Eye To Eye Intimate Encounters With The Animal World

Brendan G. Carr

Eye To Eye Intimate Encounters With The Animal World:

Eye to Eye Frans Lanting, 2003 *Eye to Eye* the first personal portfolio by master photographer Frans Lanting presents an extraordinary collection of animal images by an award winning photographer and naturalist who has set the standards for a whole generation of wildlife photographers according to the BBC More than 140 photographs made over a period of twenty years reveal the unique personal aesthetic Frans Lanting brings to wildlife photography as well as the startling new perspective on animals his images provoke In a review of his work The New York Times states Mr Lanting s photographs take creatures that have become ordinary and familiar and transform them into haunting new visions This book s exquisite images are accompanied by personal stories and observations from a lifetime of working with wild animals around the world ranging from orangutans in the rain forests of Borneo to emperor penguins in Antarctica More than 70 species are represented in this astonishing portrait gallery celebrating the diversity of life on earth Frans Lanting does not seek in these encounters the beauty traditionally revered by wildlife photographers The perfection I seek in my photographic compositions is a means to show the strength and dignity of animals in nature Frans Lanting s work has been lauded by designers as art by biologists as science and by others as a new vision of the relationship between animals and people one that challenges us to look animals in the eye and see ourselves

Bonobo Frans B. M. de Waal, Frans Lanting, 2023-11-15 This remarkable primate with the curious name is challenging established views on human evolution The bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists In bonobo society females form alliances to intimidate males sexual behavior in virtually every partner combination replaces aggression and serves many social functions and unrelated groups mingle instead of fighting The species s most striking achievement is not tool use or warfare but sensitivity to others In the first book to combine and compare data from captivity and the field Frans de Waal a world renowned primatologist and Frans Lanting an internationally acclaimed wildlife photographer present the most up to date perspective available on the bonobo Focusing on social organization de Waal compares the bonobo with its better known relative the chimpanzee The bonobo s relatively nonviolent behavior and the tendency for females to dominate males confront the evolutionary models derived from observing the chimpanzee s male power politics cooperative hunting and intergroup warfare Further the bonobo s frequent imaginative sexual contacts along with its low reproduction rate belie any notion that the sole natural purpose of sex is procreation Humans share over 98 percent of their genetic material with the bonobo and the chimpanzee Is it possible that the peaceable bonobo has retained traits of our common ancestor that we find hard to recognize in ourselves Eight superb full color photo essays offer a rare view of the bonobo in its native habitat in the rain forests of Zaire as well as in zoos and research facilities Additional photographs and highlighted interviews with leading bonobo experts complement the text This book points the way to viable alternatives to male based models of human evolution and will add considerably to debates on the origin of our species Anyone interested in primates gender issues evolutionary

psychology and exceptional wildlife photography will find a fascinating companion in Bonobo The Forgotten Ape This remarkable primate with the curious name is challenging established views on human evolution The bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists In
