Eye On The Wild Orangutan:

Eye on the Wild: Orangutan, 2013-02-26 High in the trees of the rainforest in Sumatra a baby orangutan is born Follow her from birth to adulthood as she learns to look after herself See her eating her first solid food mashed fruit learning to climb and relaxing in the nest She will stay with her mom learning how to survive in the forest until she is five years old Also available in the Eye on the Wild series Gorilla Cheetah Brown Bear Lion Sea Otter **Orangutanka** Margarita Engle, 2015-03-24 While the other orangutans settle down for a nap one orangutan longs to dance the day away Join her as she seeks the perfect dance partner in a story told through tanka poems a form of ancient Japanese poetry 40pp Color Ill

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology **Reaching Into Thought** Anne E. Russon, Kim A. Bard, Sue Taylor

Parker, 1998-11-26 What special qualities of mind set the great apes apart from other nonhuman primates and indeed from ourselves In this book field and laboratory researchers show that the great apes have high level abilities in both social and ecological domains including tool use pretense self awareness deception consolation teaching and culture itself Great apes are also shown to be capable of thinking at symbolic levels traditionally considered to be uniquely human Here the mechanisms involved in building these abilities especially the lengthy developmental and enculturation processes are emphasized showing how new discoveries are changing views on how primates and human intelligence evolved This book is for anyone interested in current research and theoretical views of great ape cognition **Epic Journeys** National

Geographic, 2019 With more than 300 vivid photographs this inspirational guide reveals the planet's best destinations for hikers skiers divers rafters and more Combining adventure with cultural experiences this one of a kind collection leads readers to new heights of exploration Eye See You Deborah L. Balmuth, Sarah Guare, 2006-06-01 Get into a staring contest with 30 eye popping animals Kids will delight in this pull out poster collection that showcases the captivating eyes of a variety of mammals reptiles birds fish and invertebrates Stunning photography is accompanied by fascinating facts about how each animal's eyes work From the panther's intensely focused gaze to the smiling eyes of a panda children will be

entranced by this exhilarating up close look into how the animal world sees *The Intimate Ape*: Shawn Thompson, Jeffrey Moussaieff Masson, 2010-03-01 Kusasi is a three hundred pound male who could rip your arms and legs off like daisy petals if he wanted Princess was taught sign language by a researcher and had a limited ability to combine vocabulary For centuries the shaggy red orangutan lived in peaceful seclusion in the jungles of Southeast Asia and kept the ancient secrets about its quiet contemplative nature But that time has come to an end as one of the earth's most intelligent creatures has sadly also become one of its vanishing species I went up a muddy brown river called the Sekonyer into the jungles of southern Kalimantan on the island of Borneo to see orangutans as they really are and to know them the way they deserve to be known In *The Intimate Ape* journalist Shawn Thompson brings together a global assemblage of primatologists conservationists and volunteers to reveal the intricate life of these majestic primates As he travels through the steamy rainforests of Sumatra and the jungle river valleys of Borneo visiting nature preserves and observing conservation programs Thompson describes the emotional and intellectual lives of orangutans and recognizes the people who have committed their lives to understand protect and ultimately rescue this powerful yet sensitive relation of humanity An extraordinary book that adds to our understanding of the animal world From the Foreword by Jeffrey Moussaieff Masson After 17 years as a reporter photographer and editor at newspapers in Ontario Shawn Thompson became a full time assistant professor in the journalism department at Thompson Rivers University in British Columbia Canada He has traveled the world to find orangutans and interview orangutan scientists including trips to Sumatra and Borneo the only places in the world where orangutans are found in the wild Java the Philippines Australia the Netherlands and the United States He lives in the small city of Kamloops in the mountainous interior of British Columbia This is his sixth book *The Neglected Ape* Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11 The orangutan is the most highly endangered species of great ape Orangutans are threatened by deforestation poaching the illegal pet trade and the isolation and fragmentation of dwindling wild populations Their conservation is impeded by certain aspects of their ecology e.g. a rain forest habitat and certain features of their life history e.g. an eight to twelve year interbirth interval Added to the U.S. Endangered Species List in 1970 the orangutan is now clearly on the road to extinction The number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12 300 and 20 571 individuals Only 2% of original orangutan habitat is protected and some of these areas are now being destroyed Clearly attention to ecology demography censusing rehabilitation and conservation is essential if the orangutan is to survive in the wild beyond the next century The protection of orangutans is a complex multifaceted problem involving such pressing issues as human poverty overpopulation and the economic development of Southeast Asia Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos In the past scientific and public attention has centered on the African apes

For this reason the sole Asian great ape the orangutan has been called the neglected ape *The Nature of Play* Anthony D. Pellegrini, Peter K. Smith, 2005-01-01 Comprehensive and up to date this tightly edited volume belongs on the desks of researchers and students in developmental psychology comparative psychology animal behavior and evolutionary psychology and will also be of interest to anthropologists It is a richly informative text for advanced undergraduate and graduate level courses **BOOK JACKET**

Animal Tool Behavior Robert W. Shumaker, Kristina R. Walkup, Benjamin B. Beck, 2011-05-02 When published in 1980 Benjamin B Beck's *Animal Tool Behavior* was the first volume to catalog and analyze the complete literature on tool use and manufacture in non human animals Beck showed that animals from insects to primates employed different types of tools to solve numerous problems His work inspired and energized legions of researchers to study the use of tools by a wide variety of species In this revised and updated edition of the landmark publication Robert W Shumaker and Kristina R Walkup join Beck to reveal the current state of knowledge regarding animal tool behavior Through a comprehensive synthesis of the studies produced through 2010 the authors provide an updated and exact definition of tool use identify new modes of use that have emerged in the literature examine all forms of tool manufacture and address common myths about non human tool use Specific examples involving invertebrates birds fish and mammals describe the differing levels of sophistication of tool use exhibited by animals

Great apes and their basic rights Pedro Pozas Terrados, 2020-06-01 The great apes and their basic rights is a call to put in debate the importance of our evolutionary brothers the great apes bonobos chimpanzees gorillas and orangutans all this within the context of the immediate protection of both their populations in the wild as well as their habitat or the liberation of those who are held captives This book is also a request for their basic rights life freedom and to not be tortured physically or psychologically as it is already stated by many scientists and some court rulings that have made headlines worldwide This book coordinated by Pedro Pozas Terrados would not have been possible without the articles written by great scientific figures conservationists animalists people of the

legal world journalists and writers They break down preconceptions and support the great apes and their rights with their words thus endorsing the fight in which the Great Ape Project has been working continuously for two decades You will really enjoy reading from Jose Mar a Berm dez de Castro Risue o Jorge Riechmann Emiliano Bruner Birut M F Galdikas Miguel Angel Valladares Isaac Vega Pedro A Ynterian Karen Altamirano M ximo Sand n Fernando Valladares Ros Kepa Tamames Rosa Montero Francisco Garrido Mar a de las Victorias Gonzalez Federico Manuel Rodriguez Carmen M ndez Joaqu n Araujo Gaciela Regina Itai Roffman Miguel Galindo and Pedro Pozas Planet Without Apes Craig B. Stanford,2012-11-05 Can we live with the consequences of wiping our closest relatives off the face of the Earth and all the biological knowledge about ourselves that would die along with them Extinction of the great apes threatens to become a reality within a few human generations Stanford tells us how we can redirect the course of an otherwise bleak future *Among the Orangutans* Evelyn Gallardo,1993-03 Describes the life and research of Birute Galdikas prominent expert on the behavior of orangutans in the wild Saving the Orangutan Louise Spilsbury,2023-02-01 The orangutan is one of Earth s most entrancing creatures yet it is also one of its most threatened Find out why some people are making it their mission to try to save orangutans and what readers can do to make it their mission too in this call to action series Mission Survival explores why humans are endangering orangutans and their biomes and how and why some people have devoted their careers to helping save them Some of the world s most beautiful creatures are threatened because of human action Find out why some people are making it their mission to try to save them what kids on a mission are doing to save them and what readers can do to make it their mission too in this call to action series Mission Survival includes case studies that explore the work people are undertaking to save threatened animals and career information that shows children how they can build their own careers in animal conservation **Different: Gender Through the Eyes of a Primatologist** Frans de Waal,2022-04-05 Longlisted for the PEN E O Wilson Literary Science Writing Award Every new book by Frans de Waal is a cause for excitement and this one is no different A breath of fresh air in the cramped debate about the differences between men and women Fascinating nuanced and very timely Rutger Bregman author of Humankind A Hopeful History In Different world renowned primatologist Frans de Waal draws on decades of observation and studies of both human and animal behavior to argue that despite the linkage between gender and biological sex biology does not automatically support the traditional gender roles in human societies While humans and other primates do share some behavioral differences biology offers no justification for existing gender inequalities Using chimpanzees and bonobos to illustrate this point two ape relatives that are genetically equally close to humans de Waal challenges widely held beliefs about masculinity and femininity and common assumptions about authority leadership cooperation competition filial bonds and sexual behavior Chimpanzees are male dominated and violent while bonobos are female dominated and peaceful In both species political power needs to be distinguished from physical dominance Power is not limited to the males and both sexes show true leadership capacities Different is a fresh and thought

provoking approach to the long running debate about the balance between nature and nurture and where sex and gender roles fit in De Waal peppers his discussion with details from his own life a Dutch childhood in a family of six boys his marriage to a French woman with a different orientation toward gender and decades of academic turf wars over outdated scientific theories that have proven hard to dislodge from public discourse He discusses sexual orientation gender identity and the limitations of the gender binary exceptions to which are also found in other primates With humor clarity and compassion Different seeks to broaden the conversation about human gender dynamics by promoting an inclusive model that embraces differences rather than negating them

Animals and the Environment Lisa Kemmerer, 2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

Dignifying Science Jim Ottaviani, 2003 This original graphic novel features famous women scientists including Marie Curie Emmy Noether Lise Meitner Rosalind Franklin Barbara McClintock Birute Galdikas and Hedy Lamarr The stories offer a human context often missing when we learn about the discoveries attached to these scientists names Readers drawn in by the compelling anecdotes will discover intriguing characters End notes and references will lead them to further information on the scientists they've read about

The Mermaid Christina Henry, 2018-06-19 From the author of Lost Boy comes a beautiful historical fairy tale about a mermaid who leaves the sea only to become the star attraction of history's greatest showman Once there was a mermaid called Amelia who could never be content in the sea a mermaid who longed to know all the world and all its wonders and so she came to live on land Once there was a man called P T Barnum a man who longed to make his fortune by selling the wondrous and miraculous and there is nothing more miraculous than a real mermaid Amelia agrees to play the mermaid for Barnum and walk among men in their world believing she can leave anytime she likes But Barnum has never given up a money making scheme in his life and he's determined to hold on to his mermaid
