarion call of a book has a message everyone needs to hear Astra Taylor author of *Democracy May Not Exist but We'll Miss It When It's Gone* Behind the little red barns dotting the landscape and decorating so many of the products we consume is a dangerous threat This groundbreaking investigation exposes the powerful forces at work to hide the harms of industrial agriculture its outsized role in the climate crisis and its links to the global rise of fascism Little Red Barns is the record of a harrowing journey that took investigative journalist Will Potter from factory farms to international climate summits from Congressional hearings to neo Nazi fascist groups As Potter uncovers the frightening truth about animal agriculture's role in accelerating climate collapse he shows how the authoritarian measures being taken to maintain control over this key aspect of the global food supply chain are directly linked to the proliferation and empowerment of far right militias Confronting a maelstrom of disturbing information he asks searching questions about a journalist's role in the 21st century and the impact of bearing witness in a world in which we are bombarded with news both real and faked

**Horsemen of the Apocalypse** Dick Russell, 2017-05-02 From the New York Times bestselling author Dick Russell edited and introduced by New York Times bestselling author Robert F Kennedy Jr A must read for anyone concerned with climate and energy issues Leonardo DiCaprio Academy Award winning actor and environmental activist The science is overwhelming the facts are in The planet is heating up at an alarming rate and the results are everywhere to be seen Yet as time runs out climate progress is blocked by the men who are profiting from the burning of the planet energy moguls like the Koch brothers and Exxon Mobil CEO Rex Tillerson Powerful politicians like Senators Mitch McConnell and Jim Inhofe who receive massive contributions from the oil and coal industries Most of these men are too intelligent to truly believe that climate change is not a growing crisis And yet they have put their profits and careers ahead of the health and welfare of the world's population and even their own children and grandchildren How do they explain themselves to their offspring to the next generations that must deal with the environmental havoc that these men have wreaked Horsemen of the Apocalypse takes a personal look at this global crisis literally bringing it home

**Unprecedented Crime** Dr. Peter D. Carter, Elizabeth Woodworth, 2018-01-05 In 2017 the heat waves extreme wild fires and flooding around the world confirmed beyond doubt that climate disruption is now a full blown emergency We have entered Churchill's period of consequences yet governments have simply watched the disasters magnify while rushing ahead with new pipelines and annual trillions in fossil fuel subsidies Governments simply cannot say they did not know The events we are seeing today have been consistently forecast ever since the First Assessment by the Intergovernmental Panel on Climate Change which was signed by all governments back in 1990 which The Lancet has described as the best research project ever designed Unprecedented Crime

first lays out the culpability of governmental political and religious bodies corporations and the media through their failure to report or act on the climate emergency No emergency response has even been contemplated by wealthy high emitting national governments Extreme weather reporting never even hints at the need to address climate change It then reports how independently of governments scores of proven zero carbon game changers have been coming online all over the world These exciting technologies described in the book are now able to power both household electricity and energy dense heavy industry We already have the technical solutions to the CO2 problem With these solutions we can act in time to reduce greenhouse gas emissions to near zero within 20 years These willful crimes against life itself by negligent governments oblivious media and an insouciant civil society are crimes that everyday citizens can nonetheless readily grasp and then take to the streets and to the courts to protest on behalf of their children and grand children This thoroughly researched and highly documented book will show them how

**The Air They Breathe** Debra Hendrickson, 2025-07 A timely revelatory first look into the impact climate change has on children the greatest moral crisis humanity faces today by a pediatrician in the fastest warming city in America Wildfires hurricanes and heat waves make headlines But what is happening in Debra Hendrickson's clinic tells another story of this strange and unsettling time Hendrickson is a pediatrician in Reno Nevada the fastest warming city in the United States where ash falls like snow during summer wildfires In *The Air They Breathe* Dr Hendrickson recounts patients she's seen who were harmed by worsening smoke smog and pollen two boys in Arizona stricken by record setting heat while hiking children who fled for their lives from Hurricane Harvey and the Tubbs Fire and a little girl whose life was forever altered by the Zika virus outbreak in 2016 The climate crisis is a health crisis and it is a health crisis first and foremost for children Children's bodies are interwoven with and shaped by their surroundings As the planet warms and their environment changes children's health is at risk The youngest are especially vulnerable because their brain lungs and other organs are forming and growing every day and because their physiology is so different from that of adults Childhood has always been a risky period of life throughout history babies and children have met peril from polio to famine from cyclones to war Yet they have never quite had to face in quite this way the potential loss of the future itself *The Air They Breathe* is not just about the health impacts of global warming but something more a soul stirring reminder of our moral responsibility to our children and their profound connections to this unique and irreplaceable world

**The New Climate War** Michael E. Mann, 2021-01-12 Shortlisted for the FT McKinsey Business Book of the Year award A renowned climate scientist shows how fossil fuel companies have waged a thirty year campaign to deflect blame and responsibility and delay action on climate change and offers a battle plan for how we can save the planet Recycle Fly less Eat less meat These are some of the ways that we've been told can slow climate change But the inordinate emphasis on individual behavior is the result of a marketing campaign that has succeeded in placing the responsibility for fixing climate change squarely on the shoulders of individuals Fossil fuel companies have followed the example of other industries deflecting blame think guns don

t kill people people kill people or greenwashing think of the beverage industry s Crying Indian commercials of the 1970s Meanwhile they ve blocked efforts to regulate or price carbon emissions run PR campaigns aimed at discrediting viable alternatives and have abdicated their responsibility in fixing the problem they ve created The result has been disastrous for our planet In *The New Climate War* Mann argues that all is not lost He draws the battle lines between the people and the polluters fossil fuel companies right wing plutocrats and petrostates And he outlines a plan for forcing our governments and corporations to wake up and make real change including A common sense attainable approach to carbon pricing and a revision of the well intentioned but flawed currently proposed version of the Green New Deal Allowing renewable energy to compete fairly against fossil fuels Debunking the false narratives and arguments that have worked their way into the climate debate and driven a wedge between even those who support climate change solutions Combatting climate doomism and despair mongering With immensely powerful vested interests aligned in defense of the fossil fuel status quo the societal tipping point won t happen without the active participation of citizens everywhere aiding in the collective push forward This book will reach inform and enable citizens everywhere to join this battle for our planet *Coral Reefs* Peter F.

Sale, 2021-01-01 An eye opening introduction to the complexity wonder and vital roles of coral reefs Part memoir part popular science part call to action on climate change the book makes a compelling case for why coral reefs deserve more attention Sale s argument is as simple as it is powerful as coral reefs go so goes the rest of the planet Bryan P Galligan *Commonweal* When mass coral bleaching and die offs were first identified in the 1980s and eventually linked to warming events the scientific community was sure that such a dramatic and unambiguous signal would serve as a warning sign about the devastating effects of global warming Instead most people ignored that warning Subsequent decades have witnessed yet more degradation Reefs around the world have lost more than 50 percent of their living coral since the 1970s In this book distinguished marine ecologist Peter F Sale imparts his passion for the unexpected beauty complexity and necessity of coral reefs By placing reefs in the wider context of global climate change Sale demonstrates how their decline is more than simply a one off environmental tragedy but rather an existential warning to humanity He offers a reframing of the enormous challenge humanity faces as a noble venture to steer the planet into safe waters that might even retain some coral reefs
